highlights the most important topics issues questions and debates affecting the field of communication in the 21st century wejen chang brings a fresh perspective to the most prominent chinese classical philosophers confucius laozi mozi zhuangzi mencius xunzi lord shang and han fei these thinkers founded or influenced the confucian daoist mohist and legalist schools of thought and their ideas continue to guide china s thinking and behaviour today he shows how these thinkers addressed the key question of how philosophical thinking can serve humanity and society chang systematically presents their different solutions and evaluates them according to reason and experience helping you to understand the philosophical roots of law and chinese law in particular this book provides insights to better enhance the understanding of technology s widespread intertwinement with human identity within an advancing technological society provided by publisher highlighted are the pedagogical organizational cultural social and economic factors that influence the adoption and integration of emerging technologies in distance education advice is offered on how educators can launch effective and engaging distance education initiatives in response to technological advancements changing mindsets and economic and organizational pressures at last here is the long awaited first western language reference guide focusing exclusively on chinese literature from ca 700 b c e to the early seventh century c e alphabetically organized it contains no less than 1095 entries on major and minor writers literary forms and schools and important chinese literary terms in addition to providing authoritative information about each subject the compilers have taken meticulous care to include detailed up to date bibliographies and source information the reader will find it a treasure trove of historical accounts especially when browsing through the biographies of authors indispensable for scholars and students of pre modern chinese literature history and thought part two contains s to xi interpersonal communication has been studied in terms of both communication functions and specialized contexts this handbook comprehensively covers the field including research on processes of social influence the role of communication in the development maintenance and decline of close personal relationships nonverbal communication cognitive approaches communication and conflict bargaining and negotiation health communication organizational socialization and supervisor subordinate communication social networks and technologically mediated interpersonal communication two chapters are dedicated to research methods in the field the handbook includes chapters by widely recognized and respected scholars in the field iciems 2013 is to provide a platform for researchers engineers academicians as well as industrial professionals from all over the world to present their research results and development activities in industrial engineering and management science this conference provides opportunities for the delegates to exchange new ideas and experiences face to face to establish business or research relations and to find global partners for future collaboration this book comprehensively covers corrosion and corrosion protection in china in the areas including infrastructure transportation energy water environment as well as manufacturing and public utilities furthermore it presents a major consulting project of chinese academy of engineering which was the largest corrosion investigation project in chinese history including the corresponding methods processes and corrosion protection strategies and provides valuable information for numerous industries sharing essential insights into corrosion prediction and decision making this book will help to decrease costs and extend the service life of equipment and facilities accordingly it will benefit scientists and engineers working on corrosion research and protection as well as economists and government employees 18402000 book chapter ini di tulis oleh sejumlah akademisi di indonesia sesuai kepakarannya kami berrharap buku ini dapat memberikan kontribusi nyata dalam ilmu pengetahuan dan pengelolaan klien khususnya yang berkaitan dengan diabetes mellitus tipe 2 konsep penyakit dan tata laksana sistematika book chapter diabetes mellitus tipe 2 konsep penyakit dan tata laksana ini mengacu pada pendekatan konsep teoritis dan contoh penerapannya sesuai hasil penelitian this essential reference work provides an alphabetic listing with an extensive index of studies on women in china from earliest times to the present day written in western languages primarily english french german and italian containing more than 2500 citations of books chapters in books and articles especially those published in the last thirty years and more than 100 titles of doctoral dissertations and masters theses it covers works written in the disciplines of anthropology and sociology art and archaeology demography economics education fashion film and media studies history interdisciplinary studies law literature music medicine science and technology political science and religion and philosophy it also contains many citations of studies of women in hong kong and taiwan compiled by two skilled librarians and a taiwanese film and culture specialist this volume is the first multilingual and most comprehensive bibliography of taiwanese film scholarship designed to satisfy the broad interests of the modern researcher the second book in a remarkable three volume research project an annotated bibliography for taiwan film studies catalogues the published and unpublished monographs theses manuscripts and conference proceedings of taiwanese film scholars from the 1950s to 2013 paired with an annotated bibliography for chinese film studies 2004 which accounts for texts dating back to the 1920s this series brings together like no other reference the disparate voices of chinese film scholarship charting its unique