The Intelligent Web 2014-11-12

we are at a dangerous moment in history something started to go wrong with the digital revolution an ever expanding array of new technologies is infiltrating our lives only now we are beginning to understand the far reaching consequences the excessive use of electronic devices threatens our physical emotional and spiritual health the warning signs are everywhere but although all of us see the same picture we interpret it in different ways the technophiles promised us greater leisure comfort and wealth but we got internet addiction obesity loneliness and anxieties powerful companies have more access to our private matters than ever before reality goes beyond orwell artificial intelligence is all around us without many people being aware of it sophisticated algorithms can predict our behavior with increasing accuracy some extreme futurists are fantasizing about a superintelligence smarter than humans machines are taking away jobs rewarding their owners richly the global economy is plagued by a persistent unemployment and growing income inequality millions of people live from paycheck to paycheck and can hardly keep their heads above water what will happen if their labor is no longer

needed the concentration of wealth and power in the hands of a small elite is eroding democracy the changes are not only technical in nature but also transform us humans genetic engineering and human enhancement therapies gamble with the basis of our existence are we ready to hand over our future to these improvers of mankind like priests at the altar the technodeterminists are pushing their agenda with evangelical fervor technology friendly literature can be found like sand on the beach it's not a surprise that those people who benefit most from technology celebrate it this book is different because it approaches the matter from a skeptic's point of view it throws crucial light on the question of who will be the winners of the transformations and who the losers it puts current issues in a historical perspective and presents some people behind today's influential technology

Cybervetting 2014-10-16

facebook's psychological experiments and edward snowden's nsa leaks epitomize a world of increasing information awareness in the social media ecosystem with over a billion monthly active users facebook as a nation is overtaking china as the largest country in the world president barack obama in his 2011 state of the union address called america the nation of edison and the wright brothers and of google and facebook u.s. chief information officer steven vanroekel opines that america has become a facebook nation that demands increased transparency and interactivity from the federal government ubiquitous social networks such as facebook google twitter and youtube are creating the technologies infrastructures and big data necessary for total information awareness a controversial surveillance program proposed by darpa after the 9/11 attacks nsa's secret prism program has reinvigorated wikileaks founder julian assange's accusation that facebook is the most appalling spying machine that has ever been invented facebook ceo mark zuckerberg once said we exist at the intersection of technology and social issues this book offers discourse and practical advice on the privacy issue in the age of big data business intelligence in social media e government and e activism as well as personal total information awareness this expanded edition also includes insights from wikipedian emily temple wood and facebook roi experts dennis yu and alex houg

Rise of the Nerds: How a Technocratic Elite Manipulates Your Life and Gambles With Your Future 2011-05-12

an eye opening account of how the hidden rise of personalization on the internet is controlling and limiting the information we consume in december 2009 google began customizing its search results for each user instead of giving you the most broadly popular result google now tries to predict what you are most likely to click on according to moveon.org board president eli pariser google's change in policy is symptomatic of the most

significant shift to take place on the in recent years the rise of personalization in this groundbreaking investigation of the new hidden pariser uncovers how this growing trend threatens to control how we consume and share information as a society and reveals what we can do about it though the phenomenon has gone largely undetected until now personalized filters are sweeping the creating individual universes of information for each of us facebook the primary news source for an increasing number of americans prioritizes the links it believes will appeal to you so that if you are a liberal you can expect to see only progressive links even an old media bastion like the washington post devotes the top of its home page to a news feed with the links your facebook friends are sharing behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers from your political leanings to the color you painted your living room to the hiking boots you just browsed on zappos in a personalized world we will increasingly be typed and fed only news that is pleasant familiar and confirms our beliefs and because these filters are invisible we won t know what is being hidden from us our past interests will determine what we are exposed to in the future leaving less room for the unexpected encounters that spark creativity innovation and the democratic exchange of ideas while we all worry that the internet is eroding privacy or shrinking our attention spans pariser uncovers a more pernicious and far reaching trend on the internet and shows how we can and must change course with vivid detail and remarkable scope the filter bubble reveals how personalization undermines the internet s original purpose as an open platform for the spread of ideas and could leave us all in an isolated echoing world

