Advances in Electronic Commerce, Web Application and Communication Advances in Natural Computation, Fuzzy Systems and Knowledge Discovery Artificial Intelligence Algorithms and Applications Computer-Aided Intelligent Recognition Techniques and Applications Multidisciplinary Computational Intelligence Techniques: Applications in Business, Engineering, and Medicine Advanced Computer and Communication Engineering Technology Computational Intelligence in Data Mining - Volume 1 Recent Trends in Mechatronics Towards Industry 4.0 The Proceedings of the Third International Conference on Communications, Signal Processing, and Systems Reflectorized License Plate Selection Commission Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) 2011 International Conference in Electrics, Communication and Automatic Control Proceedings AI-Driven Intelligent Models for Business Excellence Exploring Critical Approaches of Evolutionary Computation Creating a Sense of Presence in Online Teaching Proceedings of the 11th International Conference on Computer Engineering and Networks Proceedings of Data Analytics and Management Communications, Signal Processing, and Systems Artificial Intelligence and Sustainable Computing Innovative Computing Proceeding of the 3rd International Conference on Electronics, Biomedical Engineering, and Health Informatics Innovations in Electronics and Communication Engineering Network and Parallel Computing Practicing E-government Advances in Character Recognition Image Technology Image and Graphics Advances in Multimedia Information Processing, PCM 2012 How to Build Cobra Kit Cars + Buying Used Artificial Intelligence and Security Modern Approaches in Applied Intelligence Information Technology and Computer Application Engineering Internet of Things and Artificial Intelligence in Transportation Revolution 2012 International Conference on Information Technology and Management Science(ICITMS 2012) Proceedings The Official License Plate Book 3D Imaging—Multidimensional Signal Processing and Deep Learning Recent Advances in Mathematics, Statistics and Computer Science Knowledge-Based Intelligent Techniques in Character Recognition Proceedings of the Sixteenth International Conference on Management Science and Engineering Management – Volume 1 The Online Learning Idea Book

## Advances in Electronic Commerce, Web Application and Communication *2012-02-24*

ecwac2012 is an integrated conference devoted to electronic commerce application and communication in the this proceedings you can find the carefully reviewed scientific outcome of the second international conference on electronic commerce application and communication ecwac 2012 held at march 17 18 2012 in wuhan china bringing together researchers from all around the world in the field

## Advances in Natural Computation, Fuzzy Systems and Knowledge Discovery *2021-06-26*

this book consists of papers on the recent progresses in the state of the art in natural computation fuzzy systems and knowledge discovery the book is useful for researchers including professors graduate students as well as r d staff in the industry with a general interest in natural computation fuzzy systems and knowledge discovery the work printed in this book was presented at the 2020 16th international conference on natural computation fuzzy systems and knowledge discovery icnc fskd 2020 held in xi an china from 19 to 21 december 2020 all papers were rigorously peer reviewed by experts in the areas

## Artificial Intelligence Algorithms and Applications *2020-05-25*

this book constitutes the thoroughly refereed proceedings of the 11th international symposium on intelligence computation and applications isica 2019 held in guangzhou china in november 2019 the 65 papers presented were carefully reviewed and selected from the total of 112 submissions this volume features the most up to date research in evolutionary algorithms parallel computing and quantum computing evolutionary multi objective and dynamic optimization intelligent multimedia systems virtualization and ai applications smart scheduling intelligent control big data and cloud computing deep learning and hybrid machine learning systems the papers are organized according to the following topical sections new frontier in evolutionary algorithms evolutionary multi objective and dynamic optimization intelligent multimedia systems virtualization and ai applications smart scheduling intelligent control big data and cloud computing statistical learning

