Understanding History Teaching 2003-09-01 the history of the united states is the history of people who migrated to america from all parts of the world as a result american society is composed of many unique cultures and races unfortunately the uniqueness of these cultures is one of the underlying causes of tension and conflict in america resulting in racism religious intolerance and class warfare in spite of this the multi racial nature of american society is an integral part of americas strength as a nation thousands of immigrants from unique cultures who speak totally different languages came to find a better life in america but they were never accepted by the dominate white christians the immigrants had to fight for the right to be in america racism race riots and genocide are integral parts of the lives of immigrants the racial complexion of america is changing in the twenty first century in a short time the non white population will be the majority social economic and political changes are already taking place unfortunately the dominate power holders and white middle classes have not adjusted to these changes the unique system of government and economics developed over the years has reached a point that many believe will end the american empire there is a certain bias in this presentation and criticism is aimed at the

extreme beliefs and actions of a large segment of americans particularly white christians they have been the dominant political social and economic forces in the country any assessment of the american system becomes a criticism of that segment of americans their beliefs and actions represent the dark side of america
