**Scientific American** 1984 on a small assembly line in neckarsulm germany no more than twenty exotic audi r8 sports cars are built daily the entire process is overseen by small teams of specialists that oversee every step of production every single part is inspected carefully and nothing goes unchecked it is a level of hand built quality one might expect to find in a ferrari enzo or the vector w8a of the 1980s but almost unheard of from a manufacturer the size of audi ag the turbo quattro coupe or urquattro of the early 1980s was largely assembled by hand much in the same way but audi has refined the process for the r8 and has introduced one of the most spectacular sports cars ever i hope this book will provide a better insight into the design development and production of this magnificent automobile
