international conference on genetic and evolutionary computing icgec 2016 the conference was co sponsored by springer fujian university of technology in china the university of computer studies in yangon university of miyazaki in japan national kaohsiung university of applied sciences in taiwan taiwan association for intelligence consortium and vsb technical university of ostrava czech republic the icgec 2016 which was held from november 7 to 9 2016 in fuzhou city china was intended as an international forum for researchers and professionals in all areas of genetic and evolutionary computing enterprise information systems eis integrate and support business processes across functional boundaries in a supply chain environment and have become increasingly popular over the last 15 years in recent years more and more enterprises world wide have adopted eis such as enterprise resource planning erp for running their businesses previously information systems such as cad cam mrpii and crm were widely used for partial functional integration within a business organization with global operation global supply chain and fierce competition in place there is a need for suitable eis such as erp e business or e commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency competency and competitiveness as a result there is a growing demand for researching eis to provide insights into challenges issues and solutions related to the design implementation and management of eis the papers in advances in enterprise information systems were selected from two premier international conferences the international forum of information systems frontiers xian international symposium ifisf june 29 30 2006 xian china and the ifip tc 8 9 international conference on research and practical issues of enterprise information systems confenis 2007 october 14 16 beijing china both events provided an excellent opportunity for eis academicians and practitioners in the world to gather and exchange ideas and present original research in their fields advances in enterprise information systems will be invaluable to scientists researchers and professionals in eis the two volume set lncs 4351 and lncs 4352 constitutes the refereed proceedings of the 13th international multimedia modeling conference mmm 2007 held in singapore in january 2007 based on rigorous reviewing the program committee selected 123 carefully revised full papers of the main technical sessions and 33 revised full papers of four special sessions from a total of 392 submissions for presentation in two volumes this book constitutes the refereed proceedings of the 4th european performance engineering workshop epew 2007 held in berlin germany september 27 28 2007 the 20 revised full papers presented were carefully reviewed and selected from 53 submissions the papers are organized in topical sections on markov chains process algebra wireless networks queueing theory and applications of queueing benchmarking and bounding grid and peer to peer systems this set of proceedings is based on the international conference on advances in building technology in hong kong on 4 6 december 2002 the two volumes of proceedings contain 9 invited keynote papers 72 papers delivered by 11 teams and 133 contributed papers from over 20 countries around the world the papers cover a wide spectrum of topics across the three technology sub themes of structures and construction environment and information technology the variety within these categories spans a width of topics and these proceedings provide readers with a good general overview of recent advances in building research trim is the acronym for the rational it modeltm this is a vendor neutral reference model that can be used to adopt it service management as a practice the model origins from the experience of more than fifteen years of it service management implementations and describes the foundations and mechanisms of it service management in such a way that it fits all sizes of organizations trim is a complete model for it service delivery based on the itil framework that has been simplified and scaled down to a level that all organizations can handle the model includes all the processes roles templates and procedures that you need to implement it service management as a working and efficient production of it services that provide value to your organization in addition to all the documents the

