winner of a 2009 shingo research and professional publication prize notably flexible and brief the a3 report has proven to be a key tool in toyota s successful move toward organizational efficiency effectiveness and improvement especially within its engineering and r d organizations the power of the a3 report however derives not from the report itself but rather from the development of the culture and mindset required for the implementation of the a3 system in understanding a3 thinking the authors first show that the a3 report is an effective tool when it is implemented in conjunction with a pdca based management philosophy toyota views a3 reports as just one piece in their pdca management approach second the authors show that the process leading to the development and management of a3 reports is at least as important as the reports themselves because of the deep learning and professional development that occurs in the process and finally the authors provide a number of examples as well as some very practical advice on how to write and review a3 reports

the complete story of what we don't know and what we should know about american food production and its effect on health and the environment we don't think much about how food gets to our tables or what had to happen to fill our supermarket's produce section with perfectly round red tomatoes and its meat counter with slabs of beautifully marbled steak we don't realize that the meat in one fast food hamburger may come from a thousand different cattle raised in five different countries in fact most of us have a fairly abstract understanding of what happens on a farm in america's food harvey blatt gives us the specifics he tells us for example that a third of the fruits and vegetables grown are discarded for purely aesthetic reasons that the artificial fertilizers used to enrich our depleted soil contain poisonous heavy metals that chickens who stand all day on wire in cages choose feed with pain killing drugs over feed without them and that the average american eats his or her body weight in food additives each year blatt also asks us to think about the consequences of eating food so far removed from agriculture why unhealthy food is cheap why there is an international federation of competitive eating what we don't want to know about how animals raised for meat live die and are butchered whether people are even designed to be carnivorous and why there is hunger when food production has increased so dramatically america's food describes the production of all types of food in the united states and the environmental and health problems associated with each after taking us on a tour of the american food system not only the basic food groups but soil grain farming organic food genetically modified food food processing and diet blatt reminds us that we aren't powerless once we know the facts about food in america we can change things by the choices we make as consumers as voters and as ethical human beings
