in order to support the students during the crucial exam preparatory phase they  
provide the most formidable combination of questions along with top notch  
learning tools to empower the students to conquer every examination they face  
each sample question paper has been designed with a lot of care and precision  
our panel of experts have tried their best to arrange each sample question  
paper in such a way that it gives the students an exact feel of the final  
examination special care has been taken to keep all the solutions simple and  
precise description of the product 20 mock test papers for real time practice  
1000 questions for comprehensive coverage answer key with explanations for  
concept clarity omr sheets for exam experience china satellite navigation

conference csnc 2015 proceedings presents selected research papers from csnc2015 held during 13th 15th may in xian china the theme of csnc2015 is opening up connectivity and win win these papers discuss the technologies and applications of the global navigation satellite system gnss and the latest progress made in the china beidou system bds especially they are divided into 10 topics to match the corresponding sessions in csnc2015 which broadly covered key topics in gnss readers can learn about the bds and keep abreast of the latest advances in gnss techniques and applications sun jiadong is the chief designer of the compass bds and the academican of chinese academy of sciences cas liu jingnan is a professor at wuhan university fan shiwei is a researcher at china satellite navigation office lu xiaochun is an academican of chinese academy of sciences cas over the past years businesses have had to tackle the issues caused by numerous forces from political technological and societal environment the changes in the global market and increasing uncertainty require us to focus on disruptive innovations and to investigate this phenomenon from different perspectives the benefits of innovations are related to lower costs improved efficiency reduced risk and better response to the customers needs due to new products services or processes on the other hand new business models expose various risks such as cyber risks operational risks regulatory risks and others therefore we believe that the entrepreneurial behavior and global mindset of decision makers significantly contribute to the development of innovations which benefit by closing the prevailing gap between developed and developing countries thus this special issue contributes to closing the research gap in the literature by providing a platform for a scientific debate on innovation internationalization and entrepreneurship which would facilitate improving the resilience of businesses to future disruptions representation learning in heterogeneous graphs hg is intended to provide a meaningful vector representation for each node so as to facilitate downstream applications such as link prediction personalized recommendation node classification etc this task however is challenging not only because of the need to incorporate heterogeneous structural graph information consisting of multiple types of node and edge but also the need to consider heterogeneous attributes or types of content e g text or image associated with each node although considerable advances have been made in homogeneous and heterogeneous graph embedding attributed graph embedding and graph neural networks few are capable of simultaneously and effectively taking into account heterogeneous structural graph information as well as the heterogeneous content information of each node in this book we provide a comprehensive survey of current developments in hg representation learning more importantly we present the state of the art in this field including theoretical models and real applications that have been showcased at the top conferences and journals such as tkde kdd www ijcai and aaai the book has two major objectives 1 to provide researchers with an understanding of the fundamental issues and a good point of departure for working in this rapidly expanding field and 2 to present the latest research on applying heterogeneous graphs to model real systems and learning structural features of interaction systems to the best of our knowledge it is the first book to summarize the latest developments and present cutting edge research on heterogeneous graph representation learning to gain the most from it readers

should have a basic grasp of computer science data mining and machine learning description of the product 100 authentic error free and detailed solutions questions are framed exactly as per the latest pattern of upsc two latest papers to access about the real exam tips to crack the upsc cse gs examination upsc cse gs 10 years subject wise trend analysis description of the product 100 authentic error free and detailed solutions questions are framed exactly as per the latest pattern of upsc two latest papers to access about the real exam tips to crack the upsc cse gs examination upsc cse gs 10 years subject wise trend analysis today every mba aspirant wants to get admission in the top management schools to pursue his her dream career to succeed in the management entrance exams and make entry to the colleges of repute requires a lot of effort and practice the candidates have to collect good study material to understand and practice the real time problems and to get familiar with the pattern of exam the book has been designed to fulfill the preparation needs of the aspirants of cat and top b schools across the country solved papers with answer key and detailed solutions have been provided to grasp the pattern of various management entrance examinations vocab builder helps to comprehend the essence of the text and to enrich vocabulary the book gives in depth analysis of several previous years papers and proves to be very useful for various entrance exams v spublishers the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenberg moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health