## Computer-Aided Intelligent Recognition Techniques and Applications *2005-11-01*

intelligent recognition methods have recently proven to be indispensable in a variety of modern industries including computer vision robotics medical imaging visualization and the media furthermore they play a critical role in the traditional fields such as character recognition natural

language processing and personal identification this cutting edge book draws together the latest findings of industry experts and researchers from around the globe it is a timely guide for all those require comprehensive state of the art advice on the present status and future potential of intelligent recognition technology computer aided intelligent recognition techniques and applications provides the user community with systems and tools for application in a very wide range of areas including it education security banking police postal services manufacturing mining medicine multimedia entertainment communications data visualization knowledge extraction pattern classification and virtual reality disseminates information in a plethora of disciplines for example pattern recognition ai image processing computer vision and graphics neural networks cryptography fuzzy logic databases evolutionary algorithms shape and numerical analysis illustrates all theory with real world examples and case studies this valuable resource is essential reading for computer scientists engineers and consultants requiring up to date comprehensive guidance on the latest developments in computer aided intelligent recognition techniques and applications its detailed practical approach will be of interest to senior undergraduate and graduate students as well as researchers and industry experts in the field of intelligent recognition

# Multidisciplinary Computational Intelligence Techniques: Applications in Business, Engineering, and Medicine *2012-06-30*

this book explores the complex world of computational intelligence which utilizes computational methodologies such as fuzzy logic systems neural networks and evolutionary computation for the purpose of managing and using data effectively to address complicated real world problems

# Advanced Computer and Communication Engineering Technology *2014-11-01*

this book covers diverse aspects of advanced computer and communication engineering focusing specifically on industrial and manufacturing theory and applications of electronics communications computing and information technology experts in research industry and academia present the latest developments in technology describe applications involving cutting edge communication and computer systems and explore likely future directions in addition access is offered to numerous new algorithms that assist in solving computer and communication engineering problems the book is based on presentations delivered at icocoe 2014 the 1st international conference on communication and computer engineering it will appeal to a wide range of professionals in the field including telecommunication engineers computer engineers and scientists researchers academics and students

## *Computational Intelligence in Data Mining - Volume 1*
## *2014-12-10*

the contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science i e computational intelligence and data mining data mining aims at the automatic discovery of underlying non trivial knowledge from datasets by applying intelligent analysis techniques the interest in this research area has experienced a considerable growth in the last years due to two key factors a knowledge hidden in organizations databases can be exploited to improve strategic and managerial decision making b the large volume of data managed by organizations makes it impossible to carry out a manual analysis the book addresses different methods and techniques of integration for enhancing the overall goal of data mining the book helps to disseminate the knowledge about some innovative active research directions in the field of data mining machine and computational intelligence along with some current issues and applications of related topics

## **Recent Trends in Mechatronics Towards Industry 4.0**
## *2021-07-15*

this book presents part of the im3f 2020 proceedings from the mechatronics track it highlights key challenges and recent trends in mechatronics engineering and technology that are non trivial in the age of industry 4 0 it discusses traditional as well as modern solutions that are employed in the multitude spectra of mechatronics based applications the readers are expected to gain an insightful view on the current trends issues mitigating factors as well as solutions from this book

## **The Proceedings of the Third International Conference on Communications, Signal Processing, and Systems**
## *2015-06-12*

the proceedings of the third international conference on communications signal processing and systems provides the state of art developments of communications signal processing and systems the conference covered such topics as wireless communications networks systems signal processing for communications this book is a collection of contributions coming out of third international conference on communications signal processing and systems held on july 2014 in hohhot inner mongolia china

## **Reflectorized License Plate Selection Commission** *1990*

in this book the authors explore technological advances in the fields of multimedia processing and mathematical modeling by highlighting the latest research in this field discussed at the international conference on advanced intelligent systems for sustainable development ai2sd

2019 held on july 08 11 2019 in marrakech morocco in addition to advances in architectures networking and system support tools for multimedia and hypermedia the book examines the role of mathematical modeling as a tool for the standardization and formulation of design management decision making and optimization problems and presents various innovative works involving advanced intelligent systems based on appropriate mathematical modeling tools and techniques the book is intended for all actors in the educational sector namely students professors academic researchers and stakeholders whose work involves multimedia system development design and applications it constitutes an essential forum for the exchange of ideas approaches and innovative techniques between these actors concerning the development of and innovation in the field of education with the i4 0 revolution the authors of each chapter report on the state of the art and present the outcomes of their own research laboratory experiments and successful applications the purpose of the book is to combine the idea of advanced intelligent systems with appropriate tools and techniques for modeling management and decision support in the fields of multimedia system development design and applications

## Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) *2020-02-05*

2011 international conference in electrics communication and automatic control proceedings examines state of art and advances in electrics communication and automatic control this book presents developments in power conversion signal and image processing image video signal processing the conference brings together researchers engineers academic as well as industrial professionals from all over the world to promote the developments of electrics communication and automatic control

## *2011 International Conference in Electrics, Communication and Automatic Control Proceedings 2011-11-25*

as digital technology is taking the world in a revolutionary way and business related aspects are getting smarter this book is a potential research source on the artificial intelligence based business applications and intelligence

## *AI-Driven Intelligent Models for Business Excellence 2022*

modern optimization approaches have attracted an increasing number of scientists decision makers and researchers as new issues in this field emerge different optimization methodologies must be developed and implemented exploring critical approaches of evolutionary computation is a vital scholarly publication that explores the latest developments methods approaches and applications of evolutionary models in a variety of fields it also emphasizes evolutionary models

of computation such as genetic algorithms evolutionary strategies classifier systems evolutionary programming genetic programming and related fields such as swarm intelligence and other evolutionary computation techniques highlighting a range of pertinent topics such as neural networks data mining and data analytics this book is designed for it developers it theorists computer engineers researchers practitioners and upper level students seeking current research on enhanced information exchange methods and practical aspects of computational systems

# Exploring Critical Approaches of Evolutionary Computation *2018-07-13*

creating a sense of presence in online teaching this important new resource shows how a strong sense of online presence contributes to greater student satisfaction and retention the authors explore the psychological and social aspects of online presence from both the instructor and student perspective and provide an instructional design framework for developing effective online learning based on solid research and extensive experience the book is filled with suggested methods illustrative case scenarios and effective activities for creating maintaining and evaluating presence throughout an online course the authors have taken the mystery out of the critical concept of presence by providing the theory that supports its importance and simple techniques to make it happen instructors who read this book will be able to develop effective online learning communities and achieve desired learning outcomes rena m palloff and keith pratt program directors and faculty teaching in the virtual classroom program fielding graduate university lehman and conceição blend hands on experience research and a collection of practical tips to provide every online instructor with strategies for being there if you want to bring the real you into your online classes and take your online teaching to the next level this is the book to read chip donohue director of distance learning erikson institute this book provides a practical and interactive model to help readers reflect on why and how they can guide online and blended learning activities characterized by a personal sense of presence alan b knox professor school of education university of wisconsin madison

# Creating a Sense of Presence in Online Teaching *2010-08-05*

this conference proceeding is a collection of the papers accepted by the cenet2021 the 11th international conference on computer engineering and networks held on october 21 25 2021 in hechi china the topics focus but are not limited to internet of things and smart systems artificial intelligence and applications communication system detection analysis and application and medical engineering and information systems each part can be used as an excellent reference by industry practitioners university faculties research fellows and undergraduates as well as graduate students who need to build a knowledge base of the most current advances and state of practice in the topics covered by this conference proceedings this will enable them to produce maintain and manage systems with high levels of trustworthiness and complexity

## Proceedings of the 11th International Conference on Computer Engineering and Networks 2021-11-11

this book includes original unpublished contributions presented at the international conference on data analytics and management icdam 2023 held at london metropolitan university london uk during june 2023 the book covers the topics in data analytics data management big data computational intelligence and communication networks the book presents innovative work by leading academics researchers and experts from industry which is useful for young researchers and students the book is divided into four volumes

## Proceedings of Data Analytics and Management 2023-12-29

this book brings together papers from the 2018 international conference on communications signal processing and systems which was held in dalian china on july 14 16 2018 presenting the latest developments and discussing the interactions and links between these multidisciplinary fields the book spans topics ranging from communications signal processing and systems it is aimed at undergraduate and graduate electrical engineering computer science and mathematics students researchers and engineers from academia and industry as well as government employees

## Communications, Signal Processing, and Systems 2019-06-14

this book gathers peer reviewed proceedings of the 3rd international conference on innovative computing ic 2020 this book aims to provide an open forum for discussing recent advances and emerging trends in information technology science and engineering themes within the scope of the conference include communication networks business intelligence and knowledge management intelligence and any related fields that depend on the development of information technology the respective contributions presented here cover a wide range of topics from databases and data mining networking and communications the web and internet of things to embedded systems soft computing social network analysis security and privacy optical communication and ubiquitous pervasive computing readers such as students researchers and industry professionals in the fields of cloud computing internet of things machine learning information security multimedia systems and information technology benefit from this comprehensive overview of the latest advances in information technology the book can also benefit young investigators looking to start a new research program

