Mediating International Child Abduction Cases

2011-10-07 there is growing enthusiasm for the use of mediation to seek to resolve cases arising under the hague convention of 25 october 1980 on the civil aspects of international child abduction the convention however despite being endorsed by the conclusions of meetings of experts judicial comment and even legislative changes there have been relatively few cases where mediation has played a significant role it is suggested that the reason underlying this dichotomy between the widespread support for the use of mediation and the current limited practice is that there are several key questions regarding the use of mediation in the context of the convention which remain to be answered

specifically what is meant by convention mediation how can a mediation process fit within the constraints of the convention and why offer mediation in convention cases given the existing legal framework this book addresses these questions and in so doing seeks to encourage a movement from enthusiasm about the use of mediation in the convention context to greater practice

Principles of Political Economy 1878 mediating nature considers how technology acts as a mediating device in the

construction and circulation of images that inform how we see and know nature scholarship in environmental communication has focused almost exclusively on verbal rather than visual rhetoric and this book engages ecocritical and ecocompositional inquiry to shift focus onto the making of images contributors to this dynamic collection focus their efforts on the intersections of digital media and environmental ecological thinking part of the book s larger argument is that analysis of mediations of nature must develop more critical tools of analysis toward the very mediating technologies that produce such media that is to truly understand mediations of nature one needs to understand the creation and production of those mediations right down to the algorithms circuit boards and power sources that drive mediating technologies ultimately mediating nature contends that ecological literacy and environmental politics are inseparable from digital literacies and visual rhetorics the book will be of interest to scholars and students working in the fields of ecocriticism ecocomposition media ecology visual rehtoric and digital literacy studies

E-Business. New Challenges and Opportunities for Digital-Enabled Intelligent Future 2019-10-31 this book explores the role of nongovernmental mediators in promoting inclusive peace to negotiating parties in myanmar s nationwide ceasefire agreement nca negotiations from 2011 2015 the influx of ngo mediators directly engaging with the negotiating parties and promoting the inclusivity norm coupled with the salience of discourse around all inclusiveness at the end of the nca process forms a puzzle around the agency that ngo mediators wield in influencing political outcomes despite their lack of political and material leverage the author argues that ngo mediators can effectively promote norms using mediation processes as a site of norm diffusion bespoke international conflict resolution ngos have become key mediation actors within the last three decades through creating the niche world of private diplomacy and acting as norm entrepreneurs at the same time as informal third parties these ngo mediators directly engage with politically sensitive actors or convene unofficial peace talks as ngos they are part of an epistemic community of mediation practice professionalizing the field and producing knowledge on what peace mediation is and what it ought to be this dual identity as both ngos and mediators nicely sets them up with a unique agency to promote and diffuse norms these norms often reflect the liberal peacebuilding paradigm promoted from the global north such as inclusion gender equality and transitional justice with the view that these norms are not ends in

themselves but as necessary ingredients for effective mediation the book further questions whether ngos should promote norms in the first place the outcome of the nca process presents a critical and cautionary tale of promoting a presumed universal norm into a given locale and expecting a certain outcome without understanding how an external norm interacts with existing normative frameworks the book illustrates that while ngo mediators do possess the normative agency to effectively promote norms to negotiating parties my empirical research analyses how their promotion of the inclusivity norm to the negotiating parties in myanmar s nca paradoxically resulted in exclusionary outcomes only half of the armed groups in the ethnic armed groups negotiating bloc signed and civil society was effectively crowded out from meaningful participation despite lofty rhetoric this is an open access book

operation of the gold standard in addition to explaining the metal's function in finance he explores its uses in war expenditure foreign trade religious observance and ornamentation at home and abroad britons criticized foreign cultures for their wasteful and inappropriate uses of gold even as it became a prominent symbol of status in more traditional features of british society including its royal family aristocracy and military although britain had been ambivalent in its embrace of gold ultimately it enabled the nation to become the world's most modern economy and to extend its imperial reach around the globe all that glittered tells the story of gold as both a marker of value and a valuable commodity while providing a new window onto britain's ascendance after the 1750s

Rethinking Secular Time in Victorian England 2022-03-10 the age of silver advances a horizontal method of comparative literature and applies this approach to analyze the multiple emergences of early realism and novelistic modernity in eastern and western cultural spheres from the sixteenth through the eighteenth centuries naming this era of economic globalization the age of silver ning ma emphasizes the bullion flow from south america and japan to china through international commerce and argues that the resultant transcontinental monetary and commercial co evolutions stimulated analogous socioeconomic shifts and emergent novelistic realisms the main texts addressed within include the plum in the golden vase china don quixote spain the life of an amorous man japan and robinson crusoe england these eastern and western narratives indicate from

their own geographical vantage points commercial expansions stimulation of social mobility and larger processes of cultural destabilization their realist tendencies are underlain with politically critical functions and connote heteroglossic national imaginaries this horizontal argument realigns novelistic modernity with a multipolar global context and reestablishes commensurabilities between eastern and western literary histories the age of silver challenges the unilateral equation between globalization and modernity with westernization and foregrounds a polycentric mode of global early modernity for pluralizing the genealogy of world literature and historical transcultural relations

Mary Wollstonecraft and Political Economy 2019-08-20 the easy accessibility of political fiction in the long eighteenth century made it possible for any reader or listener to enter

into the intellectual debates of the time as much of the core of modern political and economic theory was to be found first in the fiction not the theory of this age amusingly many of these abstract ideas were presented for the first time in stories featuring less than gifted central characters the five particular works of fiction examined here which this book takes as embodying the core of the enlightenment focus more on the individual than on social group nevertheless in these same works of fiction this individual has responsibilities as well as rights and these responsibilities and rights apply to every individual across the board regardless of social class financial status race age or gender unlike studies of the enlightenment which focus only on theory and nonfiction this study of fiction makes evident that there was a vibrant concern for the constructive as well as destructive aspects of emotion during the enlightenment rather than an exclusive concern for rationality

All That Glittered 2023-10-17 the book investigates the many ways that economic and moral reasoning interact overlap and conflict both historically and at present the book explores economic and moral thinking as a historically contingent pair using the concept of economic normativities the contributors use case studies including economic practices such as trade and finance and tax and famine reforms in the british colonies to explore the intellectual history of how economic and moral issues interrelate