intellectual arc organized intuitively the volume begins with reference materials bibliographies cinematographies directories indexes dictionaries and handbooks and then moves through film history the colonial period taiwan dialect film new taiwan cinema the 2 28 incident film genres animated anticommunist documentary ethnographic martial arts teen film reviews film theory and technique interdisciplinary studies taiwan and mainland china taiwan and japan film and aboriginal peoples film and literature film and nationality biographical materials film stories screenplays and scripts film technology and miscellaneous aspects of taiwanese film scholarship artifacts acts of censorship copyright law distribution channels film festivals and industry practice works written in multiple languages include transliteration romanized and original script entries which follow universal aacr 2 and american cataloguing standards and professional notations by the editors to aid in the use of sources during the vietnam war the country was divided at the 17th parallel about 140 kilometres north of this dividing line is a mountain pass called ngang pass the land south of this pass about 60 per cent of present day vietnam was occupied for centuries by the kingdoms of linyi funan and zhenla but most people either have not heard of them or have only vague ideas about them this book is about these kingdoms north of ngang pass giao châu was ruled by northern dynasties for over a thousand years from the 2nd century bce to the 10th century ce barring a few intervals of independence this volume also tells how the people of giao châu came out of this long period to become an independent nation and why they did not want to become part of dynastic china this is volume ii of the book series a traveller s story of vietnam s bibliography the exceptionally powerful chinese women leaders of the late seventh and early eighth centuries including wu zhao the taiping and anle princesses empress wei and shangguan wan er though quite prominent in the chinese cultural tradition remain elusive and often misunderstood or essentialized throughout history transgressive typologies utilizes a new multidisciplinary approach to understand how these figures historical identities are constructed in the mainstream secular literary historical tradition and to analyze the points of view that inform these constructions using close readings and rereadings of primary texts written in medieval china through later imperial times this study elucidates narrative typologies and motifs associated with these women to explore how their power is rhetorically framed gendered and ultimately deemed transgressive rebecca doran offers a new understanding of major female figures of the tang era within their literary historical contexts and delves into critical questions about the relationship between chinese historiography reception history and the process of image making and cultural construction the hollywood connection argues that celebrity politics may matter in broader settings than previously understood the questions presented in this collection are compelling and timely the diverse methodologies and robust theoretical applications show the effects of fictional media on consumer audiences and implications for american politics craniosacral therapy for children introduces a craniosacral therapy treatment protocol for babies and children up to 12 years of age a gentle hands on healing approach craniosacral therapy releases tensions in the body in order to relieve pain resolve trauma and improve physical and emotional health author and craniosacral therapist daniel agustoni discusses the reasons for treating young children and for beginning treatment during pregnancy he explains how the stress of birth can cause asymmetries and misalignments in babies bodies that can lead to problems later in life from suckling problems abdominal colic and fragmented sleep patterns to anxiety hyperactivity and add agustoni demonstrates how craniosacral therapy can also offset the effects of stress trauma and ptsd that may affect the growing child depending on his or her environment biology and temperment enhanced with over 120 instructional photos and illustrations the book s hands on techniques are presented along with suggestions for interacting with parents babies and young children the book discusses methods of evaluation and treatment following structural functional and biodynamic models engaging case examples describe the therapeutic results of the treatment which include increased security and confidence relaxation support for the immune system and a sense of well being an important resource for healthcare practitioners this book is also useful for educators parents and caregivers interested in learning new ways to help their children this book is a comparative study of military practice in sui tang china and the byzantine empire between approximately 600 and 700 ce it covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire whilst not neglecting the many differences between the chinese and byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare it shows that contrary to the conventional wisdom positing a straightforward western way of war and an oriental approach characterized by evasion and trickery the specifics of byzantine military practice in the seventh century differed very little from what was known in tang china it argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the eurasian steppes overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society s way of war closing a gap in the literature this comprehensive book presents the utility of carbohydrate derivatives as chiral auxiliaries reagents complex ligands and organocatalysts together with details of their preparation as well as their successful application in stereoselective synthesis divided into four parts carbohydrate auxiliaries carbohydrate reagents carbohydrate ligands carbohydrate organocatalysts it is an indispensable source for every