drawing meaning from organisational data is challenging and theoretical frameworks can often illuminate information in fresh and useful ways this book is one of the first to demonstrate how organisational semiotics can be applied to business informatics and information systems semiotics a long established discipline of signs offers a rich philosophical and theoretical foundation for understanding information systems this book demonstrates how applying the framework of semiotics to an organisation can provide insights into its communication needs and as a result enhance the design of its information system the authors

demonstrate how organisations collect process represent store and consume information through a complex system which is aligned to support its objectives and enhance performance organisational semiotics for business informatics clearly introduces the basic principles and describes a set of methods and techniques rooted in organisational semiotics these have been applied to business applications demonstrated through real life case studies this ground breaking book has the potential to transform the theoretical understanding of information systems into the basis of a scientific discipline

collection of best selected research papers presented at international conference on cyber technologies and emerging sciences icctes 2021 organized by graphic era hill university bhimtal campus uttarakhand india during 17 18 december 2021 the book covers state of the art applications innovative methods and analyze the unexplored and unsolved challenges to establish the relative solutions to advance the existing applications and theories of cyber technologies and emerging sciences

1 this book is dedicated to advances in  
 of user authentication the book covers detailed description of the  
 authentication process as well as types of authentication  
 modalities along with their several features authentication  
 factors it discusses the use of these modalities in a time varying

operating environment including factors such as devices media and surrounding conditions like light noise etc the book is divided into several parts that cover descriptions of several biometric and non biometric authentication modalities single factor and multi factor authentication systems mainly adaptive negative authentication system etc adaptive strategy ensures the incorporation of the existing environmental conditions on the selection of authentication factors and provides significant diversity in the selection process the contents of this book will prove useful to practitioners researchers and students the book is suited to be used a text in advanced graduate courses on user authentication modalities it can also be used as a textbook for professional development and certification coursework for practicing engineers and computer scientists

a broad overview of emerging digital threats and computer crimes with an emphasis on cyberstalking hacktivism fraud and identity theft and attacks on critical infrastructure the book also analyzes the online underground economy and digital currencies and cybercrime on the dark web the book further explores how dark web crimes are conducted on the surface web in new mediums such as the internet of things iot and peer to peer file sharing systems as well as dark web forensics and

mitigating techniques this book starts with the fundamentals of the dark web along with explaining its threat landscape the book then introduces the tor browser which is used to access the dark web ecosystem the book continues to take a deep dive into cybersecurity criminal activities in the dark net and analyzes the malpractices used to secure your system furthermore the book digs deeper into the forensics of dark web web content analysis threat intelligence iot crypto market and cryptocurrencies this book is a comprehensive guide for those who want to understand the dark web quickly after reading inside the dark you ll understand the core concepts of the dark web the different theoretical and cross disciplinary approaches of the dark web and its evolution in the context of emerging crime threats the forms of cybercriminal activity through the dark web and the technological and social engineering methods used to undertake such crimes the behavior and role of offenders and victims in the dark web and analyze and assess the impact of cybercrime and the effectiveness of their mitigating techniques on the various domains how to mitigate cyberattacks happening through the dark web the dark web ecosystem with cutting edge areas like iot forensics and threat intelligence and so on the dark web related research and applications and up to date on the latest technologies and research findings in this area for all present and aspiring cybersecurity professionals who want to upgrade their skills by understanding the concepts of the dark web inside the dark is their one stop guide to understanding the

dark web and building a cybersecurity plan

concurrent engineering techniques and applications  
reviews advances in concurrent engineering techniques and applications an in depth treatment of the quantitative and economic aspects of concurrent engineering is presented with emphasis on techniques for measuring the performances of concurrent engineering and for comparing its economic effectiveness with that of traditional engineering open systems software standards in concurrent engineering are also discussed comprised of 12 chapters this volume begins with an introduction to techniques for measuring the performances of concurrent engineering and for comparing its economic effectiveness with that of traditional engineering the next chapter deals with open systems software standards and how to use open systems products effectively in concurrent engineering the discussion then turns to concurrent product design and manufacturing the essential issues involved in design decision support in concurrent simultaneous engineering design for manufacturing and assembly and concurrent engineering in electro optical systems and the use of visualization in concurrent engineering the use of multimedia presentation techniques and technology in the concurrent engineering process is also considered along with techniques in technical documentation
