school textbooks in iran saudi arabia egypt and elsewhere in the arab and muslim worlds are filled with anti western and anti israel propaganda most readers will be shocked to discover that history and geography textbooks widely used in america's elementary and secondary classrooms contain some of the very same inaccuracies about jews judaism and israel did you know that there is no record of any important jewish contribution to the sciences

world civilizations thomson wadsworth or that christianity was started by a young palestinian named jesus the world scott foresman pearson supplemental materials and other classroom influences are even worse the trouble with textbooks exposes the poor scholarship and untruths in textbooks about jews and israel the problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed substitute another area how we teach american history western civilization or comparative religion and we have another equally intriguing case study the trouble with textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them the trouble with textbooks tells a cautionary tale for all readers whatever their background of how textbooks that americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is american life instead disparage some groups and teach historical distortions with millions of young people using these textbooks each year the denigration of some should be a concern for all

#### The Trouble with Textbooks

2008-07-31

2005-06-01

over the past fifteen years northeast asia has witnessed growing intraregional exchanges and interactions especially in the realms of culture and economy still the region cannot escape from the burden of history this book examines the formation of historical memory in four northeast asian societies china japan south korea and taiwan and the united states focusing on the period from the beginning of the sino japanese war in 1931 until the formal conclusion of the pacific war with the san francisco peace treaty of 1951 the contributors analyse the recent efforts of korean japanese and chinese scholars to write a common history of northeast asia and question the underlying motivations for their efforts and subsequent achievements in doing so they contend that the greatest obstacle to reconciliation in northeast asia lies in the existence of divided and often conflicting historical memories the book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region this book will be essential reading for students and scholars of asian history asian education and international relations in east asia