Facebook Nation 2014

is your ultimate goal to have more customers come to your website you can increase your website traffic by more than 1 000 percent through the expert execution of pay per click advertising

The Filter Bubble 2010

during the toughest recessions in years americans have become more resourceful than ever creating a record 558 000 new businesses per month a 14 year high in 2009 while these small businesses are the crutch of the economy making up more than 99 7 percent of employers it is hard to not only separate yourself from the pack but also to just stay afloat to achieve success many businesses have taken their ingenuity online to market themselves digitally in the new 2 0 world the interactive and information sharing digital age you can t conquer the business world without first letting people know you exist spreading the knowledge about your business is where social media comes in about 2 3 of comscore s u s top 100 sites interact with customers through facebook which has over 400 million users businesses can also use short tweets to reach the over 180 million unique monthly visitors to twitter every month this book shows you how to take advantage of these latest technologies to market your business and many of

the tools require little or no money to implement you no longer have to compete with the resources brand recognition and money of big corporations to reach your audience of which 55.6 million adults 1.3 of the population use social media with peter vanrydam chief marketing officer and cofounder of 352 media group as your guide you will understand how social networks have fundamentally altered how the internet is used as a marketing tool you will discover how to draw visitors to your site with search engine optimisation seo and how to use webinars blogs and podcasts to establish yourself as a leader in your industry whether you are one of those many new start ups or a small business owner looking to take the next step marketing in a 2.0 world is here to show you the path to reach the business pinnacle by spreading your message to more people faster and more efficiently than ever

Ultimate Guide to Search Engine Marketing 2015-09-09

information architecture ia is far more challenging and necessary than ever with the glut of information available today anything your organization wants to share should be easy to find navigate and understand but the experience you provide has to be familiar and coherent across multiple interaction channels from the to smartphones smartwatches and beyond to guide you through this broad ecosystem this popular guide now in its fourth edition provides essential concepts methods and techniques for digital design that have withstood the test of time ux designers product managers developers and anyone involved in digital design will learn how to create semantic structures that will help people engage with your message this book includes an overview of ia and the problems it solves for creating effective digital products and services a deep dive into ia components including organization labeling navigation search and metadata processes and methods that take you from research to strategy design and ia implementation

Marketing in a Web 2.0 World 2011-09-08

this definitive work on the perils and promise of the social media revolution collects writings by today's best thinkers and cultural commentators with an all new introduction by bauerlein twitter facebook e publishing blogs distance learning and other social media raise some of the most divisive cultural questions of our time some see the technological breakthroughs we live with as hopeful and democratic new steps in education information gathering and human progress but others are deeply concerned by the eroding of civility online declining reading habits withering attention spans and the treacherous effects of 24/7 peer pressure on our young with the dumbest generation mark bauerlein emerged as the foremost voice against the development of an overwhelming digital social culture but the digital divide doesn't take sides framing the discussion so that leading voices from across the spectrum supporters and detractors alike have the opportunity to weigh in on the profound issues raised by the new

media from questions of reading skills and attention span to cyber bullying and the digital playground. Bauerlein's new book takes the debate to a higher ground. The book includes essays by Steven Johnson, Nicholas Carr, Don Tapscott, Douglas Rushkoff, Maggie Jackson, Clay Shirky, Todd Gitlin, and many more. Though these pieces have been previously published, the organization of *The Digital Divide* gives them freshness and new relevancy, making them part of a single document readers can use to truly get a handle on online privacy, the perils of a plugged-in childhood, and other technology-related hot topics. Rather than dividing the book into pro and con sections, the essays are arranged by subject: the brain, the senses, learning in and out of the classroom, social and personal life, the millennials, the fate of culture, and the human and political impact. Bauerlein incorporates a short headnote and a capsule bio about each contributor, as well as relevant contextual information about the source of the selection. Bauerlein also provides a new introduction that traces the development of the debate from the initial digital age zeal to a wave of skepticism and to a third stage of reflection that wavers between criticism and endorsement. Enthusiasms for the digital age have cooled with the passage of time, and the piling up of real-life examples that prove the risks of an online-focused culture. However, there is still much debate, comprising thousands of commentaries and hundreds of books about how these technologies are rewriting our futures. Now, with this timely and definitive volume, readers can finally cut through the clamor, read the very best writings from each side of the digital divide, and make more informed decisions about the presence and place of technology in their lives.

