the philosophy of modern song is bob dylan s first book of new writing since 2004 s chronicles volume one and since winning the nobel prize for literature in 2016 dylan who began working on the book in 2010 offers a master class on the art and craft of songwriting he writes over sixty essays focusing on songs by other artists spanning from stephen foster to elvis costello and in between ranging from hank williams to nina simone he analyzes what he calls the trap of easy rhymes breaks down how the addition of a single syllable can diminish a song and even explains how bluegrass relates to heavy metal these essays are written in dylan s unique prose they are mysterious and mercurial poignant and profound and often laugh out loud funny and while they are ostensibly about music they are really meditations and reflections on the human condition running throughout the book are nearly 150 carefully curated photos as well as a series of dream like riffs that taken together resemble an epic poem and add to the work s transcendence in 2020 with the release of his outstanding album

rough and rowdy ways dylan became the first artist to have an album hit the billboard top 40 in each decade since the 1960s the philosophy of modern song contains much of what he has learned about his craft in all those years and like everything that dylan does it is a momentous artistic achievement

why do we find it hard to explain what happens when words are set to music this study looks at the kind of language we use to describe word music relations both in the academic literature and in manuals for singers or programme notes prepared by professional musicians helen abbott s critique of word music relations interrogates overlaps emerging from a range of academic disciplines including translation theory adaptation theory word music theory as well as critical musicology métricométrie and cognitive neuroscience it also draws on other resources whether adhesion science or financial modelling to inform a new approach to analysing song in a model proposed here as the assemblage model the assemblage model has two key stages of analysis the first stage examines the bonds formed between the multiple layers that make up a song setting including metre prosody form structure sound repetition semantics and live performance options the second stage considers the overall outcome of each song in terms of the intensity or stability of the words and music present in a song accretion dilution taking the work of the major nineteenth century french poet charles baudelaire 1821 67 as its main impetus the volume examines how baudelaire s poetry has inspired composers of all genres across the globe from the 1860s to the present day the case studies focus on baudelaire song sets by european composers between 1880 and 1930 specifically maurice rollinat gustave charpentier alexander gretchaninov louis vierne and alban berg using this corpus it tests out the assemblage model to uncover what happens to baudelaire s poetry when it is set to music it factors in the realities of song as a live performance genre and reveals which parameters of song emerge as standard for french text setting and where composers diverge in their approach

music we are often told is a language but if music is a language then who is speaking the composer's voice tries to answer this obvious but infrequently raised question in so doing it puts forward a dramatic theory of musical expression based on the view that every composition is a symbolic utterance involving a fundamental act of impersonation the voice we hear is not that of the composer himself but of a persona a musical projection of his consciousness that experiences and communicates the events of the composition developing his argument by reference to numerous examples in a wide variety of styles Mr Cone moves from song and opera through program music to absolute instrumental music in particular he discusses the implications of his theory for performance according to the dramatic view not only every singer but every instrumentalist as well becomes a kind of actor assuming a role that functions both autonomously and as a component of the total musical persona in his analysis of the problems inherent in this dual nature of the performer's job Mr Cone offers guidance that will prove of practical value to every performing musician he has much to say to the listener as well he recommends an imaginative participation in the component roles of musical work leading to a sense of identification with the persona itself as the path to complete musical understanding and this approach is shown to be relevant to a number of specialized kinds of listening as well those applicable to analysis historical scholarship and criticism the dance too is shown to depend on similar concepts although the composer's voice involves an investigation of how music functions as a form of communication it is not primarily concerned with determining or interpreting the content of the message a final chapter however puts forward a tentative explanation of musical meaning based on an interpretation of the art as a coalescence of symbolic utterance and symbolic gesture while not essential to the main lines of the argument it suggests interesting possibilities for further development of the dramatic theory this title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology this title was originally published in 1974
