from the author of the new york times bestseller the inevitable a sweeping vision oftechnology as a living force that can expand our individual potential this provocative book introduces a brand new view of technology it suggests that technology as a whole is not a jumble of wires and metal but a living evolving organism that has its own unconscious needs and tendencies kevin kelly looks out through the eyes of this global technological system to discover what it wants he uses vivid examples from the past to trace technology s long course and then follows a dozen trajectories of technology into the near future to

project where technology is headed this new theory of technology offers three practical lessons by listening to what technology wants we can better prepare ourselves and our children for the inevitable technologies to come by adopting the principles of pro action and engagement we can steer technologies into their best roles and by aligning ourselves with the long term imperatives of this near living system we can capture its full gifts written in intelligent and accessible language this is a fascinating innovative and optimistic look at how humanity and technology join to produce increasing opportunities in the world and how technology can give our lives greater meaning

What Technology Wants *2010-10-14*

out of control is a summary of what we know about self sustaining systems both living ones such as a tropical wetland or an artificial one such as a computer simulation of our planet the last chapter of the book the nine laws of god is a distillation of the nine common principles that all life like systems share

Out Of Control 1994

the digital revolution is over technology is changing toward growing communication rather than computation and the formation
of a network culture the major change has not been the growth of computers but the increased communications between these
computers a new order is being created in which connexity is everything this is having an effect on the economy and economic
practice
