Manual of Science for Teachers

1990

dr stephen hawking was the most renowned scientist since einstein known both for his
groundbreaking work in physics and cosmology and for his mischievous sense of humor he
educated millions of readers about the origins of the universe and the nature of black holes
and inspired millions more by defying a terrifying early prognosis of als which originally
gave him only two years to live in later life he could communicate only by using a few facial
muscles but he continued to advance his field and serve as a revered voice on social and
humanitarian issues hawking not only unraveled some of the universe s greatest mysteries but
also believed science plays a critical role in fixing problems here on earth now he turns his

attention to the most urgent issues facing us will humanity survive should we colonize space does god exist these are just a few of the questions hawking addresses in this wide ranging passionately argued final book from one of the greatest minds in history featuring a foreword by eddie redmayne who won an oscar playing stephen hawking an introduction by nobel laureate kip thorne and an afterword from hawking s daughter lucy