## Artificial Intelligence and Sustainable Computing

## *2020-09-25*

this book presents high quality peer reviewed papers from the international conference on electronics biomedical engineering and health informatics icebehi 2022 held at surabaya indonesia virtually the contents are broadly divided into three parts a electronics b biomedical engineering and c health informatics the major focus is on emerging technologies and their applications in the domain of biomedical engineering it includes papers based on original theoretical practical and experimental simulations development applications measurements and testing featuring the latest advances in the field of biomedical engineering applications this book serves as a definitive reference resource for researchers professors and practitioners interested in exploring advanced techniques in the fields of electronics biomedical engineering and health informatics the applications and solutions discussed here provide excellent reference material for future product development

## Innovative Computing *2023-05-31*

this book is a collection of the best research papers presented at the 8th international conference on innovations in electronics and communication engineering at guru nanak institutions hyderabad india featuring contributions by researchers technocrats and experts the book covers various areas of communication engineering like signal processing vlsi design embedded systems wireless communications and electronics and communications in general as well as cutting edge technologies as such it is a valuable reference resource for young researchers

## *Proceeding of the 3rd International Conference on Electronics, Biomedical Engineering, and Health Informatics 2020-04-22*

this book constitutes the refereed post proceedings of the 9th ifip international conference on network and parallel computing npc 2012 held in gwangju korea in september 2012 the 38 papers presented were carefully reviewed and selected from 136 submissions the papers are organized in the following topical sections algorithms scheduling analysis and data mining network architecture and protocol design network security paralel distributed and virtualization techniques performance modeling prediction and tuning resource management ubiquitous communications and networks and web communication and cloud computing in addition a total of 37 papers selected from five satellite workshops atimcn atsme cloud grid datics and umas 2012 are included

## Innovations in Electronics and Communication

# Engineering *2012-12-09*

this book covers topics in e government discussing e government s present shortcomings while exploring a renewed understanding of e government s visions and responsiveness provided by publisher

# Network and Parallel Computing *2005-01-01*

this book presents advances in character recognition and it consists of 12 chapters that cover wide range of topics on different aspects of character recognition hopefully this book will serve as a reference source for academic research for professionals working in the character recognition field and for all interested in the subject

# *Practicing E-government 2012-11-07*

image processing and machine vision are fields of renewed interest in the commercial market people in industry managers and technical engineers are looking for new technologies to move into the market many of the most promising developments are taking place in the field of image processing and its applications the book offers a broad coverage of advances in a range of topics in image processing and machine vision

# Advances in Character Recognition *2012-12-06*

this book constitutes the refereed conference proceedings of the 8th international conference on image and graphics icig 2015 held in tianjin china in august 2015 the 164 revised full papers and 6 special issue papers were carefully reviewed and selected from 339 submissions the papers focus on various advances of theory techniques and algorithms in the fields of images and graphics

# Image Technology *2015-08-03*

this book constitutes the proceedings of the 13th pacific rim conference on multimedia held in singapore during december 4 6 2012 the 59 revised full papers presented were carefully reviewed and selected from 106 submissions for the main conference and are accompanied by 23 presentations of 4 special sessions the papers are organized in topical sections on multimedia content analysis image and video processing video coding and multimedia information processing image video processing and analysis video coding and multimedia system advanced image and video coding cross media learning with structural priors as well as efficient multimedia analysis and utilization

# Image and Graphics *2013-12-06*

the shelby cobra is one of the most legendary sports cars in automotive history only about 1 000 of the original cobras were ever built and many enthusiasts wanted to own and drive one of these ultimate sports cars yet could not afford to

