Core JSTL 2003 bodh gaya in the north indian state of bihar has long been recognized as the place where the buddha achieved enlightenment this book brings together the recent work of twelve scholars from a variety of disciplines anthropology art history history and religion to highlight their various findings and perspectives on different facets of bodh gaya s past and present through an engaging and critical overview of the place of buddha s enlightenment the book discusses the dynamic and contested nature of this site and looks at the tensions with the on going efforts to define the place according to particular histories or identities it addresses many aspects of bodh gaya from speculation about why the buddha chose to sit beneath a tree in bodh gaya to the contemporary struggles over tourism development education and non government organizations to bring to the foreground the site s longevity reinvention and current complexity as a unesco world heritage monument the book is a useful contribution for students and scholars of buddhism and south asian studies

Cross-disciplinary Perspectives on a Contested Buddhist Site 2012-06-25 this multilayered historical ethnography of bodh gaya the place of buddha s enlightenment in the north indian state of bihar explores the spatial politics surrounding the transformation of the mahabodhi temple complex into a unesco world heritage site in 2002 the rapid change from a small town based on an agricultural economy to an international destination that attracts hundreds of thousands of buddhist pilgrims and visitors each year has given rise to a series of conflicts that foreground the politics of space and meaning among bodh gaya s diverse constituencies david geary examines the modern revival of buddhism in india the colonial and postcolonial dynamics surrounding archaeological heritage and sacred space and the role of tourism and urban development in india

Catalog of Copyright Entries. Third Series 1974 in this volume david geary provides a comprehensive theory that brings children s education into the 21st century and provides directions for the development of a new discipline evolutionary educational psychology geary presents the case that a scientifically grounded approach to children s schooling and to a lesser degree their later occupational interests can be informed by recent advances in the application of evolutionary theory to the understanding of the human brain mind and its development he develops a taxonomy of evolved cognitive abilities and describes how from an evolutionary perspective these abilities are modified and refined during childhood from there he lays the framework for understanding the relation between evolved abilities such as language and the non evolved competencies that are built from them with schooling such as reading geary describes the mechanisms such as working memory that enable humans to transform evolved cognitive abilities into culturally important school taught competencies these are integrated with discussion of human intellectual history and cultural evolution and the sources of children s motivation to learn inside and outside of the classroom in all this may well be the most revolutionary theory of children s schooling since rousseau

The Rebirth of Bodh Gaya 2017-11-21 this element builds on the mainstream theory of attachment and contemporary understanding of the environment of evolutionary adaptedness to address the origin and nature of infant maternal bond formation sections 2 and 3 propose that attachment behaviors for protesting against separation and usurpation were compelled by infants needs for close and undivided access to a source of breast milk usually mothers for three years to counter threats of undernutrition and disease that were the leading causes of infant mortality since these attachment behaviors would not have been presented unless they were compelled by maternal resistance their arising is also attributed to parent offspring conflict section 4 theorizes that the affectional nature of infant maternal attachment originated within contexts of breastfeeding uniform and universal features of exclusive versus complementary breastfeeding that could entail diverse experiences among multiple caregivers may have shaped adaptations so that love relationships with mothers differ from those with nonmaternal caregivers

Educating the Evolved Mind 2007-06-01 the sixth edition of the topically organized children s thinking presents a current comprehensive and dynamic examination of cognitive development the book covers individual children and their developmental journeys while also following the general paths of overall cognitive development in children this unique and effective approach gives readers a holistic view of children s cognitive development acknowledging that while no two children are exactly alike they tend to follow similar developmental patterns supported by the latest research studies and data the sixth edition provides valuable insights for readers to better understand and work with children

The National Union Catalogs, 1963- 1964 as evidence of our global survival crisis continues to mount the expression too little too late comes to mind we all live in an interdependent world which has an increasingly shared fate we are participants in an emerging global superorganism that is dependent on close cooperation indeed positive synergy cooperative effects has been the key to our evolutionary success as a species however our ultimate fate is now in jeopardy going forward we must either create a more effective global society with collective self governance or our species will very likely be convulsed by mass starvation waves of desperate migrants and lethal social conflict the greatest threat we may face is each other and a regression into tribalism and violent conflict this element has a more hopeful prescription for a new global social contract it is based on the many examples of superorganisms socially organized species in the natural world and in evolution

A Corpus of Formal British English Speech 2014-07-22 over the past few decades evolutionary psychology has shed light on such features of the human experience as mating love religion aggression warfare physical health mental health and more the field of positive psychology has progressed along a parallel trajectory using behavioral science techniques to help our understanding of human thriving at the individual and community levels positive evolutionary psychology is dedicated to the integration of positive and evolutionary psychology with an eye toward using darwinian inspired concepts to help advance our understanding of human thriving this element describes the basic ideas of this new approach to behavioral science as well as examples that dip into various aspects of the human experience including such topics as health education friendships love and more all with an eye toward providing a roadmap for the application of darwinian principles to better understanding human thriving and the good life

Performing Aotearoa 2007 breastfeeding is championed as an effective way to improve global health associated with improved health outcomes for children and mothers various public health strategies to promote breastfeeding have been developed and implemented for over four decades yet progress has stagnated and exclusive breastfeeding rates remain low globally from an evolutionary anthropological perspective low breastfeeding rates seem like an evolutionary puzzle breastfeeding is a behaviour which confers survival and fitness advantage to children and mothers yet so many mothers do not breastfeed exclusively or at all is this a globally maladaptive behaviour framing breastfeeding as a maternal investment behaviour an evolutionary perspective directs us to consider the fitness costs of breastfeeding together with the role of social learning and cultural norms indeed an evolutionary anthropological perspective provides insights to why some breastfeeding promotion strategies may have been ineffective while pointing to potentially promising policies and practices which have been overlooked

Annual Report 2023-07-31 gossiping and its reputation effects are viewed as the most powerful mechanism to sustain cooperation without the intervention of formal authorities being virtually costless gossiping is highly effective in monitoring and sanctioning norm violators rational individuals cooperate in order to avoid negative reputations but this narrative is incomplete and often leads to wrong predictions goal framing theory a cognitive behavioral approach anchored in evolutionary research provides a better explanatory framework three overarching goal frames hedonic gain and normative constantly compete for being in our cognitive foreground this element argues that for gossip to have reputation effects a salient normative goal frame is required but since the hedonic mindset usually trumps gain and normative concerns most gossip will be driven by hedonic motives and therefore not have strong reputation effects propositions on cultural structural dispositional situational and technological gossip antecedents and consequences are developed and illustrated with evidence from the empirical record
