

## **The Quarterly Journal of Pure and Applied Mathematics**

1877

this book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century we are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places part i is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics part ii of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics these are grouped by type of material publication dates range from the 1800 s onwards hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources amazingly a majority of listed electronic resources are free

## **Canadian Journal of Mathematics**

1979-04

designed to help teachers use journals to integrate authentic assessment with the instruction of mathematics it provides a structure to encourage students to write regularly in mathematics

## ***Guide to Information Sources in Mathematics and Statistics***

2004-09-30

the subject of torsion free modules over an arbitrary integral domain arises naturally as a generalization of torsion free abelian groups in this volume eben matlis brings together his research on torsion free modules that has appeared in a number of mathematical journals professor matlis has reworked many of the proofs so that only an elementary knowledge of homological algebra and commutative ring theory is necessary for an understanding of the theory the first eight chapters of the book are a general introduction to the theory of torsion free modules this part of the book is suitable for a self contained basic course on the subject more specialized problems of finding all integrally closed  $d$  rings are examined in the last seven chapters where material covered in the first eight chapters is applied an integral domain is said to be a  $d$  ring if every torsion free module of finite rank decomposes into a direct sum of modules of rank 1 after much investigation professor matlis found that an integrally closed domain is a  $d$  ring if and only if it is the intersection of at most two maximal valuation rings

## **The Journal of the Indian Mathematical Society**

1988

the third in the series of yearbooks by the association of mathematics educators in singapore assessment in the mathematics classroom is unique as it addresses a focused theme on mathematics education the objective is to encourage teachers and researchers to include assessment of non cognitive attributes and to use techniques in addition to paper and pencil tests that focus on typical problems several renowned international researchers in the field have published their work in the book the thirteen chapters of the book illustrate evidence based practices that school teachers and researchers can experiment in their lessons to bring about meaningful learning outcomes a recurring theme in most chapters is the widely circulated notions of formative assessment and assessment for learning the book makes a significant contribution towards assessment in mathematics it is a good resource for research students and a must read mathematics educators contents introduction assessment matters khoo yoong wong berinderjeet kaur using a multi dimensional approach to understanding to assess students mathematical knowledge denisse r thompson berinderjeet kaur assessing problem solving in the mathematics curriculum a new approach tin lam toh khiok seng quek yew hoong leong jaguthsing dindyal eng guan tay assessing conceptual understanding in mathematics with concept mapping haiyue jin khoo yoong wong using journal writing to empower learning berinderjeet kaur chun ming eric chan implementing alternative assessment in the lower primary mathematics classroom kai kow joseph yeo open ended tasks and assessment the nettle or the rose david j clarke using ict to improve assessment marja van den heuvel panhuizen angeliki kolovou marjolijn peltenburg the assessment for of and as learning in mathematics the application of sloa mo ching magdalena mok building bridges between large scale external assessment and mathematics classrooms a japanese perspective yoshinori shimizu errors in mathematics assessment items written by pre service teachers jaguthsing dindyal affective assessment in the mathematics classroom a quick start eng guan tay khiok seng quek tin lam toh implementing self assessment to develop reflective teaching and learning in mathematics lianghuo fan readership mathematics educators research students and mathematics teachers keywords mathematics assessment of learning assessment as learning assessment for learning cognitive domain affective domain alternative assessment
