this technical report presents the outcome of a working group that was established to determine broadly applicable sound exposure guidelines for fishes and sea turtles after consideration of the diversity of fish and sea turtles guidelines were developed for broad groups of animals defined by the way they detect sound different sound sources were considered in terms of their acoustic characteristics and appropriate metrics defined for measurement of the received levels the resultant sound exposure guidelines are presented in a set of tables in some cases numerical guidelines are provided expressed in appropriate metrics when there were insufficient data to support numerical values the relative likelihood of effects occurring was evaluated although the actual likelihood of effects depends on the received level these sound exposure guidelines which are based on the best scientific information at the time of writing should be treated as interim the expectation is that with more research the guidelines can be refined and more cells in the tables completed recommendations are put forward defining the research requirements of highest priority for extending these interim exposure guidelines

### 2018

diploma thesis from the year 2015 in the subject communications media economics media management grade 3 university of applied sciences graz language english abstract the subject of this master thesis is to write an application for a call in the european funding program of culture called creative europe the application is about a four year cultural exchange project between the regions murau austria maribor slovenia and pecs hungary the author works for a european regional development company and managed a regional cultural project in the past with this master thesis he tries to give an insight about the funding system of the european union and its cultural part some examples of successfully installed culture projects in regional development are followed by a specific application for a transnational culture project the project should be a start for a long term collaboration of these regions supporting artists culture tourism and economic affairs inhabitants of these regions should receive a strong impression of other cultures get to know new people and new friendships to generate a small support of retaining the peace positive development in europe

### 2014-05-06

Abstract: This thesis focuses on the development of a regional cultural project in the European Union. The author, who works for a regional development company, provides an insight into the funding system of the EU and its cultural aspects. Several examples of successful cultural projects in regional development are presented, followed by a specific application for a transnational cultural project. The project aims to initiate a long-term collaboration between the regions of Murau (Austria), Maribor (Slovenia), and Pecs (Hungary). Through this project, the author seeks to provide an insight into the funding system of the European Union and its cultural part. Some examples of successfully installed culture projects in regional development are followed by a specific application for a transnational culture project. The project should be a start for a long-term collaboration of these regions, supporting artists, culture tourism, and economic affairs. Inhabitants of these regions should receive a strong impression of other cultures, get to know new people, and form new friendships to generate a small support of retaining the peace and positive development in Europe.

### 2022-05-27

the guideline offers clear concise and actionable recommendation statements to help clinicians to incorporate recommendations into clinical practice with the goal of improving quality of care each recommendation is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms

### Braddom's Physical Medicine and Rehabilitation 2015-08-20

Abstract: This book provides a comprehensive guide to physical medicine and rehabilitation, covering a wide range of topics and offering practical advice for clinicians. It is a valuable resource for anyone interested in this field.

### 2021-08-27

the definitive guide to thoracic spine pathologies and state of the art surgical approaches surgery of the thoracic spine principles and techniques by renowned spine surgeons ali baaj kumar kakarla and han jo kim fills a gap in the literature with content focused solely on pathologies and surgical techniques of the thoracic spine and vertebral column starting with a thoughtful discussion on the uniqueness of the thoracic region as it relates to pulmonary function the richly illustrated textbook covers a full spectrum of topics from biomechanics and anesthetic considerations to neuromonitoring and neuronavigation with contributions from a cadre of distinguished experts the book encompasses pathophysiology surgical techniques and reconstructive strategies for common degenerative congenital oncologic and traumatic diseases

of the thoracic spine dedicated chapters cover treatment options for different types of scoliosis scheuermann kyphosis proximal junctional deformity and posttraumatic deformity key features treatment of common degenerative conditions including stenosis and disc herniations management of less common inflammatory and infectious spinal diseases such as spondylarthropathies osteomyelitis discitis and fungal and tubercular infections oncologic topics including primary intradural extramedullary and intramedullary spinal cord tumors and thoracic spine metastases surgical treatment of pediatric and adult deformities including congenital idiopathic and degenerative scoliosis classification of thoracic spinal fractures discussion of complete and incomplete thoracic spinal cord injuries posterior and ventral treatment of thoracic spine fractures and osteoporotic compression fractures this is an invaluable evaluation and management tool for neurosurgical and orthopaedic residents and practicing spine surgeons who treat patients with common to complex thoracic spinal pathologies

### **EBM???????????????????? 2014**

soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has grown significantly in some areas soft law has come to fill a void in the absence of treaty law exerting a degree of normative force exceeding its non binding character in others areas soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes despite these developments little attention has been paid to soft law within human rights legal scholarship building on a thorough analysis of relevant case studies this volume systematically explores the roles of soft law in both established and emerging human rights regimes the book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs following introductory chapters that lay out the general conceptual framework the book is divided in two parts the first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards its progressive and regressive effects and the role that different actors play in the incubation process the second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms these chapters examine the relationship between soft and hard law the role of different actors in formulating new soft law and the potential for eventual codification
