to this book while classic democratic theory sees as desirable that parties in government and in opposition too are sympathetically responsive to their supporters first and more generally to public opinion and at the same time responsible toward the internal and international systemic constraints and compatibilities these two roles seem to have become more difficult to reconcile and even increasingly incompatible the chapters of this book explore the tensions between responsiveness and responsibility decomposing the international sources from the domestic sources and discussing the options and the possibilities for political parties to continue to play the role of provider of political stability in rapidly changing domestic and international environments this book was published as a special issue of west european politics what are islamic state is seeking to create a civil war in france that syrian president bashar al Assad used chemical weapons that vladimir Putin is trying to destabilise our democracies that terrorism has struck france not for what it does but for what it is that the genocide in darfur has claimed 400 000 victims literally none but these assertions are enough to establish the foreign policy of western countries the author a former agent of the swiss strategic intelligence service reviews the main contemporary conflicts that western countries have managed with fake news over the last thirty years jacques baud a colonel chemical and nuclear weapons expert trained in counter terrorism and counter guerrilla warfare designed the geneva international centre for humanitarian demining gichd and its information management system for mine action imsm in the service of the united nations he served as chief of doctrine for peacekeeping operations in new york and was engaged in africa in nato he led the fight against the proliferation of small arms he is the author of several books on intelligence asymmetric warfare and terrorism the development of recombinant dna methods has changed the face of the food industry over the last 50 years crops which have been genetically modified are being cultivated in more and more countries and this process is likely to accelerate as desirable traits are identified and transferred to appropriate organisms and they are cleared by the regulatory authorities however the technique has its critics who claim that modification of the genome of the plant or animal in this way may pose unknown and

unacceptable risks to the human consumer genetic modification and food quality a down to earth analysis is the first comprehensive text on how gm production methods influence the quality of foods and feeds based on a complete and unbiased assessment of the scientific findings it presents a balanced analysis of the benefits and drawbacks of gene modified food sources in the human diet chapters approach the topic with regard to different food types such as cereal grains oilseed crops vegetables fish and animal products assessing the nutritive value as well as the health and safety of gmo foods this book is a reference for anyone working in the food production industry and will also be of an interest to ngos trade associations and consumers who are looking for an objective balanced study of this contentious issue lebanon experienced serious instability and ethno national conflict following the syrian withdrawal in 2005 compounded by the arab spring which led to regional instability and civil war in iraq and syria why did consociational democracy fail was failure inevitable what impact could external powers play in creating an environment where consociationalism might be successfully implemented this book addresses these key questions and provides a comprehensive analysis of how internal and external elite relations influence the chances of a successful regulation of ethno national conflict through power sharing exploring the roles played by syria qatar iran saudi arabia the united states and france it argues that external actors in the lebanese conflict largely determined whether power sharing was successfully established and shows that the consociational democratic model cannot provide long term conflict regulation in their absence the author argues that relationships between internal and external actors determine the prospects for successful conflict regulation and pinpoints the crucial role of the external forces in the creation of power sharing agreements in lebanon concluding that future success is dependent on the maintenance of positive exogenous pressures this book will be of key interest to students and scholars studying politics international relations and middle east studies providing rare insight into the topic of japanese management this book looks at how japanese companies changed after the economic recession of the 1990s and the decade long restructuring process with 12 case studies this book investigates crisis management strategy

European national football came together in the summer of 2012 for the 14th occasion. This book sets out to examine the enduring social tensions between supporters and authorities as well as those between local national and European identities which formed the backdrop to the 14th staging of the European national football tournament Euro 2012. The context of the tournament was somewhat unique from those staged in previous years, being jointly hosted for the first time by two post-communist nations still in the process of social and economic transition. In this respect, the decision to stage Euro 2012 in Poland and Ukraine bore its own material and symbolic legacies, shaping the tournament. The unsettling of neo-liberal imaginings and emergent East-West fears about poor infrastructure, inefficiencies and corruption jostled with moral panics about racism and fears surrounding the potentially unfulfilled consumerist expectations of West European supporters. The book seeks to explore the ideologies and practices invoked by competing national sentiments and examine the social tensions, ambiguities and social capital-generating potentials surrounding national ethnic European identity with respect to national football teams, supporters and supporter movements. This book was published as a special issue of *Soccer and Society*.

This book explores the ways in which changing views on gender and the place of women in

society during the latter half of the twentieth century affected women's participation and standing within British Paganism more specifically it examines how British Wiccans and Wiccan derived Pagans reacted to the rise of second wave feminism and the women's liberation movement in the UK with a special emphasis on the reception of feminist theory hailing from the USA and to the emergence of feminist branches of witchcraft and goddess spirituality during the 1970s and 1980s the book draws on primary sources never before analyzed in an academic context and makes a valuable contribution to the growing body of knowledge on gender and religion during the twentieth century as very little research has been conducted on the relations between the history of modern Paganism and that of second wave feminism in the UK

this book examines the crisis in ukraine tracing its development and analysing the factors which lie behind it it discusses above all how the two sides have engaged in political posturing accusations escalating sanctions and further escalating threats arguing that the ease with which both sides have reverted to a cold war mentality demonstrates that the cold war belief systems never really disappeared and that the hopes raised in the aftermath of the collapse of the soviet union for a new era in east west relations were misplaced the book pays special attention to the often ignored origins of the crisis within ukraine itself and the permanent damage caused by the fact that ukrainians are killing ukrainians in the eastern parts of the country it also assesses why cold war belief systems have re emerged so easily and concludes by considering the likely long term ramifications of the crisis arguing that the deep rooted lack of trust makes the possibility of compromise even harder than in the original cold war

this book examines why when the conflict in eastern ukraine began in 2014 fighting broke out in the donets k region whereas it did not in kharkiv city despite the city like the donets k region being geographically proximate to russia and similar in ethnic and linguistic make up based on extensive original research the book argues that a key factor was the nature and

behaviour of local elites with those in kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden profound regime change at the centre whereas the elites in the donets k region had much more concentrated ties to the centre were dependent on one network and therefore were much less able to cope with change the book thereby demonstrates how crucial for ukraine are patronal politics patronage networks and informal centre region relations and that it was these local political circumstances rather than russia which brought about the conflict

for a long time analyses of political parties were framed within the usual context of democracy and of the historical transformation of the forms of democratic government more recently several authors among which eminently peter mair progressively began to question the relationship between the normative definition of democratic government and the actual operation of parties these new concerns are well epitomized by the tension between responsiveness and responsibility that gives the title to this book while classic democratic

theory sees as desirable that parties in government and in opposition too are sympathetically responsive to their supporters first and more generally to public opinion and at the same time responsible toward the internal and international systemic constraints and compatibilities these two roles seem to have become more difficult to reconcile and even increasingly incompatible the chapters of this book explore the tensions between responsiveness and responsibility decomposing the international sources from the domestic sources and discussing the options and the possibilities for political parties to continue to play the role of provider of political stability in rapidly changing domestic and international environments this book was published as a special issue of west european politics
