Beyond Colonialism, Development and Globalization 2015-12-15 development studies is in a state of flux a new generation of scholars has come to reject what was once regarded as accepted wisdom and increasingly regard development and globalization as part of a continuum with colonialism premised on the same reductionist assumption that progress and growth are objective facts that can be fostered measured assessed and controlled drawing on a variety of theoretical perspectives and approaches this book explores the ways in which social movements in the global south are rejecting western centric notions of development and modernization as well as creating their own alternatives by assessing development theories from the perspective of subaltern groups and movements the contributors posit a new notion of development from below one in which these movements provide new ways of imagining social transformation and a way out of the developmental dead end that has so far characterized post

development approaches beyond colonialism development and globalization therefore represents a radical break with the prevailing narrative of modernization and points to a bold new direction for development studies

Fetal Cardiology Simplified 2013-01-01 fetal cardiology has developed dramatically into a subspecialty in the past 25 years the majority of people examining the fetal heart are not experts in fetal cardiology and therefore find interpreting images particularly in case of abnormality rather difficult this book is designed as a practical guide to be kept near the ultrasound machine for all those performing fetal heart scans but without the expertise of a fetal cardiologist the aim is to allow the user to recognize the common forms of fetal cardiac abnormality and to appreciate the associated lesions and outcome the book has a large number of illustrations to enable the reader to visualize the different types of problem and the various forms in which they may manifest there are relatively few books published in the field of fetal cardiology this book is aimed at all sonographers obstetricians and radiologists performing obstetric ultrasound scans and at paediatric cardiologists both at consultant and trainee level thus this book should fulfill this unmet need in the market although it is not designed as a

comprehensive reference textbook in fetal cardiology

Objective Structured Clinical Examination in Intensive Care Medicine 2016-01-01 the objective structured clinical examination osce has become widely employed in intensive care medicine icm exams such as the uk final fellowship of intensive care medicine fficm the european diploma of intensive care edic exam or the australia and new zealand fellowship of the college of intensive care medicine cicm this book is not only an essential tool for the rehearsal of osces in preparation for these exams but also for american and indian exams and any other exams within the field of intensive care medicine the osce is a style of examination that requires the candidate to present specific information in a short space of time matched to a prescriptive mark scheme this book allows candidates preparing for an icm osce to format their knowledge for this type of examination whilst practising and rehearsing against time the 60 osce stations provide a broad array of topics from past exams ranging across the training icm curriculums the mark schemes are presented in a short punctuated form allowing the candidate access to important points ideal at the sharp end of an exam campaign the 5 sets of osce exams are designed to run as a set of 12 each set will have an array of clinical scenarios requiring swift assessment diagnosis recommendations for investigations and management whilst also exploring aspects of pathophysiology there are a number of data interpretation tools that are incorporated into clinical scenarios as well as standalone stations for electrocardiogram and radiology analysis this book is an important preparatory tool crucial to the armamentarium of any candidate preparing for an icm exam

Complications in Vascular and Endovascular Surgery 2012-01-01 the aim of this book is to help clinicians to reduce the risk of complications after vascular and endovascular surgery whilst it is a surgical truism that the surgeon who does the most operations has the most complications an acknowledgement of the fact that all vascular and endovascular procedures are potentially hazardous and some extremely so some surgeons seem to have more complications than others this book is for all surgeons and radiologists who accept the challenge continually to improve their results each chapter is authored by an experienced endo vascular specialist who will have witnessed firsthand the perils and pitfalls of vascular procedures they have seen all the complications and even occasionally made errors of judgement the chapters are full of information to help the reader avoid similar hazards in future we live in a world of high patient expectation where complications are seen as someone's fault clinicians are familiar with innovations such as outcomes audit and assessment procedural governance and quality improvement programmes there is pressure to show progressive improvement first class surgery is a combination of knowledge and skill and perhaps just a little luck though as is oft quoted the more you practice the luckier you get the information in this book will provide insights protocols and tips and tricks to minimise the risks of procedures in vascular and endovascular surgery it is therefore essential reading for anyone who treats patients with vascular disease