# Advances in Multimedia Information Processing, PCM 2012 *2012*

the 3 volume set ccis 1252 until ccis 1254 constitutes the refereed proceedings of the 6th international conference on artificial intelligence and security icais 2020 which was held in hohhot china in july 2020 the conference was formerly called international conference on cloud computing and security with the acronym icccs the total of 178 full papers and 8 short papers presented in this 3 volume proceedings was carefully reviewed and selected from 1064 submissions the papers were organized in topical sections as follows part i artificial intelligence part ii artificial intelligence internet of things information security part iii information security big data and cloud computing information processing

# How to Build Cobra Kit Cars + Buying Used *2020-09-12*

the two volume set lnai 6703 and lnai 6704 constitutes the thoroughly refereed conference proceedings of the 24th international conference on industrial engineering and other applications of applied intelligent systems iea aie 2011 held in syracuse ny usa in june july 2011 the total of 92 papers selected for the proceedings were carefully reviewed and selected from 206 submissions the papers cover a wide number of topics including feature extraction discretization clustering classification diagnosis data refinement neural networks genetic algorithms learning classifier systems bayesian and probabilistic methods image processing robotics navigation optimization scheduling routing game theory and agents cognition emotion and beliefs

# Artificial Intelligence and Security *2011-06-28*

this proceedings volume brings together some 189 peer reviewed papers presented at the international conference on information technology and computer application engineering held 27 28 august 2013 in hong kong china specific topics under consideration include control robotics and automation information technology intelligent computing and

# Modern Approaches in Applied Intelligence *2013-10-11*

the advent of internet of things offers a scalable and seamless connection of physical objects including human beings and devices this along with artificial intelligence has moved transportation towards becoming intelligent transportation this book is a collection of eleven

articles that have served as examples of the success of internet of things and artificial intelligence deployment in transportation research topics include collision avoidance for surface ships indoor localization vehicle authentication traffic signal control path planning of unmanned ships driver drowsiness and stress detection vehicle density estimation maritime vessel flow forecast and vehicle license plate recognition high performance computing services have become more affordable in recent years which triggered the adoption of deep learning based approaches to increase the performance standards of artificial intelligence models nevertheless it has been pointed out by various researchers that traditional shallow learning based approaches usually have an advantage in applications with small datasets the book can provide information to government officials researchers and practitioners in each article the authors have summarized the limitations of existing works and offered valuable information on future research directions

## Information Technology and Computer Application Engineering *2021-04-14*

the main objective of the icitms 2012 is to provide a platform for researchers engineers academics and industrial professionals from all over the world to present their research results and development activities in information technology and management science this conference provides opportunities for the delegates to exchange new ideas and application experiences face to face to establish business or research relations and to find global partners for future collaboration

## Internet of Things and Artificial Intelligence in Transportation Revolution *2013-02-15*

the most comprehensive guide to the new license plates of every u s state and territory is revised to include all design changes and special cause plates issued by the departments of motor vehicles since 1998 color illustrations depict every plate

## 2012 International Conference on Information Technology and Management Science(ICITMS 2012) Proceedings *2000-02*

this book presents high quality research in the field of 3d imaging technology the fourth edition of international conference on 3d imaging technology 3ddit msp dl continues the good traditions already established by the first three editions of the conference to provide a wide scientific forum for researchers academia and practitioners to exchange newest ideas and recent achievements in all aspects of image processing and analysis together with their contemporary applications the conference proceedings are published in 2 volumes the main topics of the papers comprise famous trends as 3d image representation 3d image technology 3d images and

graphics and computing and 3d information technology in these proceedings special attention is paid at the 3d tensor image representation the 3d content generation technologies big data analysis and also deep learning artificial intelligence the 3d image analysis and video understanding the 3d virtual and augmented reality and many related areas the first volume contains papers in 3d image processing transforms and technologies the second volume is about computing and information technologies computer images and graphics and related applications the two volumes of the book cover a wide area of the aspects of the contemporary multidimensional imaging and the related future trends from data acquisition to real world applications based on various techniques and theoretical approaches