care that is for all of us the main problems that prevent fast and high quality document processing in electronic document management systems are insufficient and unstructured information information redundancy and the presence of large amounts of undesirable user information the human factor has a significant impact on the efficiency of document search an average user is not aware of the advanced option of a query language and uses typical queries development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above such toolkits should be based on the means and methods of automatic keyword extraction and text classification the categorization or classification of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them thus research on keyword extraction advancements in the field and possible future solutions is of great importance in current times developing a keyword extractor and document classifier emerging research and opportunities presents an information extraction mechanism that can process many kinds of inputs realize the type of text and understand the percentage of the keywords that has to be stored this mechanism then supports information extraction and information categorization mechanisms this module is used to support a text summarization mechanism which leads with the help of the keyword extraction module to text categorization it employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users this book is ideal for practitioners stakeholders researchers academicians and students who are interested in the development of a new keyword extractor and document classifier method central teaching eligibility test ctet is a national level test conducted by cbse twice a year to recruit the eligible candidates as teacher the exam is conducted into 2 papers paper 1 for class 1 5 and paper 2 for class 6 8 any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers the new edition of ctet cracker ctet tets previous years papers 2020 2011 paper ii social science studies for class 6th to 8th has been prepared as per the latest examinations based on various teaching patterns the book covers all the papers of ctet other state tets from 2020 to 2011 i e 3000 solved questions are given so that candidates could understand the difficulty level and latest paper pattern trends and prepare accordingly answers of each question have been provided in a well explained and lucid manner so that each topic could be memorize with the clear concepts preparation from this book will help you crack the ctet and other tets in first attempt table of content previous years paper 2020 2011 over the last two decades large scale national or provincial standardised testing has become prominent in the schools of many countries around the globe national testing in schools an australian assessment draws on research to consider the nature of national testing and its multiple effects including media responses and constructions such as league tables of performance pressures within school systems and on schools effects on the work and identities of principals and teachers and impacts on the experience of schooling for many young people including those least advantaged using

australia as the case site for global concerns regarding national testing this book will be an invaluable companion for education researchers teacher educators teacher education students and teachers globally held in wuhan of china from august 20 21 2016 the 2016 international conference on mechatronics and manufacturing technologies mmt2016 provides an excellent international academic forum for all the researchers and practitioners to share resources exchange opinions and inspire studying the conference enjoys a wide spread participation among all over the universities and research institutes it provides a broad overview of the latest research results on related fields and also a significant platform for academic connection and exchange mmt2016 proceedings collects together 96 articles after peer review to report on state of art developments of mechanical engineering based on originality significance and clarity for the purpose of the conference second language educational experiences for adult learners provides an up to date review of the theory and practice of adult second language education the primary objective is to introduce core ideas that should inform the design development and delivery of language learning experiences that take the typical forms of materials courses teaching and assessment divided into three sections the book first addresses what we know about adult second language acquisition and how individuals may acquire languages differently from each other in the second section key educational design elements from pedagogical methods to curriculum to assessment are then introduced from the perspective of research based understandings about effective practices rounding out the volume is an overview of critical issues for language educational innovation including supporting teachers localizing materials and instruction evaluating and improving education and working with technology each chapter concludes with a set of recommended design principles that should guide readers toward high quality valuable and empirically supported language educational experiences this volume will be of interest to researchers and students investigating instructed language learning designers creating useful language learning materials and language teaching innovators seeking to improve outcomes in diverse instructional settings around the world description of the product 100 updated with the addition of new questions based on new syllabus for 2024 extensive practice with 2000 practice questions of mock test papers exam readiness with smart mind maps and mnemonics previous years 2023 22 21 solved papers appendix via qr code valuable exam insights with expert tips to crack neet exam in the 1st attempt examination analysis with latest 10 years chapter wise trend analysis exchange of information and innovative ideas are necessary to accelerate the development of technology with advent of technology intelligent and soft computing techniques came into existence with a wide scope of implementation in engineering sciences keeping this ideology in preference this book includes the insights that reflect the advances in computer and computational sciences from upcoming researchers and leading academicians across the globe it contains high quality peer reviewed papers of international conference on computer communication and computational sciences icccs 2016 held during 12 13 august 2016 in ajmer india these papers are arranged in the form of chapters the content of the book is divided into two volumes that cover variety of topics such as intelligent hardware and software design advanced