The Little Book of Surgical Cartoons 2016-01-01 evgeniy perelygin a surgeon who is known to his friends as perya has managed to capture the funny the amusing and the ridiculous aspects of what surgeons do and think yes surgeons take their profession very seriously and their patients even more so but what is true in any aspect of human life is also true for surgery there is always something to laugh about or even ridicule and this includes above all surgeons themselves in each of these cartoons lurks the

kernel of a basic surgical truth this truth has been blown up distorted and exaggerated but remains at the heart of the picture each picture has a legend describing the situation which is followed by an aphorism quote or comment this book is essentially for surgical eyes they are all cutting edge and will have the reader in stitches readers may also wish to use the images to enliven powerpoint lectures the editor moshe schein is a surgeon and author of many publications some of which have contributed cartoons and comments to this book so stop taking yourself so seriously do not be afraid to laugh or make others laugh if anyone does not appreciate your humor he she can kiss your ass a life without a sense of humor has no sense at all moshe *Smart Surgeons; Sharp Decisions* 2011-01-01 winner of a highly commended award in the surgery category of the 2011 bma medical book competition a vital question that concerns many how to make surgery safer is it by tightening the regulations and imposing rigid protocols or by empowering surgeons with the resources to help them make safer decisions this is the book for those who would choose the second option what do you think separates smart surgeons from the rest why on the other hand do surgeons make blunders despite having experience and knowledge there is only one answer to both questions it is decision making decision making is an art and is at the heart of surgery it decides between excellent and poor surgical performance although a vital part of professional activity surgeons are not generally aware of how to optimize decision making skills making a good decision is a skill that like any skill needs to be developed and this book reveals how surgeons can sharpen these skills presented here are the findings from decision science that surgeons irrespective of specialty or seniority can apply to everyday practice surgeons are required to adapt new strategies throughout their careers ideas taken from this book will help to speed up the learning curve it offers answers to the questions which experienced surgeons may find difficult to explain equally it answers the questions that trainees may even find difficult to ask you are expected to be cognizant of the knowledge behind making decisions nonetheless no one tells you how to access this information easily this book is the key to that vital information this is a very helpful book written in a friendly and accessible style it provides many fascinating examples of the phenomenon which so interests us surgeons surgeons of all ages and specialties will find it helpful to know about themselves and how they are challenged mr tony giddings past president of the association of surgeons of gb ireland

Evidence-based Management of Hypertension 2010-09-01 the treatment of hypertension is now evolving into a decision making process of ever greater complexity not only has the range of drugs available increased but so too has our knowledge of the diversity of individual patients responsiveness to therapy and the need to tailor their treatment with reference to a wide variety of additional factors in order to provide effective patient care the clinician needs to be aware of all the options available but also of the evidence supporting their use and the extent to which that evidence justifies the choices made in this new volume leading authorities in their fields draw on the available evidence to provide answers to a series of key clinical questions facing the clinician treating hypertension should we treat prehypertension how does the choice of therapy change in the presence of comorbidities such as obesity ischemic heart disease left ventricular hypertrophy diabetes or cerebrovascular disease evidence based management of hypertension provides answers to these and many other questions as the authors present an expert analysis of the available evidence and offer authoritative recommendations for treatment planning in

each chapter tables highlight evidence from a variety of sources and every chapter concludes with a series of key practice points that present a summary of evidence based recommendations for best practice graded according to the quality of that evidence for any clinician concerned with the care of the hypertensive patient this volume will be a valuable aid to treatment planning and long term management

Berrington – the Spider who Wore Glasses [UK edition] 2021-10-01 berrington the spider who wore glasses is the story of a bright young spider who struggles with his eyesight and gets bullied at school because he has trouble following the lessons but with the support of two good friends he overcomes the problem of having a lazy eye and stands up to the bullies who have been teasing him this is a light hearted story of challenge friendship and overcoming bullying all told through the eyes of a young spider berrington the spider who wore glasses is a fun story for all kids and particularly those who might be having a tricky time at school it is ideal for children of any age especially those up to the age of 10 or 11 about the author ben lawrence is now a 12 year old living in rural shropshire in england his main passions are football motor sport and photography ben s idea for berrington the spider who wore glasses came from his own experience of being diagnosed with a lazy eye and needing to wear a patch when he was a youngster ben hopes that the berrington book will encourage other children to go and have their eyes tested and have treatment for a lazy eye if they have one he also hopes that the story will help kids understand why some of their schoolmates need to wear an eye patch and be kind to them about it

