common for all streams covers study material plus objective questions with answers on research aptitude subject this book explores an under researched but vital part of education the first year at primary elementary school the work shows that children s progress varies enormously from school to school class to class and child to child this variation is important because the more progress that children make in that first year of school the higher their academic attainment at the end of compulsory schooling the ipips international performance indicators in primary schools project upon which this book is based has been able to provide deeper insights into some of the key issues within and across different contexts whilst highlighting new and some ongoing issues despite all the work there remain unanswered or new puzzling issues which are also explored we need to know how to improve the education at that stage and more broadly we need greater clarity about when children should be taught to read and be introduced to formal arithmetic in other words when they should start school we also need to be clearer about whether when and how young children should be assessed the book will suggest some answers but it will raise important questions and dilemmas for which we do not as yet have answers the importance of early childhood education has been emphasized by a large body of research that has demonstrated that children s

cognitive and socio emotional development is significantly influenced by the quality of the education and care received from their families and in preschool consequently it is important to investigate factors that pertain to the provision of a high quality education and high quality care for young children this book addresses several important issues that are currently under discussion with respect to this topic in particular the book focuses on three topics presently under debate the professionalization of pedagogues working in the field of early childhood education the quality of education and care provided by families and preschools and the promotion of children from socio economically disadvantaged families providing an excellent overview of current research in germany this book will be useful to readers who are interested in international perspectives on early childhood education and who want to gain insight into relevant topics discussed in other countries this book was originally
