Overcrowding: the Evil and Its Remedy. [With Three Plates.]. 1866

africa is the worlds poorest continent and it also has the worlds fastest growing population many observers have concluded that overpopulation is a root cause of africas poverty and that if the continent is ever to emerge from underdevelopment its rapid population growth will have to be slowed this book examines those assertions offering a wealth of statistical and other evidence to suggest that the link between african poverty and the size of africas population is by no means definitive the book also examines the important demographic trends such as rapid urbanization elevated mortality rates from the hiv aids epidemic and continued high fertility that will help shape african societies in the decades to come

Prison Suicides and Overcrowding 2006-02-22

in his 1912 pamphlet for the garden cities and town planning association nothing gained by overcrowding raymond unwin set out in detail the lessons learnt from his formidable practical experience in the design and layout of housing at new earswick from 1902 lechworth garden city from 1905 and most significantly at hampstead garden suburb where the artisans quarter 1907 9 was probably his masterwork of spatial design his interest in minimising the length of paved road to number of houses served and greening the ubiquitous mechanistic bye law suburb of the late 19th century provided motivation for defining a general theory of design which underpinned garden city principles nothing gained by overcrowding emerged as a principle which was to have a revolutionary impact on housing and urban form over the next 50 years unwin's theory had developed with his work but the origins can be found in two earlier and less well known publications on the building of houses in the garden city was written for the first international conference of the garden city association held in september 1901 the following year he published the fabian society tract cottage plans and common sense in which he took first principles shelter comfort privacy and drew out general criteria and specific standards housing had to be freed from the bye law strait jacket this would sweep away back yards back alleys and abominations too long screened by that wretched prefix back republished here for the first time together with an introductory essay by dr mervyn miller these three papers make clear the development of raymond unwin's theories of planning and

housing theories which were among the most influential of the 20th century

Overcrowding in the Household 1983

tackling prison overcrowding is a response to controversial proposals and sentencing set out in by lord patrick carter s review of prisons published in 2007 this book comprises nine chapters by leading academic experts who expose the proposals of the carter review to critical scrutiny they take the carter report to task for construing the problems too narrowly in terms of efficiency and economy and for failing to understand the wider issues of justice that need addressing they argue that the crisis of prison overcrowding is first and foremost a political problem arising from penal populism for which political solutions need to be found book jacket

Prison Overcrowding and Alternative Sentencing 1984

what are the major housing problems in contemporary britain and how effective are the policies designed to tackle them since the second edition of understanding housing policy was published in 2011 political and financial circumstances have transformed the answers to these questions in this fully updated third edition brian lund both explores how these policies developed and were implemented under the uk coalition government and looks ahead to the possible revisions under the new conservative government integrating the previous edition with new discussions of such subjects as the austerity agenda following the credit crunch the impact of the coalition government s housing policies and new policy ideas lund offers keen insight into the pervasive impact of need demand and supply as applied to the housing market and austerity policies

The Insurance Cyclopædia: Being a Dictionary of the Definition of Terms Used in Connexion with the Theory and Practice of Insurance in All Its Branches 1873

the problem of how where and on what terms to house the urban masses in an industrial society remains unresolved to this day in nineteenth century victorian england overcrowding was the most obvious characteristic of urban housing and despite constant agitation it remained widespread and

persistent in london and other great cities such as manchester glasgow and liverpool well into the twentieth century the eternal slum is the first full length examination of working class housing issues in a british town the city investigated not only provided the context for the development of a national policy but also in scale and variety of response stood in the vanguard of housing reform the failure of traditional methods of social amelioration in mid century the mounting storm of public protest the efforts of individual philanthropists and then the gradual formulation and application of new remedies constituted a major theme the need for municipal enterprise and state intervention meanwhile the concept of overcrowding never precisely defined in law but based on middle class notions of decency and privacy slowly gave way to the positive idea of adequate living space with comfort as much as health or morals the criterion not just dwellings but people were at issue there is little evidence in this period of the attitude of the worker himself to his housing wohl has extensively researched local archives and in particular drawn on the vestry reports which have been relatively neglected profusely illustrated with contemporary photographs and drawings this book is the definitive study of the housing reform movement in victorian and edwardian london and suggests what it was really like to live under such appalling conditions this important study will be of interest to social historians british historians urban planners and those interested in how social policies developed in previous eras

