IEEE Intercon Technical Program Papers

1974

this is the first of two volumes comprising the papers submitted for publication by the invited participants to the tenth international congress of logic methodology and philosophy of science held in florence august 1995 the congress was held under the auspices of the international union of history and philosophy of science division of logic methodology and philosophy of science the invited lectures published in the two volumes demonstrate much of what goes on in the fields of the congress and give the state of the art of current research the two volumes cover the traditional subdisciplines of mathematical logic and philosophical logic as well as their interfaces with computer science linguistics and philosophy philosophy of science is broadly represented too including general issues of natural sciences social sciences and humanities the papers in volume one are concerned with logic mathematical logic the philosophy of logic and mathematics and computer science

IEEE Conference Record of 1972 Annual Pulp and Paper Industry Technical Conference, Bonaventure Hotel, Montreal, Québec, Canada, June 21-23, 1972

1972

this volume constitutes the papers of several workshops which were held in conjunction with the 38th international conference on high performance computing isc high performance 2023 held in hamburg germany during may 21 25 2023 the 49 revised full papers presented in this book were carefully reviewed and selected from 70 submissions isc high performance 2023 presents the following workshops 2nd international workshop on malleability techniques applications in high performance computing hpcmall 18th workshop on virtualization in high performance cloud computing vhpc 23 hpc i o in the data center hpc iodc workshop on converged computing of cloud hpc and edge wocc 23 7th international workshop on in situ visualization woiv 23 workshop on monitoring and operational data analytics moda23 2nd workshop on communication i o and storage at scale on next generation platforms scalable infrastructures first international workshop on risc v for hpc second combined workshop on interactive and urgent supercomputing cwius hpc on heterogeneous hardware h3

Proceedings, Thirteenth IEEE Symposium on Mass Storage Systems

1994

annotation proceedings of the workshop held july 1999 sixteen contributions discuss various internet related topics including high performance common gateway interface invocation end to end management of mixed applications across networks a shopping assistant agent for web shops an intelligent interface agent for based information retrieval a case study in building internet travel brokering services

lifetime behavior and its impact on web caching coordinated placement and replacement for large scale distributed caches specification of order and reliability in smil documents smart multimedia file objects stochastic voting protocol to protect voters privacy an automated fault diagnosis system using hierarchical reasoning and alarm correlation and others contains an author index only annotation copyrighted by book news inc portland or

IEEE Circuits & Devices

1999

75th anniversary of the transistor 75th anniversary commemorative volume reflecting the transistor s development since inception to current state of the art 75th anniversary of the transistor is a commemorative anniversary volume to celebrate the invention of the transistor the anniversary volume was conceived by the ieee electron devices society eds to provide comprehensive yet compact coverage of the historical perspectives underlying the invention of the transistor and its subsequent evolution into a multitude of integration and manufacturing technologies and applications the book reflects the transistor s development since inception to the current state of the art that continues to enable scaling to very large scale integrated circuits of higher functionality and speed the stages in this evolution covered are in chronological order to reflect historical developments narratives and experiences are provided by a select number of venerated industry and academic leaders and retired veterans of the semiconductor industry 75th anniversary of the transistor highlights historical perspectives of the state of the art pre solid state transistor world pre 1947 leading to the invention of the transistor invention of the bipolar junction transistor bjt and analytical formulations by shockley 1948 and their impact on the semiconductor industry large scale integration moore s law 1965 and transistor scaling 1974 and mos lsi including flash memories srams drams 1963 and the toshiba nand flash memory 1989 image sensors 1986 including charge coupled devices and related microsensor applications with comprehensive yet succinct and accessible coverage of one of the cornerstones of modern technology 75th anniversary of the transistor is an essential reference for engineers researchers and undergraduate students looking for historical perspective from leaders in the field

Proceedings of ... ACM/IEEE-CS Joint Conference on Digital Libraries

2007

this volume offers coverage of the 1999 international conference on information visualization topics include augmented and virtual reality visualization in construction computer aided geometric design design visualization digital art graphical modelling and applied visualization

IEEE International Convention Record

1967

this book features research work presented at the 2nd international conference on data engineering and communication technology icdect held on december 15 16 2017 at symbiosis international university pune maharashtra india it discusses advanced multi disciplinary research into smart computing information systems and electronic systems focusing on innovation paradigms in system knowledge intelligence and sustainability that can be applied to provide feasible solutions to varied problems in society the environment and industry it also addresses the deployment of emerging computational and knowledge transfer approaches optimizing solutions in a variety of disciplines of computer science and electronics engineering

Proceedings of the ... International IEEE Conference on Tools for Artificial Intelligence

2000

the book covers a variety of feasible technology options both wired and wireless to enable 6g connectivity in rural and remote regions along with the enabling technology options the book also covers important aspects such as human computer interaction business models for the local operator ecosystem regulatory and right of way policies security and privacy and future challenges related to technology migration urbanization and scalability a special feature of this book is that it covers both the optical and wireless technology aspects to realize 6g connectivity which will be of interest to a broad range of researchers and practitioners detailed figures have been included in the book to cover both the fiber optics and wireless aspects these figures include telecommunication equipment and networks ranging from a locality to the under sea cables to high latitude platforms the book has simple explanations pictorial representations minimal math and conversational language which will enable all the readers to grasp it thereby helping them in decision making and performing comprehensive analysis this book includes the needs of the unconnected and under connected sections of the society notably from the rural and remote areas when the 6g standards are being discussed and developed this feature will help overcome the challenge of widening the digital divide from every new generation of mobile network standards hence the book covers all technical and non technical aspects to be of interest to researchers decision makers academia social workers and the readers in technology growth and empowerment
