Science is more than test tubes and lab coats. Einstein's bad hair day is actually a way of thinking used to systematically decode the natural world. Here are the four canons of science brought to you by philosophers, the original scientists who began solving the questions of reality long before we rolled up our sleeves and got handsy.

2021-2025: This booklet contains 125 questions, big and small, culled from many hundreds received from editors at Science Preeminent, researchers in many fields, our partners at Shanghai Jiao Tong University, and many young inquisitive minds received through an online survey.

Ask an expert: Answers to your science questions. The Ask an Expert Forum is intended to be a place where students can go to find answers to science questions that they have been unable to find using other resources. If you have specific questions about your science fair project or science fair, our team of volunteer scientists can help.

2024-2026: Science News features daily news articles, feature stories, reviews, and more in all disciplines of science, as well as Science News Magazine archives back to 1924.

2023-2024: But for all their promise, GLP-1 agonists have raised more questions than they have answered. A hallmark of a true breakthrough, the first is about their cost and availability. These issues are likely to be worked out over the next few years, but for the moment, access to these drugs is limited.

2024-2026: A metabolic dependency of EBV can be targeted to hinder B cell transformation. Science, 16 May 2024. An AAV capsid reprogrammed to bind human transferrin receptor mediates brain-wide gene delivery. Science, 16 May 2024. AlphaFold2 structures guide prospective ligand discovery. More.
