to err is human as a material and mechanical process early printing made no exception to this general rule against the conventional wisdom of a technological triumph spreading freedom and knowledge the history of the book is largely a story of errors and adjustments various mistakes normally crept in while texts were transferred from manuscript to printing formes and different emendation strategies were adopted when errors were spotted in this regard the gutenbergs galaxy provides an unrivalled example of how scholars publishers authors and readers reacted to failure they increasingly aimed at impeccability in both style and content developed time and money efficient ways to cope with mistakes and ultimately came to link formal accuracy with authoritative and reliable information most of these features shaped the publishing industry until the present day in spite of mounting issues related to false news and approximation in the digital age early modern misprinting however has so far received only passing mentions in scholarship and has never been treated together with proofreading in a complementary fashion correction benefited from a somewhat higher degree of attention though check procedures in print shops have often been idealised as smooth and consistent furthermore the emphasis has fallen on the people involved and their intervention in the linguistic and stylistic domains rather than on their methodologies for dealing with typographical and textual mistakes this book seeks to fill this gap in literature providing the first comprehensive and interdisciplinary guide into the complex relationship between textual production in print technical and human faults and more or less successful attempts at emendation the 24 carefully selected contributors present new evidence on what we can learn from misprints in relation to publishers practices printing and pre publication procedures and editorial strategies between 1450 and 1650 they focus on texts images and the layout of incunabula sixteenth and early seventeenth century books issued throughout europe stretching from the output of humanist printers to wide ranging vernacular publications
