New and Complete Clock and Watchmakers' Manual ... 1860 the clockjobber's handybook is a 1889 work by Australian writer Paul Hasluck that focuses on the care and maintenance of watches and timepieces with chapters on the various tools appliances materials and processes. This classic guide contains everything one needs to know when repairing cleaning or adjusting watches and clocks. Paul Nooncree Hasluck 1854-1916 was an Australian writer and editor. He was a master of technical writing and father of the do it yourself book producing many works on subjects including engineering handicrafts woodwork and more. Other notable works by this author include treatise on the tools employed in the art of turning 1881 the watchjobber's handy book 1887 and screw threads and methods of producing them 1887. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable modern high quality edition complete with a specially commissioned new biography of the author.

New and Complete Clock and Watchmakers' Manual ... 1860 excerpt from new and complete clock and watchmakers manual comprising descriptions of the various gearings escapements and compensations now in use in French Swiss and English clocks and watches patents tools etc with directions for cleaning and repairing with numerous engravings compiled from the French our plan more particularly embraces a description of the workmanship executed in Paris which is justly thought to excel that of the Swiss manufacturers. We shall enter into the details necessary to the exact description of all the manipulations employed by the most celebrated watch makers show the improvements which have been introduced in the manufacture of watches mantel and belfry clocks and chronometers and describe the various tools which have recently been invented both for abridging the manipulations and rendering them more exact. We shall give valuable instructions in respect to repairing and regulating clocks and watches and keeping them in order when they are thus regulated. These are very important for excellent watches are often spoiled by inexperienced workmen to whom they are entrusted for repairs or greatly injured by a want of care or knowledge on the part of their owners. We have endeavored to remedy this by giving full and minute directions as to the care and management of time pieces which cannot fail to be valuable to all who own them. We have also described the various escapements now in use together with the most important gearings and several useful tools which have lately been invented. The manual is divided into chapters in which we shall treat successively first of the manufacture of watches second of apartment clocks and third of belfry clocks and in these we shall avoid describing any workmanship which is not approved by the best artisans.
