an argument that america's addiction to crude oil has driven a foreign policy of intervention and exploitation hidden behind a facade of liberal internationalism the united states is addicted to crude oil in this book andrew price smith argues that this addiction has distorted the conduct of american foreign policy in profound and malign ways resulting in interventionism exploitation and other illiberal behaviors that hide behind a facade of liberal internationalism the symbiotic relationship between the state and the oil industry has produced deviations from rational foreign energy policy including interventions in iraq and elsewhere that have been at the very least counterproductive or at worst completely antithetical to national interests liberal internationalism casts the united states as a benign hegemon guaranteeing security to its allies during the cold war and helping to establish collaborative international institutions price smith argues for a reformulation of liberal internationalism which he terms shadow liberalism that takes into account the dark side of american foreign policy price smith contends that the free market in international oil is largely a myth rendered problematic by energy statism and the rise of national oil companies he illustrates the destabilizing effect of oil in the persian gulf and describes the united states grand energy strategy particularly in the persian gulf as illiberal at its core focused on the projection of power and on periodic bouts of violence washington's perennial oscillation between liberal phases of institution building and provision of public goods and illiberal bellicosity price smith argues represents the shadow liberalism that is at the core of us foreign policy

seeking to explain lebanon's behavior in the international arena during the 2006 war between hezbollah and israel this book offers a critique of both systemic and sub state factors in determining foreign policy decisions the making of lebanese foreign policy illustrates how systemic theories are limited in terms of explaining foreign policy decisions because they largely ignore the role of internal or sub state factors within lebanon foreign policy is split between the interests of different internal lebanese groups working in alliance with external actors the competing interests of these internal groups compromise the cohesion of the lebanese state and its capacity to promote its own interests above those of the different internal groups the example of lebanon during the 2006 war thus demonstrates the importance of these sub state factors in influencing state behaviour on an international level arguing that a more pluralistic approach is necessary in order to understand the conditions that affect the foreign policy making of the lebanese state this book fills an important gap in the literature on the topic and will be of interest to students of international relations middle east studies and islamic studies amongst others

how america used its technological leadership in the 1950s and the 1960s to foster european collaboration and curb nuclear proliferation with varying degrees of success in the 1950s and the 1960s u s administrations were determined to prevent western european countries from developing independent national nuclear weapons programs to do so the united states attempted to use its technological pre eminence as a tool of soft power to steer western european technological choices toward the peaceful uses of the atom and of space encouraging options that fostered collaboration promoted nonproliferation and defused challenges to u s technological superiority in sharing knowledge shaping europe john krige describes these efforts and the varying degrees of success they achieved krige explains that the pursuit of scientific and technological leadership galvanized by america s cold war competition with the soviet union was also used for techno political collaboration with major allies he examines a series of multinational arrangements involving shared technological platforms and aimed at

curbing nuclear proliferation and he describes the roles of the department of state the atomic energy commission and nasa to their dismay these agencies discovered that the use of technology as an instrument of soft power was seriously circumscribed by internal divisions within successive administrations and by external opposition from european countries it was successful krige argues only when technological leadership was embedded in a web of supportive harder power structures

a liberal state is a representative democracy constrained by the rule of law richard posner argues for a conception of the liberal state based on pragmatic theories of government he views the actions of elected officials as guided by interests rather than by reason and the decisions of judges by discretion rather than by rules he emphasizes the institutional and material rather than moral and deliberative factors in democratic decision making posner argues that democracy is best viewed as a competition for power by means of regular elections citizens should not be expected to play a significant role in making complex public policy regarding say taxes or missile defense the great advantage of democracy is not that it is the rule of the wise or the good but that it enables stability and orderly succession in government and limits the tendency of rulers to enrich or empower themselves to the disadvantage of the public posner s theory steers between political theorists concept of deliberative democracy on the left and economists public choice theory on the right it makes a significant contribution to the theory of democracy and to the theory of law as well by showing that the principles that inform schumpeterian democratic theory also inform the theory and practice of adjudication the book argues for law and democracy as twin halves of a pragmatic theory of american government
