2016-06-13

a history of argos to 500 b c was first published in 1977 minnesota archive editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original university of minnesota press editions specialists in ancient history will find some long held beliefs challenged by this study professor kelly reconstructs and discusses the history of the ancient greek city of argos which was located in the northeastern peloponnese from the bronze age through the archaic period he relies primarily on the archeological evidence and considers the literary evidence in the context of the physical remains in determining the broad pattern of historical development his findings and conclusions frequently contradict previous conceptions about the city and its role in history the study shows that argos existed in the shadow of mycenae in the bronze age but that throughout the dark age it was one of the most progressive centers in greece though not a wealthy or powerful community its contacts with other areas were limited and it had no influence beyond its own village and fields by the end of the dark age the city was growing and extending its influence throughout the argive plain but its external contacts remained limited contrary to theories of earlier historians professor kelly finds that argive foreign policy was not dominated by a rivalry with sparta and reports that the two states fought on numerous occasions the battle of hysiae included are erroneous the present study also indicates that the tyrant pheidon of argos fits more logically into the early decades of the sixth century b c e rather than the seventh century as had been thought the fragmentary nature of the evidence does not make possible an assessment of the long range impact of pheidon s policies on the history of argos but it is clear that his reign was followed by important political changes in the city

in recent years an interest in empire s has emerged in assyriology old testament hebrew bible studies and in other areas of the study of the ancient world collaborative research projects are devoted to questions of empire and imperialism and the prophets of israel and judah and the books named after them are explored as agents in the contexts of the empires of their times to some degree all of this may be seen as a revival of the intense interest which the works of oswald spengler arnold toynbee and karl wittfogel generated in the twentieth century in historical situations very different from our own age but then we too live in an age of transition characterized by insecurity and a lack of orientation and are driven to study the rise and fall of empires through the ages the present volume containing essays which are the fruits of the fifth meeting of the aberdeen prophecy network at the lichtenberg kolleg of the university of göttingen in october 2015 provides a distinctive perspective on prophecy in the context of empire it is inspired by the fact that the book of isaiah enables us to follow the vagaries of a particular prophetic tradition through five centuries under three different empires the essays in the present volume focus on the history of composition of the constituent parts of the book of isaiah as well as their correlations with the political and cultural histories of the empires under which they were produced the volume thus navigates some of the key points of the history of isaiah and the book named after him