concept of the model is based on a holistic view with functions escalation paths and governance of the organization making it easy to get your entire organization including suppliers to work together the model is easy to understand and to implement it can be used as the basis for an iso iec 20000 certification this means that organizations that have decided to adopt itil as a source of best practice still can get benefit from using trim as a reference model without changing the aim for itil or iso iec20000 the difference is that itil is a framework of best practices while trim is a reference model designed to be a guidance in connecting roles and organizational parts to functions and processes so that it becomes clearer how everything is connected in the delivery of it services since the model is complete managers and consultants can use this book to get a basic understanding for the mechanisms in delivering it services and as criteria for gap analyses trim is community driven by its members whose experience will contribute to the future development of the model the members also consist of tool vendors course providers and consultants who have developed a wide range of trim specific tool configurations cloud services courses and workshops to make it easier for organizations to adopt the model discover current uses and future development of stress tests the most innovative regulatory tool to prevent and fight financial crises multiphysics modeling using comsol rapidly introduces the senior level undergraduate graduate or professional scientist or engineer to the art and science of computerized modeling for physical systems and devices it offers a step by step modeling methodology through examples that are linked to the fundamental laws of physics through a first principles analysis approach the text explores a breadth of multiphysics models in coordinate systems that range from 1d to 3d and introduces the readers to the numerical analysis modeling techniques employed in the comsol multiphysics software after readers have built and run the examples they will have a much firmer understanding of the concepts skills and benefits acquired from the use of computerized modeling techniques to solve their current technological problems and to explore new areas of application for their particular technological areas of interest this book constitutes the refereed proceedings of the 17th international conference on software process improvement and capability determination spice 2017 held in palma de mallorca spain in october 2017 the 34 full papers presented together with 4 short papers were carefully reviewed and selected from 65 submissions the papers are organized in the following topical sections spi in agile approaches spi in small settings spi and assessment spi and models spi and functional safety spi in various settings spi and gamification spi case studies strategic and knowledge issues in spi education issues in spi this is a book about the causes effects and coping strategies pertaining to schizoaffective disorder the story is an account of my struggle with this difficult mental illness the book is a description of a descent into madness the repercussions of that descent and the things i did to get my life back on track after my frightening and bizarre experience with schizoaffective disorder if you or someone you know is suffering from schizoaffective disorder schizophrenia bi polar disorder or severe depression then you should think about reading this book this book provides insight into the mind of a person affected by this most misunderstood illness and explains the steps necessary to make a full recovery from it readers of this book will come away with an understanding that there is much hope for people suffering from mental illness and that if the illness is taken seriously a meaningful and productive life can still be lived regardless since the first edition of the handbook of alternative assets was published significant events from the popping of the technology bubble and massive accounting scandals to recessions and bear markets have shifted the financial landscape these changes have provided author mark j p anson with an excellent opportunity to examine alternative assets during a different part of the economic cycle than previously observed in the first edition fully revised and updated to reflect today s financial realities the handbook of alternative assets second edition covers the five

major classes of alternative assets hedge funds commodity and managed futures private equity credit derivatives and corporate governance and outlines the strategies you can use to efficiently incorporate these assets into any portfolio throughout the book new chapters have been added different data sources accessed and new conclusions reached designed as both an introduction to the world of alternative assets and as a reference for the active investor the handbook of alternative assets second edition will help you match alternative assets with your various investment goals

building product models thoroughly presents the concepts technology and methods now used to work out what will become the building product model a new digital representation for architecture civil engineering and building construction organized into three sections history current tools and concepts and existing efforts and research issues this resource provides the field of building product modeling with a standard reference as well as a single comprehensive text for university courses until now all the efforts in building modeling have been reported in research journals and conference proceedings or been made available as draft standards on the internet building product models is the only book available on this vital field bringing together essential aspects of major efforts from the early 1970s to the present

Implementing an Inclusive Staffing Model for Today's Reference Services

2013-11-26

reference service remains a core function of modern libraries however how and where we provide assistance has evolved with changing technologies and the shifting habits and preferences of our users one way libraries can provide the on demand in person assistance while managing and developing new services and resources that will benefit current and future users is to reconsider how their reference points and services are staffed and adopt a staff based reference model the authors staff members at eastern michigan university chose to address this by implementing an inclusive reference model in which staff and student assistants are trained to answer certain levels of reference questions while working at the reference desk and at other service points the result was that librarians became more available to work with students who needed in depth assistance and users were able to get simple questions answered throughout the library similar training for all staff and student assistants who work in the library results in better service more accurate answers and improved interdepartmental communication in implementing an inclusive staffing model for today s reference services they describe step by step how to transition from the traditional librarian staffed reference desk to an inclusive reference model where non mls personnel are equipped and empowered to answer reference questions wherever these questions might be asked users ask questions of staff at all service points not just at the reference desk it is vitally important that those who work at circulation periodicals maps archives and other public service points be trained in how to answer certain reference questions when this is accomplished users who have simple questions will not have to make useless treks to the reference desk topics covered include recognizing that nearly all staff answer reference questions but few are trained to do so documenting the necessity for a change in reference model gaining buy in from all interested parties librarians non mls staff and administrators determining the optimal staffing level creating training materials and schedules monitoring the quality of reference service supervising staff evaluating the new model using multiple methods additionally each chapter contains practical resources such as checklists forms and sample materials and other usable features to support readers as they implement the inclusive reference model the book describes in detail the process of transforming traditional reference into a model that transcends departmental and job title boundaries is focused on the user and allows librarians to better utilize their time and talents and include non professional staff in their reference services
