this new edition of shore fishes of hawai i updates our knowledge of hawaiian fishes and has been expanded to include 372 species all are illustrated by the author s 475 superb photographs the most important characteristics to identify a fish are given as well as the size attained and its distribution each species account begins with the american common name followed by the hawaiian name when known and the scientific name because it is necessary to use some scientific terminology when giving the principal diagnostic characteristics of families or species of fishes and what they eat a handy glossary appears at the back of the book before the index

#### Shore Fishes of Hawaii 2006

diving to the bottom of your eyes is the love story between two young men it starts in madrid in the early seventies during the last years of the very strict and conservative franco regime and involves characters directly linked to the social and political establishment it has been a short pure explosive and at the same time

dramatic relation that left enduring memories and scars in the surviving partner it is written forty years later this means in the present time by the surviving partner in an utterly poetic and moving style as it is said in the text durable relations sometimes do not take a long time to consolidate they may well be quickly built in very robust terms and also quickly destroyed often all done by the same actors in absolute voluntary terms human nature is surely volatile or even very treacherous