organic chemist the focus of this new book is for medicinal chemists on the chemical agents that have been used or might be required in the future and the methods of synthesis for inserting the reporter groups medicinal chemists need to know the critical issues involved in using such chemical agents with regard to the biological applications for instance what properties are needed chemically and why the topics covered in the book are pet spect contrast agents radioimaging radionuclide conjugates receptor mapping small animal imaging eg wbar whole body autoradiography photoinduced labelling as well as chapters on the physical techniques used including nmr mass spectrometry and xray a key reference for academics postgraduates researchers industrialists and professionals working in or joining this field lao tzu and the bible a meeting transcending time and space yuan zhiming translated by chen shangyu has god s light ever shone on the vast land of china land of god so named by her ancient ancestors this book vividly recaptures god s universal light shown to the chinese sage lao tzu 600 years before jesus was born by comparing lao tzu s tao te ching with the bible yuan zhiming offers a ground breaking interpretation of lao tzu s tao in light of the word or logos yuan zhiming juxtaposes lao tzu s holy one with jesus christ systematically and thoroughly unveiling the nature and characteristics of the mysterious tao in a concrete and understandable manner resolving a riddle of 2 600 years the text speaks to our time because so many people believe that mere secular teaching of morality such as confucius taught is sufficient and because what we really need is a deep spiritual awakening such as lao tzu announced the profound teaching in lao tzu and the bible enriches the spirit of not only the chinese people but also the people of the west dr paul de vries president of new york divinity school and author of the taming of the shrewd lao tzu and the bible offers not only a spiritual feast to the analytical minds about tao word logos illustrating tao in a tangible form the holy one jesus christ but also provides helpful advice about how to follow and be united with tao a work of great erudition and wisdom it contains deep insight opening up the secrets of the tao while also illuminating the bible this book will surely delight the hearts and minds of seekers of tao recent advances in bioconversion of lignocellulose to biofuels and value added chemicals within the biorefinery concept covers the latest developments on biorefineries along with their potential use for the transformation of residues into a broad range of more

valuable products within this context the book discusses the enzymatic conversion process of lignocellulosic biomass to generate fuels and other products in a unified approach it focuses on new approaches to increase enzymatic production by microorganisms the action of microbial inhibitors and strategies for their removal furthermore it outlines the benefits of this integrated approach for generating value added products and the benefits to social and economic aspects circular bio economy hubs and perspectives covers the mechanisms of enzymatic conversion of biomass into value added products discusses bioproducts derived from lignocellulose and their applications includes discussions on design development and the technologies needed for the sustainable manufacture of materials and chemicals offers a techno economic evaluation of biorefineries for integrated sustainability assessments discusses the socioeconomic and cultural economic perspectives of the lignocellulosic biorefinery presents a virtual biorefinery as an integrated approach to evaluate the lignocellulose production chain there are numerous order of battle books on the market so what makes this one so special why should one decide on this particular book most order of battle books usually deal only at the division and corps level of a country s army most higher commands are not covered this book deals with all the branches of a country s military giving a breakdown of all the major echelons of command from theater down to brigade under each component army groups armies corps divisions and brigades and the equivalent command structure for the other military branches are included second it attempts to give an overall command structure of the country s military showing the central headquarters command structure as well as the major components army groups armies corps etc third most order of battle books list the commander and their dates of tenure this book includes those but also lists their next duty assignments or where they went after leaving the post one can literally trace a general officer s career through the upper echelons of command making this completely different from all the other books on order of battle in the market the thirty years since china s reform and opening have been very eventful for the country in in the areas of sexual and reproductive health and this volume presents a multi disciplinary look at the current scholarship going on in china on the subject translated into english to assist scholars worldwide in understanding china s recent history studies in natural products chemistry volume 58 covers the synthesis testing and recording of the medicinal properties of natural products providing cutting edge accounts of fascinating developments in the isolation structure elucidation synthesis biosynthesis and pharmacology of a diverse array of bioactive natural products with the rapid developments in spectroscopic techniques and accompanying advances in high throughput screening techniques it has become possible to rapidly isolate and determine the structures and biological activity of natural products thus opening up exciting opportunities in the field of new drug development in the pharmaceutical industry focuses on the chemistry of bioactive natural products contains contributions by leading authorities in the field presents sources of new pharmacophores
