nazi occultism provides a serious scholarly study of a topic that is often marred by sensationalism and misinformation the morning of the magicians by pauwels and bergier 1960 gave rise to the idea that a secret society with wide powers the thule society was the hidden and ignored centre of nazism the influence of this very real small group is however only a fantasy a myth the author a historian specializing in neo nazism looks back on this speculative construction its origins its ideological tinkering and the practices which have succeeded in forming a sort of radical and sulphurous counterculture which has created a fascination with esotericism and nazism and the ss to better understand it he also paints a portrait of some of the authors who contributed to this extremist subculture such as the italian esotericist julius evola the argentine anthropologist jacques marie de mahieu chilean neo nazi miguel serrano and the writer jean paul bourre this book will appeal to scholars researchers and activists as well as general readers with an interest in the history of nazism and the occult

in this window onto the roots and evolution of international neo nazism nicholas goodrick clarke reveals the powerful impact of one of fascism s most creative minds savitri devi s influence on neo nazism and other hybrid strains of mystical fascism has been continuous since the mid 1960s a frenchwoman of greek english birth devi became an admirer of german national socialism in the late 1920s deeply impressed by its racial heritage and caste system she emigrated to india where she developed her racial ideology in the early 1930s her works have been reissued and distributed through various neo nazi networks and she has been lionized as a foremother of nazi ideology her appeal to neo nazi sects lies in the very eccentricity of her thought combining aryan supremacism and anti semitism with hinduism social darwinism animal rights and a fundamentally biocentric view of life and has resulted in curious yet potent alliances in radical ideology as one of the earliest holocaust deniers and the first to suggest that adolf hitler was an avatar a god come to earth in human form to restore the world to a golden age devi became a fixture in the shadowy neo nazi world in hitler s priestess nicholas goodrick clarke examines how someone with so little tangible connection to nazi germany became such a powerful advocate of hitler s misanthropy hitler s priestess illuminates the life of a woman who achieved the status of a prophetess for her penchant for redirecting authentic religious energies in the service of regenerate fascism

este libro aborda un tema hasta cierto punto olvidado por la criminología actual el de los delitos colectivos o más exactamente el de las multitudes criminales olvido curioso pues fue una de las grandes preocupaciones de los heraldos de la criminología científica desde scipio sighele a gabriel tarde así el potencial deletéreo y destructivo de las muchedumbres enfervorizadas constituyó en europa una preocupación política de primera magnitud en el siglo xix sobre todo desde la desfavorable semblanza de hyppolite taine sobre la revolución francesa hasta la célebre presentación de la psicología de las masas por gustave le bon la criminología por ello heredó el gran miedo burgués ante el ascenso de las multitudes de hecho tendió a observarlas como si estuviesen fatalmente comprometidas con el desorden social generalizado y el delito sobre la construcción de esta perspectiva que vincula al discurso criminológico con la naciente psicología social se extiende ampliamente la presente obra

the term biopolitics had long been in use when it was brought into vogue in academia by michel foucault to designate the liberal administration of health hygiene food sexuality the birth rate etc through various flexible and continuous measures such as insurance pressures proposed hygiene rules incentive policies with a view to controlling individuals and populations the french sociologist jacques de mahieu 1915 1990 who used it as early as in the 1950s gives it a quite different meaning in the course of our research we shall see that the ethnic problem when it has been posed has been too narrowly defined or to be more precise that alongside the problem of races as such there is a question of the same order which is already hinted at in everyday language we say of a human being as we do of a horse that it has breeding this does not mean that he belongs to a particular ethnic group but rather that he is distinguished by certain characters within his ethnic group once we have established that these characters are hereditary we will have to admit willingly or not that within racial groups there are categories of the same biopsychic nature as ethnic communities in the true sense of the word and once we have seen that these categories are of social importance we will have to supplement ethnopolitics with genopolitics and consider all hereditary processes insofar as they play a part in the life of human communities this is what biopolitics is all about as a preamble to the presentation of genopolitics and ethnopolitics a number of questions which are also the subject of julius evola s elements of racial education are addressed the fact of race the zoological concept of race the fallacy of the pure race heredity the double effect of crossbreeding mutation heredity of acquired traits hereditary memory the action of the environment the double effect of the environment limits to environmental action race creation ethnopolitics is about race classification the melting pot the inequality of races race and community polyethnic communities racial specialisation in an organic society slavery segregation race dialectics in a polyethnic community dialectic of races in the world genopolitics studies biopsychology and social order biopsychic social specialisation the family lineage the social stratum the origins of social stratification hereditary differentiation and functional specialisation natural selection economic differentiation backward selection aristocracy and elites etc population volume is about the demographic factor population density natural demographic balance demographic composition active and passive population demographic pace demographic pressure living space etc finally the study of migrations involves examining emigration and immigration their causes and consequences biotypology of the emigrant the process of assimilation migration planning

neste livro vamos tentar encontrar explicações sobre o que são quem são os seus protagonistas e sobretudo como se propagam estas teorias da conspiração feitas de histórias mais ou menos fantasiosas que são passadas de boca em boca e que têm atravessado gerações marcando a nossa forma de ver o mundo atribuir a origem de um determinado problema a uma entidade externa a um ser inatingível invisível aos nossos olhos é muitas vezes uma solução na falta de outras explicações mais simples procurar alguém em quem colocar as culpas de tudo o que de mau acontece à nossa volta é altamente tentador a explicação mais simples é sempre a mais provável como dizia a escritora agatha christie mas nem sempre uma explicação é satisfatória ou vai ao encontro do nosso imaginário podendo mesmo não contemplar uma resposta que permita compreender ou solucionar o dilema o que leva à criação de teorias mais e menos imaginativas
