at long last a promising dialogue between science and medicine has begun a focal point of this discussion is healing and how it happens jack w geis shows how modern physics and spirituality are centrally involved in this debate no one who is interested in the current interface between science spirituality and medicine can afford to neglect his ideas larry dossey md author healing beyond the body and healing words the power of prayer and the practice of medicine this book introduces some of the most perplexing and exciting aspects of the revolution going on in physics today as it continues toward an increasingly metaphysical basis for defining reality this exciting scientific revolution should be shared by everyone and the issues taken up in this book form a basis for that participation that the math is not in the chalk is becoming increasingly evident as well as the question as to which is more substantial dr laurance r doyle astrophysics and planetary science center for the study of life in the universe seti institute
