your indispensable guide to unraveling the salesforce ecosystem illuminating its applications significance in diverse business scenarios dive into the transformative potential of customer data platforms understanding their role in unlocking tremendous value for enterprises explore the prowess of salesforce data cloud a leading cdp platform and gain practical insights into its seamless implementation the book explores salesforce data cloud architecture gaining actionable insights for implementing both customer data platforms and salesforce data cloud it will navigate the pivotal realms of data security and privacy establishing a sturdy foundation for customer centric strategies the book also covers success stories that showcase the transformative outcomes achieved through the utilization of salesforce data cloud the end of the book serves as a roadmap for those aspiring to conquer the salesforce data cloud consultant exam what will you learn master the dynamics of customer data platforms cdps exploring their fundamentals and significance demystify salesforce data cloud architecture by delving into the framework gain insights into the intricacies of implementing a customer data platforms cdps project develop skills to engage in salesforce data cloud implementation projects as functional consultants or project managers comprehend best practices for data security and privacy of the salesforce data cloud prepare to successfully attempt the salesforce data cloud certification exam who is this book for the book is for all working professionals students managers or anyone wishing to kickstart their journey in the exciting world of customer data platforms and customer experience management those looking to get certified as a salesforce data cloud consultant should use this book to aid their preparation table of contents 1 introducing salesforce platform 2 introduction to customer data platform 3 going beyond cdp salesforce data cloud 4 salesforce data cloud architecture 5 implementing a customer data platform 6 implementing salesforce customer data cloud 7 data security and privacy 8 success stories with salesforce data cloud 9 the way forward for creating great customer experiences 10 preparation for the salesforce data cloud consultant exam index nothing is impossible the word itself says i m possible audrey hepburn jamie s story is a classic tale of transformation from an ordinary 9 to 5 worker in a cramped london office to an innovative online entrepreneur all thanks to the wonders of chatgbt once caught in the mundane cycle of number crunching sleep and the occasional pub outing jamie s zest for life was fading rapidly the job provided security and paid the bills but it lacked excitement and fulfillment television tales of rags to riches seemed to mock jamie s uneventful existence a change was imminent the turning point came unexpectedly after a particularly dull staff meeting jamie s aimless online scrolling led to a discovery chatgbt a platform where ai technology produced human like text initially it felt like a concept straight out of a science fiction movie however driven by a mix of desperation and curiosity jamie began experimenting with chatgbt in the evenings playfully challenging its capabilities with

outlandish questions then came the pivotal moment the realisation that this technology could be the key to creating something innovative and profitable embracing this insight jamie ventured into the realm of online entrepreneurship harnessing the power of chatgbt the platform became the cornerstone for multiple income streams each more creative and lucrative than the last from developing ai generated content for blogs and websites to offering customised ai solutions for businesses jamie found ways to turn this advanced technology into a source of financial success jamie s journey with chatgbt is a testament to the potential that lies in embracing new technologies and thinking outside the conventional career box it s a story of breaking free from the monotony of everyday work life and stepping into a world where technology opens doors to endless possibilities and diverse income streams this book focuses on the widespread use of deep neural networks and their various techniques in session based recommender systems sbrs it presents the success of using deep learning techniques in many sbrs applications from different perspectives for this purpose the concepts and fundamentals of sbrs are fully elaborated and different deep learning techniques focusing on the development of sbrs are studied the book is well modularized and each chapter can be read in a stand alone manner based on individual interests and needs in the first chapter of the book definitions and concepts related to sbrs are reviewed and a taxonomy of different sbrs approaches is presented where the characteristics and applications of each class are discussed separately the second chapter starts with the basic concepts of deep learning and the characteristics of each model then each deep learning model along with its architecture and mathematical foundations is introduced next chapter 3 analyses different approaches of deep discriminative models in session based recommender systems in the fourth chapter session based recommender systems that benefit from deep generative neural networks are discussed subsequently chapter 5 discusses session based recommender systems using advanced hybrid deep learning models eventually chapter 6 reviews different learning to rank methods focusing on information retrieval and recommender system domains finally the results of the investigations and findings from the research review conducted throughout the book are presented in a conclusive summary this book aims at researchers who intend to use deep learning models to solve the challenges related to sbrs the target audience includes researchers entering the field graduate students specializing in recommender systems web data mining information retrieval or machine deep learning and advanced industry developers working on recommender systems this seven volume set lncs 14054 14060 constitutes the proceedings of the 25th international conference hci international 2023 in copenhagen denmark in july 2023 for the hccii 2023 proceedings a total of 1578 papers and 396 posters was carefully reviewed and selected from 7472 submissions additionally 267 papers and 133 posters are included in the volumes of the proceedings

published after the conference as late breaking work these papers were organized in the following topical sections hci design and user experience cognitive engineering and augmented cognition cultural issues in design technologies for the aging population accessibility and design for all designing for health and wellbeing information design visualization decision making and collaboration social media creative industries and cultural digital experiences digital human modeling ergonomics and safety hci in automated vehicles and intelligent transportation sustainable green smart cities and smart industry extended reality interactions gaming and gamification experiences interacting with artificial intelligence security privacy trust and ethics learning technologies and learning experiences ecommerce digital marketing and efinance

this book focuses on the widespread use of deep neural networks and their various techniques in session based recommender systems sbrs it presents the success of using deep learning techniques in many sbrs applications from different perspectives for this purpose the concepts and fundamentals of sbrs are fully elaborated and different deep learning techniques focusing on the development of sbrs are studied the book is well modularized and each chapter can be read in a stand alone manner based on individual interests and needs in the first chapter of the book definitions and concepts related to sbrs are reviewed and a taxonomy of different sbrs approaches is presented where the characteristics

and applications of each class are discussed separately the second chapter starts with the basic concepts of deep learning and the characteristics of each model then each deep learning model along with its architecture and mathematical foundations is introduced next chapter 3 analyses different approaches of deep discriminative models in session based recommender systems in the fourth chapter session based recommender systems that benefit from deep generative neural networks are discussed subsequently chapter 5 discusses session based recommender systems using advanced hybrid deep learning models eventually chapter 6 reviews different learning to rank methods focusing on information retrieval and recommender system domains finally the results of the investigations and findings from the research review conducted throughout the book are presented in a conclusive summary this book aims at researchers who intend to use deep learning models to solve the challenges related to sbrs the target audience includes researchers entering the field graduate students specializing in recommender systems web data mining information retrieval or machine deep learning and advanced industry developers working on recommender systems
