welcome to babylon a typical sleepy alabama small town where years earlier the larkin family suffered a terrible tragedy now they are about to endure another fourteen year old margaret larkin will be robbed of her innocence and her life by a killer who is beyond the reach of the law but something strange is happening in babylon traffic lights flash an eerie blue a ghostly hand slithers from the drain of a kitchen sink graves erupt from the local cemetery in an implacable march of terror and beneath the murky surface of the river a shifting almost human shape slowly takes form night after night it will pursue the murderer and when the full moon rises over babylon it will seek a terrible vengeance

the earth moon neighborhood is the scene of a large variety of applications that concern asteroids lunar exploration and space debris in earth orbit in particular recent efforts by the scientific community have focused on the possibility of extending the human operations beyond the radiation belts of exploiting in situ resources either on the lunar surface or on asteroids retrieved to the vicinity of the earth and of mitigating the space debris concern by taking advantage of the lunar perturbation the characteristic dynamics in the cislunar space represents an opportunity for the mission designer but also a challenge in terms of theoretical understanding and operational control this research topic covers the earth moon dynamics in its complexity and allure considering the most relevant aspects for both natural and artificial objects in order to get a new comprehension of the dynamics at stake along with the operational procedures that can handle it
