Basic Mechanical Engineering (Fe Sem. I, Su) 2014-06

properties and handling of particulate solids conveyors mixing of solids and pastes size reduction mechanical separations screening filtration separation based on motion of particulate through the fluids mixing and agitation fluidization beneficiation process

EMERGING TRENDS IN MECHANICAL ENGINEERING (22652) 2020

1 mechanical properties of materials simple stresses and strains 2 principal stresses and planes 3 bending moment and shear force 4 moment of inertia 5 bending stresses 6 direct and bending stresses 7 torsion model question paper as per g scheme syllabus with solution and structured making scheme

Unit Operations-i Fluid Flow and Mechanical Operations 2012-09

this edition of design of machine elements has been revised extensively to bring in several new topics and update other contents plethora of solved examples and practice problems make this an excellent offering for the students and the teachers highligh

Mechanical Operations 2017-06-17

the 1st edition of book entitled design of machine elements for iird year diploma semester vi in diploma in mechanical engineering group as per the syllabus prescribed by sbte we have observed the students facing extreme difficulties in understanding the basic principles and fundamental concepts without adequate solved problems along with the text to meet this basic requirement of students sincere efforts have been made to present the subject matter with frequent use of figures and lots of numerical examples

Strength of Materials 2007

introduction conduction convection radiation heat exchange equipments evaporation diffusion distillation gas absorption liquid liquid extraction crystallisation drying appendix i try yourself appendix ii thermal conductivity data appendix iii steam tables

Design of Machine Elements 1987

distillation liquid liquid extraction adsorption and ion exchange leaching crystallisation drying appendix i

Theory of Machines and Mechanisms I. 2020

forests cover thirty one percent of the world s land surface provide habitats for animals livelihoods for humans and generate household income in rural areas of developing countries they also supply other essential amenities for instance they filter water control water runoff protect soil erosion regulate climate store nutrients and facilitate countless non timber forest products ntfps the main ntfps comprise herbs grasses climbers shrubs and trees used for food fodder fuel beverages medicine animals birds and fish for food fur and feathers as well as their products like honey lac silk and paper at present these products play an important role in the daily life and well being of millions of people worldwide hence the forest and its products are very valuable and often ntfps are considered as the potential pillars of sustainable forestry ntfps items like food herbal drugs forage fuel wood fountain fibre bamboo rattans leaves barks resins and gums have been continuously used and exploited by humans wild edible foods are rich in terms of vitamins protein fat sugars and minerals additionally some ntfps are used as important raw materials for pharmaceutical industries numerous industry based ntfps are now being exported in considerable quantities by developing countries accordingly this sector facilitates employment opportunities in remote rural areas so these developments also highlight the role of ntfps in poverty alleviation in different regions of the world this book provides a wide spectrum of information on ntfps including important references we hope that the compendium of chapters in this book will be very useful as a reference book for graduate and postgraduate students and researchers in various disciplines of forestry botany medical botany economic botany ecology agroforestry and biology additionally this book should be useful for scientists experts and consultants associated with the forestry sector

DESIGN OF MACHINE ELEMENTS (Subject Code MEC 604) 2020-02

this book highlights the medical importance of and increasing global interest in herbal medicines herbal health products herbal pharmaceuticals nutraceuticals food supplements herbal cosmetics etc it also addresses various issues that are hampering the advancement of indian herbal medicine around the globe these include quality concerns and quality control pharmacovigilance scientific investigation and validation ipr and biopiracy and the challenge that various indigenous systems of medicine are at risk of being lost the book also explores the role of traditional medicine in providing new functional leads and modern approaches that can offer elegant strategies for facilitating the drug discovery process the book also provides in depth information on various traditional medicinal systems