Musculoskeletal Trauma Simplified 2009-09-01 a simple case by case approach to the different types of orthopedic fractures the book has been written for residents registrars newly qualified doctors and medical students primarily targeted to those in the fields of diagnostic radiology orthopedic surgery and emergency medicine there are a variety of texts that exist but they lack simple images and explanations from which a fundamental base of skeletal trauma can be formed some of the standard textbooks are still too advanced and lack the basic knowledge this book is divided into sections by anatomic location each containing a number of cases which includes a brief clinical description physical examination followed by radiological images several questions are then asked including the most likely diagnosis and followed by brief discussions on radiological findings and clinical management with this format readers can test their knowledge on important orthopedic fractures as seen on a plain film furthermore they can integrate this information with the standard clinical management involved with that specific disease entity

Headache Simplified 2008-09-01 this practical book provides a handy reference for the doctor confronted with patients complaining of headache headache is one of the most common complaints seen in the outpatient or ambulatory care setting and may be caused by a wide variety of conditions this book clearly explains up to date headache epidemiology impact and pathogenesis and walks the reader through the steps to evaluating and treating the patient presenting with primary or secondary headache disorders also included are reviews of common headache comorbidities including cardiovascular disease and stroke epilepsy fibromyalgia and mood disturbance copious use of easy to understand figures tables and algorithms make this book a useful and practical tool in the clinic guidance on selecting diagnostic tests and specific treatment protocols are provided treatment

recommendations are evidence based with full referencing and include emerging therapies sections on evaluating and treating headaches in children women during pregnancy and the elderly complete this comprehensive reference the likely readership will include the following neurologists general physicians doctors in training hospital pharmacists primary care physicians nurses and nurse practitioners

Cystitis unmasked 2021-02-01 modern science has shown that the widely held beliefs of clinicians about urinary tract infection uti are wrong a large body of meticulous rigorous data from different centres around the world makes this point how can it be that doctors continue to practise in contradiction of what we now know a few clinicians are now changing their approach with gratifying results so it is timely to encourage others to do likewise clinical guidelines have achieved such influence that most doctors feel compelled to follow them and may face censure if they do not regrettably the guidelines are mistaken and contradict the known science the inertia of bureaucracy and the fear of antimicrobial resistance amr do not help to encourage reflection however things are changing and the future should see new and better informed advice it is a tragedy that these circumstances are leading to widespread suffering amongst many women some men and children who experience untreated or inadequately treated infection that may plague them for years this situation has to change this book sets out the truth about this neglected field and explains the many errors that haunt the topic the style makes the message accessible to all clinicians the story is convincing because the clinical stories that illustrate the text will be so familiar to practising clinicians who have been baffled by their experiences above all this book will help you and your patients by detailing an accessible practical approach to resolving this difficult clinical problem in common practice the scope of the book will cover the history of the medicine of urinary tract infection uti the urinary microbiome and what the microbes are really up to the battles between the pathogens and the innate immune system the truth about the tests and the criteria used to define uti antimicrobial resistance

and the importance of darwinian evolution the science and ground breaking research on utis the use of antibiotics successful treatment supportive and other related treatments ethics the future and above all the experiences of the patients

Evidence-based Management of Stroke 2011-06-01 winner of a highly commended award in the neurology category of the 2012 bma medical book competition more than five million people die from stroke each year stroke is also the leading cause of adult disability affecting over 20 million people worldwide with two thirds of stroke victims left permanently disabled we now know that speed of intervention is critical and patient outcomes are determined by a very narrow therapeutic window during which physicians need to be able to make their choice of treatment rapidly based on the best evidence available the purpose of this book is to review that evidence for both medical and surgical therapies as well as preventative strategies drawing on the expertise of leading international authorities to distinguish the issues for which there is a consensus on best practice from those for which the evidence remains inconclusive for example for patients with acute ischemic stroke the first choice is intravenous thrombolytic therapy but does a treatment window of 0 3 hours deliver outcomes significantly better than one of 3 4 5 hours arterial hypertension is the single most important modifiable risk factor for ischemic stroke but what are the effects of blood pressure reduction among acute stroke patients how effective is blood pressure lowering in primary intracerebral hemorrhage what are the arguments in favour of continuation versus temporary discontinuation of antihypertensive therapy immediately after acute ischemic stroke endovascular procedures carotid angioplasty stenting are increasingly important but what do the data tell us about their safety or durability how do they compare with carotid endarterectomy the management of unruptured intracranial aneurysms is rife with controversies clip coil wait and watch the authors examine the evidence for and against other sections examine the impact of various risk factors and special populations a section on stroke after cardiovascular surgeries reviews the incidence and management of stroke following a whole range of procedures another examines special risks during pregnancy lastly the book reviews our understanding of childhood stroke and presents current best practice recommendations for this most challenging group of patients

