**Mechanisms (IAMs)** 2019-11-04 populated by curanderos midwives bonesetters witches doctors nurses and the indigenous people they served this nuanced history demonstrates how cultural and political history misogyny racism and racialization influence public health in the first half of the twentieth century the governments of ecuador and guatemala sought to spread scientific medicine to their populaces working to prevent and treat malaria typhus and typhoid to boost infant and maternal well being and to improve overall health drawing on extensive original archival research david carey jr shows that highland indigenous populations in the two countries tended to embrace a syncretic approach to health combining traditional and new practices at times both governments encouraged or at least allowed such a synthesis even what they saw as nonscientific care was better than none yet both especially guatemala s also wrote off indigenous lifeways and practices with both explicit and implicit racism going so far as to criminalize native medical providers and to experiment on indigenous people without their consent both nations had authoritarian rule

guatemala s was outright dictatorial tending to treat both women and indigenous people as subjects to be controlled and policed ecuador on the other hand advanced a more pluralistic vision of national unity and had somewhat better outcomes as a result

**Between Two Worlds: The autos sacramentales of Sor Juana Inés de la Cruz** 2015-06-12 an acclaimed history of harlem s journey from urban crisis to urban renaissance with its gleaming shopping centers and refurbished row houses today s harlem bears little resemblance to the neighborhood of the midcentury urban crisis brian goldstein traces harlem s second renaissance to a surprising source the radical social movements of the 1960s that resisted city officials and fought to give harlemites control of their own destiny young harlem activists inspired by the civil rights movement envisioned a harlem built by and for its low income predominantly african american population in the succeeding decades however the community based organizations they founded came to pursue a very different goal a neighborhood with national retailers and increasingly affluent residents the roots of urban renaissance demonstrates that gentrification was not imposed on an unwitting community by unscrupulous developers or opportunistic outsiders rather it grew from the neighborhood s grassroots producing a legacy that benefited some longtime residents and threatened others
