planning alongside proven techniques this new fourth edition is more
strongly focused on serving the needs of all users the role of safety in
the planning process and transportation planning in the context of
societal concerns including the development of more sustainable
transportation solutions the content structure has been redesigned with a
new format that promotes a more functionally driven multimodal approach to
planning design and implementation including guidance toward the latest
tools and technology the material has been updated to reflect the latest
changes to major transportation resources such as the hcm mutcd hsm and
more including the most current ada accessibility regulations
transportation planning has historically followed the rational planning
model of defining objectives identifying problems generating and
evaluating alternatives and developing plans planners are increasingly
expected to adopt a more multi disciplinary approach especially in light
of the rising importance of sustainability and environmental concerns
this book presents the fundamentals of transportation planning in
a multidisciplinary context giving readers a practical reference for day