Cut to the Chase 2006-06-01 matrix pearls are the glue that holds medicine together they are the valuable kernels of wisdom and experience that guide physicians through the complexities of modern medical practice cut to the chase 100 matrix pearls for doctors takes the grand oral traditions of medicine and records them as valuable lessons most of these pearls arise from heated discussions at the morbidity and mortality audit conference on hospital rounds in hallways or in the physicians lounge many arise in the privacy of the consultation room or from family discussions these lessons are usually lost they are seldom recorded and have never been catalogued dr leo gordon author of the popular gordon s guide to the surgical morbidity and mortality conference distills a thirty year career in medicine into one hundred witty poignant and eminently readable essays students nurses administrators and physicians of all specialties will find in this book a delicious view of the ups and downs of life in medicine patients will get a rare look into the thoughts of medical practitioners cut to the chase 100 matrix pearls for doctors is an indispensable guide through the world of today s medicine

Chronic pain management 2021-01-01 chronic pain is a silent epidemic it is estimated to affect 20 30 of the population a good

understanding of the disease diagnosis and management are imperative in providing patient centred care a broad range of practitioners will frequently encounter patients with chronic pain this book covers important topics in chronic pain relevant to many clinicians including but not limited to anaesthetists intensive care professionals surgical and nursing staff junior doctors operating department practitioners general practitioners and medical students it makes essential reading for healthcare workers and is also an invaluable first reference for physiotherapists healthcare managers psychologists and researchers with a need for an overview of the key aspects of this topic this book will not only be an invaluable resource for trainee anaesthetists but also for practising anaesthetists with an interest in teaching the basics of chronic pain it is also a succinct aid for clinical practice medical students and junior doctors who are about to embark on a career in anaesthesia or intensive care medicine will also find the book to be a useful educational tool subjects discussed range from the comprehensive assessment of chronic pain to the multimodal management of chronic pain it is written in a simple and consistent style that can be easily understood and applied to day to day clinical practice this material will be an important tool for professional exams it is an ideal companion for candidates who are preparing for their final exams that include the topic of chronic pain and will help to assess their preparation and guide appropriate revision questions on chronic pain appear in written and structured oral examinations this book will be handy for candidates preparing for examinations conducted by the royal college of anaesthetists uk frca the college of anaesthesiologists of ireland fcai the european society of anaesthesiology edaic the european society of intensive care medicine edic the australian and new zealand college of anaesthetists fanzca the national board of examinations of india dip nb and the american and canadian board exams as well as other competitive exams across the globe candidates appearing for advanced pain examinations will find this book useful to refresh their knowledge on pain medicine the authors are consultants in pain medicine with clinical and teaching experience in university hospitals across the uk they regularly conduct successful pain education courses which consistently attract good feedback they conduct regular final frca and ffpmrca exam courses attended by candidates from all over the country

A Guide to Cancer Genetics in Clinical Practice 2009-05-01 first prize winner in the oncology category of the 2010 bma medical book competition intensive research over the last fifteen years has yielded a vast expansion in our understanding of the role of inheritance and genetics in a variety of cancers several inherited conditions have been identified which result in a high risk of various cancers some of these were previously recognized but the genetic basis underlying them has now been elucidated this knowledge is now entering the sphere of routine clinical care surgeons gastroenterologists gynaecologists oncologists endocrinologists and many others need an awareness of these disorders an understanding of genetic testing and when it is indicated and how to manage patients with inherited cancer predisposition and their families this book covers the basic concepts of cancer genetics the common inherited cancer syndromes are each dealt with in greater depth with the current management outlined this book is aimed at all clinicians who may encounter these conditions in their practice it aims to facilitate identification of high risk individuals and families to inform interaction with geneticists and other subspecialists to provide a basis for patient management and to stimulate interest in these fascinating conditions

