susan kalter presents seventeen previously unpublished short stories by john joseph mathews and skillfully intertwines literary analysis author biography and archival research with his journals and personal correspondence

mathews is considered one of the founders and shapers of the twentieth century native american novel yet literary history has largely ignored his work an osage writer from oklahoma mathews also spent time in los angeles and europe the stories in this volume were written at the dawn of the nuclear age by an author who exposed the social dynamics of an emerging world order an author who had also published explicitly about the ways he observed the east coast establishment suppressing southwestern writers this work shows us the aesthetics we missed out on as a result topics range from adulterous murder to cherokee removal from the thrill of the hunt to the cultural impasses between u s citizens in mexico and their hosts from the modern middle east to the fantastical future the stories bear the consciousness of a postwar world its confusions and regrets its orthodoxies and hypocrisies as well as the mark of a practiced and prolific writer the short stories of john joseph mathews an osage writer sheds light on the complexity of native american experiences of the last century and the ripple of these stories today

the leading edge of computer science research is notoriously ckle new trends come and go with alarming and unfailling regularity in such a rapidly changing eld the fact that research interest in a subject lasts more than a year is worthy of note the fact that after ve years interest not only remains but actually continues to grow is highly unusual as 1998 marked the fth birthday of the international workshop on agent theories architectures and languages atal it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and re ect on how the eld has developed and matured the rst atal workshop was co located with the eleventh european conference on arti cial intelligence ecai 94 which was held in amsterdam the fact that we chose an ai conference to co locate with is telling at that time we expected most researchers with an interest in agents to come from the ai community the workshop which was planned over the summer of 1993 attracted 32 submissions and was attended by 55 people atal was the largest workshop at ecai 94 and the clear enthusiasm on behalf of the community made the decision to hold another atal workshop simple the atal 94 proceedings were formally published in january 1995 under the title intelligent agents and included an extensive review article a glossary a list of key agent systems and unusually for the proceedings of an academic workshop a full subject index the high scienti cand production values embodied by the atal 94 proceedings appear to have been recognized by the community and resulted in atal proceedings being the most successful sequence of books published in springer verlag s lecture notes in arti cial intelligence series
