by the time the 1969 model year rolled around it was well established that muscle cars were fast and plentiful every manufacturer had at least one corner of the showroom where the go fast guys could congregate and discuss the merits and time slips of the latest performance offerings competition being what it was the manufacturers were looking for ways to entice potential buyers to choose their product over ever increasing offerings from the competition some manufacturers tried to accomplish this with affordable prices some tried fancy marketing schemes and some created a look and a style that screamed performance even when standing still the 1969 mach i was ford s attempt to create a package and a style to match the performance of its recently released and very potent 428 ci cobra jet engine

package displacing the still available but more conservative gt trim the mach i included unique and innovative graphics and mechanical innovations including shaker hood scoops dual racing mirrors deluxe interiors competition suspension dual chrome exhaust tips and blacked out hoods the result was a wildly popular model that sold more than 70 000 units compared to slightly more than 5 000 gt models for the year each volume in the in detail series provides an introduction and historical overview an explanation of the design and concepts involved in creating the car a look at marketing and promotion an in depth study of all hardware and available options and an examination of where the car is on the market today also included are paint and option codes vin and build tag decoders as well as production numbers