FIBROMYALGIA 2022-08-01 in an interesting survey amongst doctors fibromyalgia was considered the least prestigious disease although this survey was done in a scandinavian country and was done more than 13 years ago the grim situation is still the same today all over the world patients suffering with fibromyalgia feel that they are not believed and they are not listened to despite knowledge being gathered on this disease for a few centuries and having definite diagnostic criteria and management pathways the healthcare system still fails many patients who are left without a diagnosis or treatment plan fibromyalgia is a disease that causes widespread pain in many areas of the body and has significant accompanying symptoms like fatigue waking unrefreshed and cognitive symptoms fibromyalgia affects patients as a whole including their cognitive performance physical skills psychological status ability to work and social life it can present as a part of the spectrum of functional pain syndromes often accompanied by other systemic conditions such as irritable bowel syndrome headaches and chronic fatigue it is estimated that 1 in 20 can suffer with this debilitating condition this ground breaking textbook covers the condition in great detail and is written in an easy to understand style that is of great use to doctors nurses medical students physiotherapists occupational therapists psychologists and other healthcare professionals patients who suffer from fibromyalgia also find it useful to understand their medical condition the book helps to direct them to specific treatment strategies explaining the benefit and risk in detail as this is a common chronic pain presentation it is of immense use to candidates preparing for examinations conducted by the royal college of anaesthetists uk frca faculty of pain medicine uk ffpmrca american board of anesthesiology ab college of anaesthesiologists of ireland fcai european society of anaesthesiology and intensive care edaic australian and new zealand college of anaesthetists fanza world institute of pain fipp cips canadian board exams national board of examinations of india dip nb and other competitive exams across the globe

Evidence-based Management of Diabetes 2012-10-01 the clinical management of patients with diabetes is rapidly evolving evidence based management of diabetes provides a succinct summary of a range of topics including areas where there is already well developed evidence for a particular treatment but also those areas where the evidence is perhaps doubtful or there is some associated controversy or ambiguity where possible throughout the book treatment recommendations are given based on the available evidence and practice guidelines the book also highlights the gaps in evidence where further research is needed in the practice of diabetes care there are many issues influencing practitioners currently this book addresses many of the most pertinent issues concerning delivery of diabetes care the authors are internationally renowned experts in the field of diabetes care who successfully and succinctly present state of the art reviews based on the medical evidence designed to help the clinician be as best informed as possible in the care of patients with diabetes

The Evidence for Neurosurgery 2012-10-01 this textbook aims to examine some of the most controversial areas of neurological surgery by applying the current evidence to illuminate our understanding of the pathophysiology of each disease and the outcomes from surgical and non surgical treatments the evidence for neurosurgery is a textbook that will challenge current dogmas in many instances provide an organized framework for understanding where current evidence can be applied clinically and illustrate where gaps in the evidence exist and how these deficiencies may be filled in the future in the first chapter

clinical evidence the reader will gain an understanding of the levels of clinical evidence and will learn what types of study designs are appropriate and in which situations the textbook is then divided into six sections spine vascular tumor pediatrics functional and trauma

The Little Book of Aphorisms & Quotations for the Surgeon 2020-12-01 moshe schein has previously compiled two books of surgical aphorisms and quotations the first book aphorisms quotations for the surgeon with its 1500 quotations and the slimmer a companion to aphorisms quotations for the surgeon since their publication both books have become steady bestsellers surgeons use the books to decorate their lectures or manuscripts with relevant smart or entertaining entries some like to quote from the books during teaching rounds or conferences many simply enjoy them for their collective and eternal surgical wisdom and wit now as moshe is drifting towards retirement here is the last in the trilogy of this international bestselling series the little book of aphorisms quotations for the surgeon the quotes collected within this little book have been gathered since the publication of the last two books in the series as before these aphorisms and quotations are retrieved from multiple sources journals books lectures and more and more gathered from surgical friends around the world the decision to include any entry is based on personal taste some would question the wisdom or accuracy of individual entries others may not get the humor or may object to political incorrectness but it is hoped that most readers especially younger surgeons will discover that surgical truth is old that what they think is a novel idea has been said before and that what they observe around them has been observed years ago it may contribute to their humanity and humility perhaps even add maturity to their surgical personality and practice in addition with a bit of luck it may increase their sense of surgical humor for how can one survive a lifelong surgical career without possessing some of it common sense and a sense of humor are the same thing moving at different speeds a sense of humor is just common sense dancing those who lack humor are without judgment and should be trusted with nothing clive james 1939 2019

Venous Disease Simplified 2006-06-01 this book is a topical review of venous disease providing an up to date view of management and current issues it is aimed at professionals involved in the management of patients with venous disease whether they be a vascular specialist nurse or technologist physicians with an interest in venous disease as well as primary care doctors and nurses who wish to complement their knowledge of the area acknowledged experts active in the field have covered topics ranging from the history epidemiology signs and symptoms investigation and treatment of venous disease to issues of quality of life complications and litigation and setting up a clinical service the treatment of deep vein thrombosis is discussed together with the controversial area of dvt and travel newer techniques of vein ablation subfascial endoscopic perforator surgery seps and foam sclerotherapy are also covered this book should find a place on the bookshelf as an exciting review of contemporary themes and complements traditional textbooks

