Basic Electrical Engineering (Shivaji University, F.E., Sem. I & II)

2015-06

this volume presents the selected papers of the first international conference on fundamental research in electrical engineering held at khwarazmi university tehran iran in july 2017 the selected papers cover the whole spectrum of the main four fields of electrical engineering electronic telecommunications control and power engineering

Fundamental Research in Electrical Engineering

while most textbooks about scanning electron microscopy sem cover the high voltage range from 5 50 kev this volume considers the special problems in low voltage sem and summarizes the differences between lvsem and conventional sem chapters cover the influence of lens aberrations and design on electron probe formation the effect of elastic and inelastic scattering processes on electron diffusion and electron range charging and radiation damage effects the dependence of se yield and the backscattering coefficient on electron energy surface tilt and material as well as the angular and energy distributions and types of image contrast and the differences between lvsem and conventional sem modes due to the influence of electron specimen interactions

in the present book nanofluid heat and mass transfer in engineering problems are investigated the use of additives in the base fluid like water or ethylene glycol is one of the techniques applied to augment heat transfer newly innovative nanometer sized particles have been dispersed in the base fluid in heat transfer fluids the fluids containing the solid nanometer sized particle dispersion are called nanofluids at first nanofluid heat and mass transfer over a stretching sheet are provided with various boundary conditions problems faced for simulating nanofluids are reported also thermophysical properties of various nanofluids are presented nanofluid flow and heat transfer in the presence of magnetic field are investigated furthermore applications for electrical and biomedical engineering are provided besides applications of nanofluid in internal combustion engine are provided
