Intercultural Communication 2017-04-10 in abusive supervision in government agencies caillier uses both quantitative and qualitative survey data a mixed method approach to argue that certain organizational norms and subordinate factors either increase or decrease the presence of abusive supervision in agencies and that when employees experience abusive supervision their well being and work attitudes are adversely affected in addition a mixed method approach is used to contend that problems concerning the abusive supervision process are pervasive in agencies more specifically many targets of abuse supervision fail to report the incident and for those who do agencies seldom do anything to stop abusive supervisors and the overwhelming majority of targets experience some form of retaliation for reporting the abuse the author also uses qualitative data to argue that many

agencies still do not have a robust workplace aggression policy the author concludes by identifying future directions for research concerning abusive supervision
