2021 speakerdeck the dispute between georgia and abkhazia is not a conflict of equals in international conflicts adversaries may differ de facto on the ground in terms of population territory and capability among other things as internationally recognized states however they have equal de jure status and fears that inviting the other side to the negotiating table might be construed as recognition for example rarely intrude the question of status does pose problems however when a conflict is being fought between a recognized state and an unrecognized entity and these problems may contribute to increase the intractability of such conflicts this study explores how and to what extent the difference in status between a sovereign state and an unrecognized entity hinders conflict resolution activities based on intensive fieldwork and unedited negotiation material the book provides an in depth analysis of the negotiations informal dialogues and grassroots activities that took place in abkhazia and georgia between 1989 and 2008 this book constitutes the refereed proceedings of the 7th international conference on principles and practice of constraint programming cp 2001 held in paphos cyprus in november december 2001 the 37 revised full papers 9 innovative applications presentations and 14 short papers presented were carefully reviewed and selected from a total of 135 submissions all current issues in constraint processing are addressed ranging from theoretical and foundational issues to advanced and innovative applications in a variety of fields environmental conflict resolution ecr is a process of negotiation that allows stakeholders in a dispute to reach a mutually satisfactory agreement on their own terms the tools of ecr such as facilitation mediation and conflict assessment suggest that it fits well with other ideas for reforming environmental policy first used in 1974 ecr has been an official part of policymaking since the mid 1990s the promise and performance of environmental conflict resolution is the first book to systematically evaluate the results of these efforts the promise and performance of environmental conflict resolution presents empirical research along with insights from some of ecr s most experienced practitioners beginning with a primer about concepts and methods the book describes the kinds of disputes where ecr has been applied making it clear that despite the faith of proponents in the power and usefulness of ecr it is not applicable to all environmental conflicts the contributions that follow critically investigate the record and potential of ecr drawing on perspectives from political science public administration regional planning philosophy psychology anthropology and law ecr is being extended to almost every area of environmental policy rosemary o leary and lisa bingham argue that truly effective use of ecr requires something more than advocacy the promise and performance of environmental conflict resolution provides scholars policymakers students and practitioners with critical assessments so that ecr can be used to its best advantage
