in hard interests soft illusions natasha hamilton hart explores the belief held by foreign policy elites in much of southeast asia indonesia malaysia the philippines thailand singapore and vietnam that the united states is a relatively benign power she argues that this belief is an important factor underpinning u s preeminence in the region because beliefs inform specific foreign policy decisions and form the basis for broad orientations of alignment opposition or nonalignment such foundational beliefs however do not simply reflect objective facts and reasoning processes hamilton hart argues that they are driven by both interests in this case the political and economic interests of ruling groups in southeast asia and illusions hamilton hart shows how the information landscape and standards of professional expertise within the foreign policy communities of southeast asia shape beliefs about the united states these opinions frequently rest on deeply biased understandings of national history that dominate perceptions of the past and underlie strategic assessments of the present and future members of the foreign policy community rarely engage in probabilistic reasoning or effortful knowledge testing strategies this does not mean she emphasizes that the beliefs are insincere or merely instrumental rationalizations rather cognitive and affective biases in the ways humans access and use information mean that interests influence beliefs how they do

so depends on available information the social organization and practices of a professional sphere and prevailing standards for generating knowledge

from the national book award winning author of redeployment and missionaries an astonishing fever graph of the effects of twenty years of war in a brutally divided america when phil klay left the marines a decade ago after serving as an officer in iraq he found himself a part of the community of veterans who have no choice but to grapple with the meaning of their wartime experiences for themselves and for the country american identity has always been bound up in war from the revolutionary war of our founding to the civil war that ended slavery to the two world wars that launched america as a superpower what did the current wars say about who we are as a country and how should we respond as citizens unlike in previous eras of war relatively few americans have had to do any real grappling with the endless invisible conflicts of the post 9 11 world in fact increasingly few people are even aware they are still going on it is as if these wars are a dark star with a strong gravitational force that draws a relatively small number of soldiers and their families into its orbit while remaining inconspicuous to most other americans in the meantime the consequences of american military action abroad may be out of sight and out of mind but they are very real indeed this chasm between the military and the civilian in american life and the moral blind spot it has created is one of the great themes of uncertain ground phil klay's powerful series of reckonings with some of our country's thorniest concerns written in essay form over the past ten years in the name of what do we ask young americans to kill and to die in the name of what does this country hang together as we see at every turn in these pages those two questions have a great deal to do with each another and how we answer them will go a long way toward deciding where our troubled country goes from here
