refers to a world in which people are surrounded with electronic environments that are sensitive and responsive to people more specifically this means that electronic devices are bound to disappear into people's backgrounds by integrating them into the environment extending their functionality to provide ubiquitous communication information and entertainment through inobtrusive and natural interaction with the user the 1999 international workshop on interactive distributed multimedia systems and telecommunication services idms in toulouse is the sixth in a series that started in 1992 the previous workshops were held in stuttgart in 1992 hamburg in 1994 berlin in 1996 darmstadt in 1997 and oslo in 1998 the area of interest of idms ranges from basic system technologies such as networking and operating system support to all kinds of teleservices and distributed multimedia applications technical solutions for telecommunications and distributed multimedia systems are merging and quality of service qos will play a key role in both areas however the range from basic system technologies to distributed multimedia applications and teleservices is still very broad and we have to understand the implications of multimedia applications and their requirements for middleware and networks we are challenged to develop new and more fitting solutions for all distributed multimedia the study of human behavior in actual social settings is an extraordinarily complex area of research social behavior unlike the controlled conditions of the laboratory is affected by an enormous number of variables and environments researchers therefore are faced with the task of designing adequate experiments that have the sophisticated controls necessary to increase the experimenter s confidence that a relationship between a particular stimulus in a social environment and a particular social response actually exists this distinctive supplementary text for social psychology courses gives students a real feeling for the possibilities of experimentation outside the laboratory the reprinted and abstracted articles in this book are reports of experimental studies conducted in natural settings and the orientation is scientific focusing on consistencies between laboratory and field research rather than their inconsistencies the book discusses research on discrimination status prosocial behavior dissonance attitude change interpersonal and group influence compliance performance change and rumors honesty and participation the chapters were selected on the basis of both content and methodology and demonstrate particularly ingenious applications of experimental methodology to the study of natural settings throughout the book the editor stresses the ethical and moral issues associated with field research demonstrating that scientific work must be humane as well as rigorous social psychology in natural settings is appropriate for course use at introductory as well as more advanced levels it is instructive and useful as a reference volume for graduate students and researchers as well this book constitutes the thoroughly refereed post proceedings of the
