Review of the Fisheries Resources of the Red Sea and Gulf of Aden

1897

the ten countries which border the red sea and gulf of aden depend to varying degrees on the area for their fish supplies with some countries such as south yemen being totally dependent on the fish resources while to others such as israel and jordan the area is of minor importance catches of all fish species have been increasing slowly in recent years and in 1986 totalled 60 9 thousand tons from the red sea and 99 4 thousand tons from the gulf of aden after reviewing the resource assessment and survey work which has been carried out in the area it was concluded that further increases in landings could be achieved on a sustainable basis however such increases will come from the development of new fisheries and the expansion of the areas presently fished rather than from traditional fisheries which are in general fully exploited utilization and marketing problems particularly with small pelagic and mesopelagic species however need to be addressed for the full potential of the area to be realized

Grade Five Competition from the Leningrad Mathematical Olympiad

2008-11

this unique book presents mathematical competition problems primarily aimed at upper elementary school students but are challenging for students at any age these problems are drawn from the complete papers of the legendary leningrad mathematical olympiads that were presented to

the city's grade five students the period covered is between 1979 the earliest year for which relevant records could be retrieved and 1992 when the former soviet union was dissolved the respective chapters reflect the famous four step approach to problem solving developed by the great hungarian mathematics educator gyorgy pólya in chapter one the grade five competition problems from the leningrad mathematical olympiads from 1979 to 1992 are presented in chronological order in chapter two the 83 problems are loosely divided into 26 sets of three or four related problems and an example is provided for each one chapter three provides full solutions to all problems while chapter four offers generalizations of the problems this book can be used by any mathematically advanced student at the upper elementary school level teachers and organizers of outreach activities such as mathematical circles will also find this book useful but the primary value of the book lies in the problems themselves which were crafted by experts therefore anyone interested in problem solving will find this book a welcome addition to their library div