Information Architecture 2016-06-23

Morality and Moral Controversies provides students with the tools to understand the philosophical ideas that are shaping our world today. This comprehensive anthology includes classic and contemporary readings in moral theory and the most current applied ethics debates, emphasizing international concerns through analyzing these readings, such as Supreme Court decisions. Students will grasp the scope of various philosophical discussions. Supreme Court justices must have morality, and *Morality and Moral Controversies* challenges readers to critically assess leading controversies in moral, social, and political philosophy. Upon completing this book, readers will be able to understand philosophical ideas that are shaping our world today, confront conflicts faced when given the choice of morality, apply various philosophical ideas to politics, religion, economics, relationships, and medicine, and discuss basic philosophical arguments.

The Digital Divide 2019-11-26

Thinking clearly and deeply about the theology of God's intervention in the world, the claim that God acts in the world is surely a basic theological claim, but it's one that has been understood in a wide variety of ways in the Christian theological tradition. In some accounts, God appears as the largest, first, and most powerful agent in

others god is portrayed as the transcendent ground of all finite agency while never acting on the same plane as other agents divine action and providence represents the proceedings of the seventh annual los angeles theology conference which invited theologians across christian traditions to contribute their constructive accounts and proposals to the theology of god s relation to and intervention in the world the eleven diverse essays in this collection include discussions on the particularity and detail of divine action recovering the identity of the god of providence the theological meaning of the course of history the nature of omnipotence each of the essays collected in this volume engage with scripture as well as with others in the field theologians both past and present from different confessions in order to provide constructive resources for contemporary systematic theology and to forge a theology for the future

Morality and Moral Controversies 2009-10-06

in his introduction to this beautifully curated collection of essays steven johnson heralds the arrival of a new generation of technology writing whether it is nicholas carr worrying that google is making us stupid dana goodyear chronicling the rise of the cellphone novel andrew sullivan explaining the rewards of blogging dalton conley lamenting the sprawling nature of work in the information age or clay shirky marveling at the cognitive surplus unleashed by the decline of the tv sitcom this new generation does not waste time speculating about the future its attitude seems to be who needs the future the present is plenty interesting on its own packed with sparkling essays culled from print and online publications the best technology writing 2009 announces a fresh brand of technology journalism deeply immersed in the fascinating complexity of digital life

Divine Action and Providence 2009-05-04

in many ways google is the prototype of a successful twenty first century company it uses technology in new ways to make information universally accessible promotes a corporate culture that encourages creativity among its employees and takes its role as a corporate citizen very seriously investing in green initiatives and developing the largest corporate foundation in the united states following in the footsteps of warren buffett speaks and jack welch speaks which contain a conversational style that successfully captures the essence of these business leaders google speaks reveals the amazing story behind one of the most important new companies of our time by exploring the people and philosophies that have made it a global phenomenon in less than fifteen years written by bestselling author janet lowe this book offers an engaging look at how google s founders sergey brin and larry page transformed their vision of a better internet search engine into a business colossus with about 16 billion in annual revenue lowe discusses the values that drive brin and page for example how they both live fairly modest lives despite each having a net worth in excess of 15.9 billion and details how they have created a culture that

fosters fun while at the same time keeping google at the forefront of technology through relentless r d investments and imaginative partnerships with organizations such as nasa in addition to examining google s breakthrough business strategies and new business models which have transformed online advertising and changed the way we look at corporate responsibility and employee relations lowe explains why google may be a harbinger of where corporate america is headed she also addresses controversies surrounding google such as copyright infringement antitrust concerns and personal privacy and poses the question almost every successful company must face as google grows can it hold on to its entrepreneurial spirit as well as its informal motto don t do evil what started out as a university research project conducted by sergey brin and larry page has ended up revolutionizing the world we live in google speaks puts these incredible entrepreneurs in perspective and shows you how their drive and determination have allowed them to create one of today s most powerful companies