Intensive Care Medicine MCQs 2015-04-01 intensive care medicine is a dynamic and evolving specialty requiring its practitioners to be part physician physiologist and anaesthetist this requires a firm foundation of knowledge and an ability to apply this to the clinical situation this book contains 270 multiple choice questions allowing self assessment of the breadth of knowledge required of the modern intensivist the book is divided into three papers each consisting of 60 multiple true false mtf and 30

14-18 - A New Vision for Secondary Education 2013-01-24 former secretary of state for education kenneth baker claims that secondary education has become a five year programme with a single narrow aim to prepare pupils for high stakes gcse exams at 16 from 2015 all young people will be legally required to stay in education or training until they are 18 kenneth baker sees

this as a historic opportunity to re think the aims and structure of english education he argues that the national curriculum should extend only to the age of 14 and that there should be four distinct pathways from 14 18 to take account of young people s emerging interests talents and ambitions liberal arts technical sports and creative arts and career all pathways will provide a broad education but each will have a distinctive character matched to the talents and ambitions of individual students in 14 18 a new vision for secondary education kenneth baker builds a compelling case for reform with contributions from a range of educationalists who draw on the history of english education practice elsewhere in the world and their experiences an essential read for anyone interested in the future of secondary education

Recasting the Insolvency Regulation 2019-12-12 this book comprises contributions relating to the insolvency regulation recast which recently entered into force the authors analyse the changes introduced and give their views on the improvements that are thereby achieved in other words they assess to what extent the amendments have mitigated the disadvantages of the previous insolvency regulation three of the chapters concentrate on the issues pertaining to jurisdiction such as the problem of forum shopping by re locating the debtor s centre of main interests furthermore the extent to which the parties have the freedom to contract within the framework of the insolvency regulation recast is discussed also the relevance and consequences of recent developments in corporate law for the current cross border insolvency framework as well as the jurisdictional issues concerning approval requirements are amongst the matters addressed aside from the jurisdictional matters the question of the law applicable to so called avoidance actions is analysed and cross border cooperation between national authorities in the field of insolvency is touched upon to conclude this book covers a range of specific and intriguing topics brought up by the insolvency regulations recast this third volume in the short studies in private international law series is primarily aimed at legal academics dealing with cross border insolvency but it will also prove useful to insolvency judges and practitioners as well as those specialised in financial and fiscal law finally advanced students as well as those with a general interest in insolvency law will also find it of added value div vesna lazić is senior researcher at the t m c asser institute and associate professor of private law at utrecht university in the netherlands steven stuij is an expert in private international law and phd candidate at the erasmus school of law rotterdam div

Amphibian Survey and Monitoring Handbook 2015-08-17 evidence bases for conservation are becoming increasingly important to convince landowners and politicians of the need to take action in defence of species and habitats all around the world a valuable feature of this book is its emphasis on collecting and analysing such essential information trevor beebie phyllomedusa amphibians are among the most globally endangered groups of vertebrates with more than one third of species being assessed as declining or threatened often amphibian declines can be attributed to a suite of interacting factors many of which are human in origin but further information is needed to elaborate the key causes and to discover ways of reversing declines robust surveys provide vital ecological and biological data on amphibian populations and underpin the decisions made to protect species and reverse their declines ongoing monitoring informs land managers and decision makers about whether they are taking the right action this book is designed to help you carry out amphibian surveying and monitoring so that the results of your surveys can

be used effectively part 1 introduces amphibians order anura frogs and toads caudata newts and salamanders and order gymnophonia caecilians part 2 is essential reading before you start surveying it introduces the different types of survey and monitoring programmes and discusses survey aims and resources it contains chapters on collecting and handling survey data survey permissions and licencing health and safety and biosecurity and handling amphibians part 3 discusses everything you need to know during your survey and provides a detailed look at amphibian survey methods part 4 covers presenting and using your survey s data to best effect a useful resources section is also provided with example survey forms and details of additional information resources that will optimize the impacts of your surveys key amphibian survey techniques are discussed with reference to published examples of successful surveys so you ll be able to choose what s right for your situation tips on optimizing your survey effort and handling amphibians in the field are also included whether carrying out a student expedition project or seeking information to support the management of a protected area this book contains essential advice from an amphibian ecologist who has encountered the same sorts of decisions you ll face when planning your surveys
