The New Okinawa Meal Kitchen 2020-11-16 did you know that only 20 30 of our life expectancy can be determined through our genes if you want to live to be 100 you may need more than just a sound set of x and y chromosomes passed down from your parents lifestyle is the most important factor in determining not only how long you live but the quality of your long life it turns out that people from a small island off the coast of japan okinawa have figured out a secret recipe for living to be more than 100 years old scientists researching for the u s national institutes of health and japan s ministry of health have been following okinawans who are older than 100 since 1976 in the okinawa centenarian study ocs and they ve learned that there are some very typical traits for all those who live to be so vital at such an advanced age the islands at the southern end of japan have historically been known for longevity once called the land of immortals okinawans have less cancer heart disease and dementia than americans and women there live longer than any women on the planet okinawa is the largest of the ryukyu islands located off the coast of japan between the east china and philippine seas okinawa belongs to one of five regions of the world known as blue zones people who reside in blue zones live exceptionally long healthy lives compared to the rest of the world s population the lifespans enjoyed by okinawans may be explained by several genetic environmental and lifestyle factors that said experts believe that one of the strongest influences is diet this book explores the okinawa diet including its primary foods health benefits and possible drawbacks the people of okinawa live on average to 84 years old it s only 78 8 years in the united states there are some who live to 100 or more and research has shown that the diet is likely the main reason for this scientists have worked hard to figure out just what makes the japanese island so healthy and this is the only reason they have come up with the people of okinawa mostly focus on vegetables but not just any vegetables they eat green orange and yellow vegetables as much as possible this can include the likes of kale bell peppers spinach cucumber and so much more while it can initially feel like you have limited options there are so delicious and healthy ingredients out there and yes green smoothies are allowed on the list as long as you follow the guidelines
