winner of the lionel gelber prize a new york times notable book of 2018 one of the economist s books of the year a new york times critics top book an intelligent explanation of the mechanisms that produced the crisis and the response to it one of the great strengths of tooze s book is to demonstrate the deeply intertwined nature of the european and american financial systems the new york times book review from the prizewinning economic historian and author of shutdown and the deluge an eye opening reinterpretation of the 2008 economic crisis and its ten year aftermath as a global event that directly led to the shockwaves being felt around the world today we live in a world where dramatic shifts in the domestic and global economy command the headlines from rollbacks in us banking regulations to tariffs that may ignite international trade wars but current events have deep roots and the key to navigating today s roiling policies lies in the events that started it all the 2008 economic crisis and its aftermath despite initial attempts to downplay the crisis as a local incident what happened on wall street beginning in 2008 was in fact a dramatic caesura of global significance that spiraled around the world from the financial markets of the uk and europe to the factories and dockyards of asia the middle east and latin america forcing a rearrangement of global governance with a historian s eye for detail connection and consequence adam tooze brings the story right up to today s negotiations actions and threats a much needed perspective on a global catastrophe and its long term consequences

exactly when matisse and picasso first met is open to debate their earliest encounter may have taken place during the matisse retrospective at galerie druet right before the 1906 salon des indépendants the latter marked the first time all the fauves exhibited together the centerpiece was matisse s monumental le bonheur de vivre leo stein bought the painting while the salon was still running regarding it as the most important work of our time this opinion undoubtedly annoyed picasso jealousy of the other man s success goaded him to greater innovations in his view the new art would have to match the sense of endless discovery that science and technology were offering the 1900 exposition universelle had already shown the latest marvels in engineering if painting wanted to keep the public s attention instead of merely reproducing what the eye saw it had to generate its own reality on the surface of the canvas a reality more vivid than and bearing only the most cursory resemblance to anything found in nature matisse was also a catalyst in that he was the one who introduced picasso to african sculptures max jacob recalls matisse took a black wooden statuette from a table and showed it to picasso it was the first piece of negro wooden art picasso held onto it all evening the next morning when i arrived at the studio the floor was strewn with sheets of paper and on each sheet was drawn the head of a woman all of them were more or less the same one eye an oversized nose attached to the mouth and a lock of hair on the shoulders cubism was thus born cited in janine warnod washboat days new york grossman publishers warnod 1972 p 128