communications power and energy optimization intelligent techniques used in internet of things intelligent image processing advanced software engineering evolutionary and soft computing security and many more this book helps the perspective readers from computer industry and academia to derive the advances of next generation computer and communication technology and shape them into real life applications tulsian s quick revision for financial accounting is a self study handbook loaded with practical questions this book is a perfect revision text comprises structured questions based on pattern and scheme adopted in examinations score plus question bank cbse sample paper with model test papers in informatics practices for class 12 term 1 examination as per the latest reduced bifurcated syllabus for term i examination to be held in november december 2021 chapterwise multiple choice questions chapterwise case study based multiple choice questions the latest cbse sample question paper for term i examination to be held in november december 2021 5 model test papers based on the latest cbse sample question paper for term i examination goyal brothers prakashan description of the product 20 mock test papers for real time practice 1000 questions for comprehensive coverage answer key with explanations for concept clarity omr sheets for exam experience the presented book has been prepared on the basis of the latest syllabus of central teacher eligibility test ctet central teacher eligibility test paper ii class vi viii mathematics and science 15 practice sets presented book highly relevant to exam based paper all questions are set by studying syllabus deeply and inspecting them in the context of ctet questions make important facts in question format attempts have been made to incorporate to present questions from all the chapters an attempt has been made to explain the important facts in simple words so that the candidate can easily understand the subject matter and answer the questions in examination the presented book has been prepared on the basis of the latest syllabus of central teacher eligibility test ctet central teacher eligibility test paper ii class vi viii mathematics and science 15 practice sets and 1 latest solved paper 2023 presented book highly relevant to exam based paper all questions are set by studying syllabus deeply and inspecting them in the context of ctet questions make important facts in question format attempts have been made to incorporate to present questions from all the chapters an attempt has been made to explain the important facts in simple words so that the candidate can easily understand the subject matter and answer the questions in examination

## ***Innovation, Internationalization and Entrepreneurship***

2021-01-08

over the past years businesses have had to tackle the issues caused by numerous forces from political technological and societal environment the changes in the global market and increasing uncertainty require us to focus on disruptive innovations and to investigate this phenomenon from different perspectives the benefits of innovations are related to lower costs improved efficiency reduced risk and better response to the customers needs due to new products services or processes on the other hand new business models expose various risks such as cyber risks operational risks regulatory risks and others therefore we believe that the entrepreneurial behavior and global mindset of decision makers significantly contribute to the development of innovations which benefit by closing the prevailing gap between developed and developing countries thus this special issue contributes to closing the research gap in the literature by providing a platform for a scientific debate on innovation internationalization and entrepreneurship which would facilitate improving the resilience of businesses to future disruptions

# ***Heterogeneous Graph Representation Learning and Applications***

2020-03-14

representation learning in heterogeneous graphs hg is intended to provide a meaningful vector representation for each node so as to facilitate downstream applications such as link prediction personalized recommendation node classification etc this task however is challenging not only because of the need to incorporate heterogeneous structural graph information consisting of multiple types of node and edge but also the need to consider heterogeneous attributes or types of content e g text or image associated with each node although considerable advances have been made in homogeneous and heterogeneous graph embedding attributed graph embedding and graph neural networks few are capable of simultaneously and effectively taking into account heterogeneous structural graph information as well as the heterogeneous content information of each node in this book we provide a comprehensive survey of current developments in hg representation learning more importantly we present the state of the art in this field including theoretical models and real applications that have been showcased at the top conferences and journals such as tkde kdd www ijcai and aaii the book has two major objectives 1 to provide researchers with an understanding of the fundamental issues and a good point of departure for working in this rapidly expanding field and 2 to present the latest research on applying heterogeneous graphs to model real systems and learning structural features of interaction systems to the best of our knowledge it is the first book to summarize the latest developments and present cutting edge research on heterogeneous graph representation learning to gain the most from it readers should have a basic grasp of computer science data mining and machine learning

## **The Patient Will See You Now**

2023-12-05

the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenber moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online

medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there is no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

## **Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities**

2017-10-03

the main problems that prevent fast and high quality document processing in electronic document management systems are insufficient and unstructured information information redundancy and the presence of large amounts of undesirable user information the human factor has a significant impact on the efficiency of document search an average user is not aware of the advanced option of a query language and uses typical queries development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above such toolkits should be based on the means and methods of automatic keyword extraction and text classification the categorization or classification of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them thus research on keyword extraction advancements in the field and possible future solutions is of great importance in current times developing a keyword extractor and document classifier emerging research and opportunities presents an information extraction mechanism that can process many kinds of inputs realize the type of text and understand the percentage of the keywords that has to be stored this mechanism then supports information extraction and information categorization mechanisms this module is used to support a text summarization mechanism which leads with the help of the keyword extraction module to text categorization it employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users this book is ideal for practitioners stakeholders researchers academicians and students who are interested in the development of a new keyword extractor and document classifier method