Investigation of the Program of the National Capital Housing Authority 1944

after doing the soundtrack for the 2010 scott pilgrim video game new york 8 bit geniuses anamanaguchi dove headfirst into the recording of their second album three years and many ideas plans and diversions later the 22 song endless fantasy finally saw the light of day in early 2013 on their own dream hax label all the time and effort put into recording the music paid off in the end and the album is something of an 8 bit masterpiece the band uses hacked nintendo systems game boys and live instruments to make mostly instrumental music that is blindingly bright and insanely fun they liken their music to teenaged nights listening to weezer and playing video games and they aren t far off it also sounds a lot like what one would imagine for an andrew w k video game soundtrack full of energy and possessing an almost heavy metal power when the massed cartridges and guitars form into a tightly wound ultra powerful ball of sound the songs are almost all as catchy as lice in a preschool with the game consoles playing super hooky melodies and the instruments crashing along behind apart from a couple quiet transitional pieces of near classical calm there s not a single moment that isn t joyous fun as the band pushes down on the happiness throttle and never lets up sometimes sounding like the house band at the giddiest emo pop minus the emo party ever other times like they were doing the theme music for a super nerdy podcast which isn t far off since they do that for the nerdist the occasional vocal interludes three in

all show that they aren't a one dimensional trick band japan air bounces frantically like puffy amiyumi at 8 prom night sounds almost like it could be a club hit as the beat pounds along and bianca raquel's pleading vocals come across like a cartoon katy perry as impressive as their hacking skills may be the group's true strength is that if you stripped away the bits and chips the songs underneath are strong enough to stand on their own the beauty is that you don't have to strip away anything because everything happens on endless fantasy all the time it's a one stop shop for all the goofy sounds frenetic energy and fast paced fun one music fan can handle anamanaguchi may not have invented chiptune or 8 bit music but they've pretty much perfected it tim sendra

Nothing Gained by Overcrowding 2013-09-23

emergency and trauma care is written for australian emergency care providers including paramedics emergency nurses pre hospital care providers nurse practitioners general practice nurses and allied health practitioners including occupational therapists and physiotherapists who are caring for trauma patients this book follows the patient journey from pre hospital to definitive care using a body systems approach each chapter provides comprehensive coverage of all aspects of adult and paediatric emergencies implications for clinical practice is supported by chapters of professional practice clinical skills research evidence based practice and legal ethical and cultural issues clinical assessment physiology management and rationale for intervention of common and not so common emergency presentations are provided with each chapter providing clear and relevant examples for both paramedics and nurses emergency and trauma care brings together a team of highly respected clinical practitioners and academics to deliver the most up to date text dealing with the practical procedures and evidence experienced by emergency and trauma care providers every day chapter 2 pre hospital care overview in australia and nz chapter 10 scene assessment management and rescue chapter 11 pre hospital clinical reasoning triage and communication pre hospital and emergency nursing considerations included in all relevant chapters chapter 5 cultural considerations in emergency care addresses cultural diversity beliefs and values and focuses on aboriginal and torres strait islander health and maori health chapter 19 resuscitation includes advanced life support airway management and incorporates the 2010 australian resuscitation council guidelines chapter 37 people with disabilities provides assessment examination and communication strategies for working with clients with intellectual and physical disabilities section 5 focuses on examination and communication strategies for working with unique population groups including the elderly disabled obstetric and paediatric patients section 6 details major trauma assessment and management blast injury and trauma to specific body regions essentials outline the main points addressed in each chapter practice tips assist with communication skills procedures and assessment case studies supported by questions throughout

summaries and key points review questions web links and references provide for consolidation and further research evolve resources include power point slides 30 additional case studies image bank web links three paramedic specific chapters including scene assessment and management

Tackling Prison Overcrowding 2008-10-22

this unique contemporary book is the successor edition of a ground breaking authoritative title devoted to the pathology and treatment of chiari malformations since an abundance of research and development has occurred after the publication of the chiari malformations this updated title meets the market need for a reference that reflects such advances in the field chiari malformations 2nd edition is divided into nine sections opening sections feature chapters on general aspects diagnostic features and clinical presentation these are followed by sections on differential diagnosis treatment and prognosis finally the book closes with an extensive discussion on research related pathologies and patient resources expertly written chapters are supplemented with numerous high quality illustrations and images to aid in visual learning an impressive nuanced successor chiari malformations 2nd edition is an invaluable resource for neuroscientists and clinicians at all levels as well as graduate students to specific research scientists studying this region

THE SANITARY RECORD 1884

this book provides an overview on the major neglected tropical diseases ntds occurring in sub saharan africa such as leishmaniasis buruli ulcer and schistosomiasis in well structured chapters epidemiology and biology of these parasitic diseases will be discussed in detail further diagnostics and therapeutic approaches as well as prevention strategies will be reviewed the book will be of interest to basic researchers and clinicians engaged in infectious disease tropical medicine and parasitology and a must have for scientists specialized in the characteristics of the sub saharan region
