Plant Life of the Dolomites 2015-12-02 this volume provides an in
depth analysis of over 100 plant communities of the dolomite
vegetation the data is based on the phytosociological relevés which
have been collected by the authors in nearly 2000 surveys the key part
consists of approx 130 association tables presenting plant
sociological data for the respective plant communities thus this
volume perfectly complements the successful main volume plant life of
the dolomites vegetation structure and ecology which features
summarized synoptic association tables of the twelve habitats in
addition geo referenced locations of relevés and detailed ecological
measures are provided a further part describes the individual
components of the fascinating dolomitic landscape heritage of all
humanity and presents tables of vegetation complexes which summarize
the more than 400 surveys carried out in the dolomites the structure
of this supplementary volume corresponds to that of the main volume
with a key part consisting of twelve chapters each describing a
specific habitat and a total of 106 associations several topics
covered in the main volume such as the exploration of the flora
ecological factors and syntaxonomy are discussed further here