## The Official License Plate Book *2023-04-27*

this unique volume presents the scientific achievements significant discoveries and pioneering contributions of various academicians industrialist and research scholars the book is an essential source of reference and provides a comprehensive overview of the author s work in the field of mathematics statistics and computer science contents databased intrinsic weights of indicators of multi indicator systems and performance measures of multivariate rankings of systemic objects g p patil s w joshi statistical aspects of sudoku based experimental designs jyotirmoy sarkar bikas k sinha multi criteria decision making model for optimal selection of recovery facility location and collection routes for a sustainable reverse logistics network under fuzzy environment j d darbari v agarwal p c jha optimal allocation of sku and safety stock in supply chain system network k gandhi k goyal a jha j d darbari bi objective optimization model for fault tolerant embedded systems under build or buy strategy incorporating recovery block scheme r kaur s arora p c jha s madan study of a problem of annular cylinder under two temperature thermoelasticity with thermal relaxation parameters santwana mukhopadhyay roushan kumar multi criteria advertisement allocation model of multiple advertisers on a television network g kaur s aggarwal p c jha computation of maximum likelihood estimates in three parameter weibull for censored data sanjeeva kumar jha on statistical quality control techniques based on ranked set sampling md sarwar alamand arun kumar sinha rahbar ali approximate solution for nonlinear oscillator with cubic and quintic nonlinearities jitendra singh fuzzy dea cross efficiency model for ranking and performance evaluation using ideal and anti ideal decision making units seema gupta k n rajeshwari p c jha poverty analysis using scan statistic methods arun kumar sinha mukesh kumar joint performance evaluation data envelopment analysis problem an interactive approach riju chaudhary pankaj kumar garg p c jha stochastic modeling of a repairable system under different weather conditions s c malik estimation of risk surfaces and identification of district boundaries for tuberculosis in north eastern indian states sanjeeva kumar jha ningthoukhongjam vikimchandra singh optimal advertisement allocation for product promotion on television channels a kaul s aggarwal p c jha a gupta fitting linear regressions development and scope pranesh kumar j n singh the impact of family planning on fertility in jharkhand state dilip kumar spatial analysis of afp surveillance strategy for polio eradication in india pankaj srivastava arun kumar sinha on the stochastic modeling and analysis of bloom caster system of continuous casting shop area of an integrated steel plant s k singh a generalized exponential lindley distribution a mishra binod kumar sah on estimating the urban

## 3D Imaging—Multidimensional Signal Processing and Deep Learning *2016-06-09*

knowledge based intelligent techniques in character recognition presents research results on intelligent character recognition techniques reflecting the tremendous worldwide interest in the applications of knowledge based techniques in this challenging field this resource will interest anyone involved in computer science computer engineering applied mathematics or related fields it will also be of use to researchers application engineers and students who wish to develop successful character recognition systems such as those used in reading addresses in a postal routing system or processing bank checks features

## Recent Advances in Mathematics, Statistics and Computer Science *2020-12-17*

this book covers many hot topics including theoretical and practical research in many areas such as dynamic analysis machine learning supply chain management operations management environmental management uncertainty and health and hygiene it showcases advanced management concepts and innovative ideas the 16th international conference on management science and engineering management 2022 icmsem will be held in ankara turkey during august 3 6 2022 icmsem has always been committed to promoting innovation management science m s and engineering management em academic research and development the book provides researchers and practitioners in the field of management science and engineering management msem with the latest cutting edge thinking and research in the field it will appeal to readers interested in these fields especially those looking for new ideas and research directions

## Knowledge-Based Intelligent Techniques in Character Recognition *2022-07-13*

for those who think online learning can t be truly interactive patti shank and her colleagues clearly demonstrate in hundreds of examples that it can the real lesson in the online learning idea book is that technology doesn t build interactive learning creative thinking and good solid instructional design does using even a smidgen of the great ideas in this book will increase the learning effectiveness of any online program marc j rosenberg consultant and author of beyond e learning patti shank has collected great ideas about online learning and teaching from all over the globe if you are an online instructor or instructional designer looking for new ways to involve

and engage your learners you ll be inspired by this book terry morris associate professor william rainey harper colleges filled with techniques tools tips examples resources and dozens of great ideas this invaluable resource helps people who are looking to build online instructional materials or improve existing materials discover and implement what the best and brightest in industry and education are doing to make online learning more engaging and compelling increase your know how in the following areas look and feel how to increase ease of use graphics and multimedia how to make instructional graphics engaging and compelling activities how to make instruction itself engaging and compelling tools how to use a variety of online tools instructional design how to design better and faster
