the atherton settlement 1835 1855 genesee county was formed in 1836 michigan wasn t even a state until 1837 this was an exciting time for new families to settle here finding land of their own for the first time freedom of religion and new adventures i ll be going through the yearly traditions behind the holidays and inventions along the way i hope you enjoy my historical journey learning about the settlers on thread river was a lot of fun how they made the atherton trail the four atherton families working together to survive the cold winters they built strong shelters saved food and wood for the winter with the help of the natives in 1835 the atherton settlement was established the atherton families built a strong community over the next twelve months with thirty families they built their homes barns wagons three churches a mill and a trading post the first school in the settlement was founded in 1836 the atherton school was a one room schoolhouse built on the corner of atherton trail and center road where the burton memorial library sits now betsey atherton was the first teacher throughout my research we have a lot to be thankful for especially the four atherton men that were brave enough to stay and never give up on the settlement as more people joined the settlement for the next 20 years some had military backgrounds and mostly coming from new york with all manner of trades to prosper as the community when more schools were needed the farmers would build one in each area for the children 1855 atherton settlement combined with other farms to become burton township the second largest township but without a post office so hidden copyright 1872 by f g weller gwenda was beautiful and pregnant susan was beautiful and rich alan was engaged to marry both when he to succeed will they can they open the book and see high stakes game hide and go seek is the first of three novels planned for future publication lately i have been reacquainting myself with the writings of rich alapack through his latest books love s pivotal relationships sorrow s profiles and white hot true blue these reminded me of the lucid beauty of alapack s writing style and of the deep and penetrating insights that he shares with his reader i recognize myself and others in the vignettes these books provide and have been incorporating his texts into my recent graduate classes alapack s writings mark a return to the original form in which phenomenologists used to communicate with their readers via straightforward reflection drawing upon a lifetime of experience speaking in simple descriptive language and capturing the essence of human experience by mastering the art of speaking truthfully and authentically it takes a certain kind of free courageousness to engage in such writing today in an intellectual climate where demands for methodological rigor in the form of operationalism run amok have compromised manuscripts submitted for review in favor of half hearted statements of methodological orthodoxy followed by statements of findings that amount to little more than summaries of raw data what alapack has achieved in his recent writings and especially in his latest venture the splendor of seeing and the magic of touch is a truth speaking both from the author s heart and from his lifetime of authentic dialogue with the interlocutors he has found along his own life s journey the gift that he gives to his reader is the gift of inviting us to join him on his own path to enlightenment scott d churchill phd professor and graduate program director university of dallas editor in chief the humanistic psychologist this book is heart warming joyful and insightfully brilliant this author s newest publication once again represents a heart felt and dedicated effort to researching human phenomena from the laboratory of day today life in this lifelong work the author shares many of his personal experiences experiences of others then invites us to share a developmental journey through monumental experiences in our childhood adolescence and young adulthood he delves into important developmental topics that are rarely if ever discussed in mainstream psychological writing dr alapack offers reflected insight into these experiences in a playful yet profound manner allowing us to gain a deeper understanding of who we are as perfectly imperfect people exploring the dynamics of peekaboo with a young one playing tag as a juvenile sharing the exhilarating and or bitter sweet memories of the first kiss barely coping with or perhaps flaunting a teenage hickey will have you smiling with fondness as you are reminded of your own experiences these personal stories and parables are timeless and ageless this text should be mandatory reading for both students and researchers in developmental psychology parents and educators will find this book personally enriching and will ultimately benefit from a more in depth understanding of themselves and their children i have
