## **I Mattered a Teacher'S Story 2012-02-21**

in the new meaning of educational change fullen wrote low morale depressed feeling unfairly blamed for the ills of society you must be a teacher this quote spoke volumes to me as i watched politicians jockeying for position by spewing their recycled political rhetoric and then launch an all out attack against public school teachers in years past these attacks had been levied against those receiving social security medicare and medicaid which mainly affected the poor disabled and elderly dont get me wrong these issues are still on the table but i guess politicians felt they had beaten them with a dead horse and needed another soft target to spark the publics interest so public school teachers was it they struck with a vengeance firing public school teachers by the thousands throughout the country in an attempt to reduce the collective bargaining power of teacher unions such as american federation of teacher aft in texas they claimed the only way they knew to help balance the state and district school budget shortfalls was to rescind some of the benefits they had agreed too it hurts when the profession ive dedicated over half of my adult life 25 yrs to is under

attack by politicians and others that have no true concept of what's involved in being a public school teacher we have absolutely nothing to do with the decision making process first we were told to do one thing and then we were told to do something entirely different it's almost schizophrenic to all of my colleagues that remain on the frontlines of public education and those that are planning to take up the banner this book is for you you might not have control over the decisions being made outside your classroom but you can control those things going on inside i provide ways to control student behavior by the design of your classroom to the use of a simple yellow tablet

the focus of this book is to explore teachers evolving personal epistemologies or the beliefs we hold about the origin and development of knowledge in the context of teaching the chapters focus on a range of conceptual frameworks about how university and field based experiences influence the connections between teachers personal epistemologies and teaching practice in an earlier volume we investigated preservice and inservice teachers beliefs and teaching practices brownlee schraw and berthelsen 2011 while we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies to address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support

preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice we argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth

written by radiographers for radiographers essentials of radiographic physics and imaging 2nd edition follows the asrt recommended curriculum and focuses on what the radiographer needs to understand to safely and competently perform radiographic examinations this comprehensive radiologic physics and imaging text links the two subjects together so that you understand how they relate to each other and to clinical practice prepare for success on the arrt exam and the job with just the right amount of information on radiation production and characteristics imaging equipment film screen image acquisition and processing digital image acquisition and display image analysis and the basic principles of computed tomography 345 photos and line drawings encourage you to visualize important concepts strong pedagogy including chapter objectives key terms outlines bulleted chapter summaries and specialty boxes help you organize information and focus on what is most important in each chapter make the physics connection and make the imaging connection boxes link physics and imaging concepts so you fully appreciate the importance of both subjects educator resources on evolve including lesson plans an image collection powerpoint presentations and a test bank provide additional resources for instructors to teach the topics presented in the text

theory to practice boxes succinctly explain the application of concepts and describe how to use the information in clinical practice critical concept boxes further explain and emphasize key points in the chapters math application boxes use examples to show how mathematical concepts and formulas are applied in the clinical setting an emphasis on the practical information highlights just what you need to know to ace the arrt exam and become a competent practitioner numerous critique exercises teach you how to evaluate the quality of radiographic images and determine which factors produce poor images a glossary of key terms serves as a handy reference new updated content reflects the newest curriculum standards outlined by the arrt and asrt providing you with the information you need to pass the boards new critical thinking questions at the end of every chapter offer opportunity for review and greater challenge new chapter review questions at the end of every chapter allow you to evaluate how well you have mastered the material in each chapter new increased coverage of radiation protection principles helps you understand the ethical obligations to minimize radiation dosages shielding time and distance how to limit the field of exposure and what that does to minimize dose and technical factors and how they represent the quantity and quality of radiation new conversion examples and sample math problems give you the practice needed to understand complex concepts new more images highlighting key concepts help you visualize the material new expansion of digital image coverage and ample discussion on differentiating between digital and film ensures you are prepared to succeed on your exams new all new section on manual vs aec use in chapter 13 keeps you in the know new and updated expanded digital fluoroscopy section including up to date information on lcd and plasma displays familiarizes you with the equipment you will encounter new online chapter quizzes on evolve feature 5 10 questions each and reinforce key concepts new powerpoint presentations with new lecture notes on evolve and in depth information in the notes section of each slide make presenting quick and easy for instructors
