in 1945 my father john bradley and other members of combat team 28 raised a flag on iwo jima now with the lions of iwo jima haynes helps america understand how it was done james bradley author of flags of our fathers and flyboys combat team 28 one of the greatest units fielded in the history of the u s marines landed on the black sands of iwo jima on february 19 1945 the unit 4 500 men strong plunged immediately into ferocious combat and by the time the battle ended 70 percent of the men in the team s three assault battalions were killed or seriously wounded the stories told here many for the first time will seem too cruel too heartbreaking to be believed as one veteran remarked each day we learned a new way to die major general fred haynes then a young captain is the last surviving officer in ct 28 who was intimately involved in planning and coordinating all phases of the team s fight on iwo jima in this astonishing narrative haynes and james a warren recapture in riveting detail what the marines experienced drawing on a wealth of previously untapped documents personal narratives letters and interviews with survivors to offer fresh interpretations of the fight for suribachi the iconic flag raising photograph and the nature of the campaign as a whole a harrowing adrenaline charged account of america s worst naval disaster and of the heroism of the men who against all odds survived on july 30 1945 the uss indianapolis was torpedoed in the south pacific by a japanese submarine an estimated 300 men were killed upon impact close to 900 sailors were cast into the pacific ocean where they remained undetected by the navy for nearly four days and nights battered by a savage sea they struggled to stay alive fighting off sharks hypothermia and dementia by the time rescue arrived all but 317 men had died the captain s subsequent court martial left many questions unanswered how did the navy fail to realize the indianapolis was missing why was the cruiser traveling unescorted in enemy waters and perhaps most amazing of all how did these 317 men manage to survive interweaving the stories of three survivors the captain the ship s doctor and a young marine journalist doug stanton has brought this astonishing human drama to life in a narrative that is at once immediate and timeless the definitive account of a little known chapter in world war ii in 1989 to the release in 2007 of the u s navy s maritime strategy a cooperative strategy for 21st century seapower this penetrating intellectual history critically analyzes the navy s ideas and recounts how they interacted with those that govern u s strategy to shape the course of u s naval strategy the book explains how the navy arrived at its current strategic outlook and why it took nearly two decades to develop a new maritime strategy haynes criticizes the navy s leaders for their narrow worldview and failure to understand the virtues and contributions of american sea power particularly in an era of globalization this provocative study tests institutional wisdom and will surely provoke debate in the navy the pentagon and u s and international naval and defense circles just as world war i introduced americans to europe making an indelible impression on thousands of farmboys who were changed forever after they saw parris world war ii was the beginning of america s encounter with the east an encounter whose effects are still being felt and absorbed no single place was more symbolic of this initial encounter than hawaii the target of the first unforgettable japanese attack on american forces and as the forward base and staging area for all military operations in the pacific the first strange place for close to a million soldiers sailors and marines on their way to the horrors of war but as beth bailey and david farber show in this evocative and timely book hawaii was also the first strange place on another kind of journey toward the new american society that began to emerge in the postwar era unlike the largely rigid and static social order of prewar america this was to be a highly mobile and volatile society of mixed racial and cultural influences one above all in which women and minorities would increasingly demand and receive equal status with consummate skill and sensitivity bailey and farber show how these unprecedented changes were tested and explored in the highly charged environment of wartime hawaii most of the hundreds of thousands of men and women whom war brought to hawaii were expecting a hollywood image of paradise what they found instead was vastly different a complex crucible in which radically diverse elements social racial sexual were mingled and transmuted in the heat and strain of war drawing on the rich and largely untapped reservoir of documents diaries memoirs and interviews with men and women who were there the authors vividly recreate the dense lush atmosphere of wartime hawaii an atmosphere that combined the familiar and exotic in a mixture that prefigured the special strangeness of american society today in this story of men machines and missions kenneth estes tells how the u s marine corps came to acquire the armored fighting vehicle and what it tried to do with it the longtime marine tank officer and noted military historian offers an insider s view of the corps s acquisition and use of armored fighting vehicles over the course of several generations a view that illustrates the characteristics of the corps as a military institution and of the men who have guided its development his book examines the planning acquisition and employment of tanks amphibian tractors and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them and their actual use in combat drawing on archival resources previously untouched by researchers and interviews of both past and serving crewmen estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles their leaders and the men who drove these steel chariots into battle such authoritative detail and
