GEDA has played a pioneering role in the development of a long term renewable policy and implementing of sustainable energy programmes across the state. GEDA's challenge has been to make the renewable energy and energy efficient technologies economically and commercially viable. The state of Gujarat, India, has created a surplus of power since 2009 and produces nearly 12% of the country's renewable energy. Gujarat had plans to increase from 9,670 MW to 30,000 MW by 2022 and is poised to surpass this by a wide margin, creating the world's largest solar and wind energy park at 30,000 MW. 2/3 set to be completed in Gujarat State Petroleum Corporation (GSPC), Gujarat Industries Power Company Limited (GIPCL), Gujarat Energy Development Agency (GEDA), Gujarat Narmada Valley Fertilizers Chemicals Limited (GNFC), Gujarat Alkalies and Chemicals Limited (GACL), Pandit Deendayal Energy University (PDEU), Gujarat Energy and Research Management Institute (GERMI).

Despite having just 5% of the nation's population, Gujarat houses approximately two-thirds of the residential solar energy systems in India. The boom in rooftop solar installations in Gujarat can be traced back to the favourable policies introduced by the state. Gujarat leads in residential rooftop solar installations, a segment that hasn't quite taken off nationally despite India's overall success with boosting solar power capacity. Gujarat is one of the forerunning industrial states in the country. Planned capacities and long term goals reveal a realistic annual growth of 10.5% up to 2020. See Fig 1. The resultant installed capacity by 2020 is calculated at 34,861 MW, annually generating 198,500 MU of energy. Gujarat Renewable Energy Policy 2023: A Comprehensive Re-Policy that covers all major renewables and encourages setting up of renewable generation projects based on wind, solar and wind solar hybrid technologies. Gujarat Renewable Energy Policy 2023 Executive Procedure Guideline for Re-Projects under Gujarat Renewable Energy Policy 2023.

Gujarat Energy Petrochemicals Department plays an instrumental role towards making Gujarat energy secure and self-reliant. The department is the backbone of state overall economic growth and development across all the sectors. Gujarat Electricity Regulatory Commission has mandated that the Uttar Gujarat Vij Company (UGVCL), Gujarat Energy Transmission Corporation and the Energy and Petrochemicals Department should reimburse the amounts that were excessively charged to the solar developers. Gujarat Energy Transmission Corporation Ltd (GETCO) was formed in 1999 and was registered under the Companies Act 1956 as a part of the power sector reforms process in the state. The company was promoted by erstwhile Gujarat Electricity Board (GEB) as its wholly owned subsidiary in the context of the government of Gujarat. State recognizes the growing impacts of climate change at local and national levels and has taken various policy initiatives to mitigate the impact. Industrial Extension Bureau (IEB) is Government of Gujarat Investment Promotion and Facilitation Agency that helps investors looking for investment in Gujarat. In the last ten months, Gujarat has awarded 2.5 GW of renewable energy, 1.8 GW of solar and 0.7 GW of wind in a deflationary tariff range of ₹2.44-2.95/kWh with 25-year contracts. The regulations will apply to power generated through the open access model from green energy sources including the energy from non-fossil fuel based municipal solid waste to energy projects for the use of intra-state transmission and distribution systems. As of September 2023, the vast majority of Gujarat's installed renewable capacity came from wind power with approximately 11.1 gigawatts. Meanwhile, Gujarat's total installed renewable capacity. Dholera SIR in Gujarat is India's largest greenfield investment region, industrial spread over 920 sq km. DSIR will have smart sustainable infrastructure spanning transportation, water, power, waste, water drainage and urban design. India offers huge investment opportunities worth over 500 billion, particularly in clean energy value chain including renewables, green hydrogen and EV. By 2030, the Commerce Ministry said, India is set to become the 3rd largest renewable energy producer in the world. By 2022, it has set its renewable energy target to 227 GW from the earlier 175 GW. This addition is expected to require another US\$ 50 bn more in investments. Gujarat Electricity Regulatory Commission (GERC) has enhanced the renewable power obligation (RPO) from the letter of expression of interest (EOI) for Gandhinagar photovoltaic rooftop programme. Page 1 of 6. Letter of expression of interest dated 2023-02-01 to Solar Energy Division, Gujarat Energy Research and Management Institute (GERMI).
